Agent Technology and e-Health Roberta Annicchiarico,Ulises Cortes Garcia,Cristina Urdiales,2008-04-05 Multi-agent systems are one of the most exciting research areas in Artificial Intelligence. This book reports on the results achieved in this area, discusses the benefits (and drawbacks) that agent-based systems may bring to medical domains and society, and also provides a list of the research topics that should be tackled in the near future to make the deployment of health-care agent-based systems a reality. Current topics of research include communication and co-operation between distributed intelligent agents to manage patient care.

The Complete Guide to Relieving Cancer Pain and Suffering Richard B. Patt M.D.,Susan S. Lang,2004-05-28 Most cancer patients fear unremitting pain more than the prospect of an untimely death, and are surprised to learn that most of the pain and related symptoms of cancer can be successfully addressed by an informed patient working with a determined health care team. Thoroughly updating their widely praised 1994 book, *You Don't Have to Suffer*, Dr. Richard B. Patt and Susan Lang offer a much-needed handbook for patients and caregivers on all aspects of cancer pain and suffering. The authors identify the reasons why patients are so often under-medicated--from patients who feel the need to tough it out to doctors buried in time-consuming paperwork--and argue that properly medicated patients are better able to resume active lives and marshal strength to fight

their disease. Those in chronic pain not only suffer, but also jeopardize their recovery. They demonstrate methods that can be used to cope with pain, nausea, constipation, fatigue, and other symptoms related to cancer and cancer treatment, and describe all of the pain-relieving options available in the modern medical arsenal. This includes drugs and high-tech medical procedures, as well as psychological, cognitive, and mind/body techniques. The authors also discuss depression and other psychological components that can contribute to suffering, as well as end-of-life issues. The book includes detailed charts of all the pain medications presently available and lists many available resources, from pain specialists to hospice and home care. This book will empower cancer patients and their families to make informed decisions about their care and will be of enormous value to the growing number of patients, family members, and health-care professionals determined to relieve needless suffering.

A Year of Biblical Womanhood Rachel Held Evans, 2012-10-29 Have you ever wondered what God truly expects of women? Is there really a prescription for biblical womanhood? Does the Bible's idea of womanhood have a place in modern Christianity? New York Times bestselling author Rachel Held Evans embarks on a year-long study of what it means to live by the standards of biblical womanhood. Strong-willed and independent, Evans couldn't sew a button on a blouse before she embarked on a radical life experiment--a year of biblical

womanhood. Intrigued by the traditionalist resurgence that led many of her friends to abandon their careers to assume traditional gender roles in the home, Evans decided to try it for herself, vowing to take all of the Bible's instructions for women as literally as possible for a full year. Along the way, Evans explores the rich heritage of scriptural heroines, models of grace, and all-around women of valor that we come to know in the Bible. She consults with women who practice these ancient biblical mandates in their own lives--from an Orthodox Jewish woman who changed the way Evans reads the Bible to an Amish community that taught her the true meaning of modesty. In *A Year of Biblical Womanhood*, Evans shares her courageous and often humorous journey of: exploring what a woman's place is according to the Scriptures applying the Bible's teachings to day-to-day life, sometimes to literal extremes focusing on virtues like domesticity, obedience, beauty, submission, and grace developing a Biblical Woman's Ten Commandments to serve as a guide for daily living Join Evans as she dives deep into the lives of the women we meet in Scripture and redefines what it means to live biblically.

Mongrel Nation Ashley Dawson,2018-05-09 *Mongrel Nation* surveys the history of the United Kingdom's African, Asian, and Caribbean populations from 1948 to the present, working at the juncture of cultural studies, literary criticism, and postcolonial theory. Ashley Dawson argues that during the past fifty years Asian and black intellectuals from Sam Selvon to Zadie Smith have continually challenged the United Kingdom's exclusionary definitions of citizenship, using innovative forms of cultural expression to reconfigure definitions of belonging in the postcolonial age. By examining popular culture and exploring topics such as the nexus of race and gender, the growth of transnational politics, and the clash between first- and second-generation immigrants, Dawson broadens and enlivens the field of postcolonial studies. *Mongrel Nation* gives readers a broad landscape from which to view the shifting currents of politics, literature, and culture in postcolonial Britain. At a time when the contradictions of expansionist braggadocio again dominate the world stage, *Mongrel Nation* usefully illuminates the legacy of

imperialism and suggests that creative voices of resistance can never be silenced. Dawson “Elegant, eloquent, and full of imaginative insight, *Mongrel Nation* is a refreshing, engaged, and informative addition to post-colonial and diasporic literary scholarship.” —Hazel V. Carby, Yale University “Eloquent and strong, insightful and historically precise, lively and engaging, *Mongrel Nation* is an expansive history of twentieth-century internationalist encounters that provides a broader landscape from which to understand currents, shifts, and historical junctures that shaped the international postcolonial imagination.” —May Joseph, Pratt Institute Ashley Dawson is Associate Professor of English at the City University of New York’s Graduate Center and the College of Staten Island. He is coeditor of the forthcoming *Exceptional State: Contemporary U.S. Culture and the New Imperialism*.

Global Governance and Interaction between International Institutions Alexander Libman, Anastassia Obydenkova, 2023-09-26

This book builds on theory of authoritarian regionalism and is the first attempt to analyse the interaction of authoritarian regional organizations in Eurasia with their global and regional counterparts (NATO, EU, WTO, IMF etc.). It analyses three decades of the development of post-Soviet regional organizations prior to the tectonic geopolitical and security changes of 2022. Eurasian regional organizations created by Russia have been frequently perceived as attempts to establish ‘alternatives’ to the global governance institutions and to compete with other regional organizations like, for example, the European Union (EU). They are seen as a pronounced example of ‘authoritarian regionalism’, i.e., regional organizations established by non-democracies. The way they interact with global and regional institutions has, however, remained understudied. This book aims to close this gap. It places Eurasia within a global context and considers similar trends world-wide as well as outlines the agenda for future studies of global versus regional governance. The book sheds light on long-term strategies of Russia in Eurasia, in global economy and in world politics, and on the interaction between Russia and other post-Soviet states. With an extended introduction and conclusion, this book is an insightful resource for scholars; advanced students; and researchers of politics, international relations, and Eurasian area-studies. The chapters in this book were originally published as a special issue of *Post-Communist Economies*.

Nuclear Physics for Cultural Heritage Anna Macková, Douglas MacGregor, Faïçal Azaiez, Johan Nyberg, 2021 Nuclear physics applications in medicine and energy are well known and widely reported. Less well known are the many important nuclear and related techniques used for the study, characterization, assessment and preservation of cultural heritage. There has been enormous progress in this field in recent years and the current review aims to provide the public with a popular and accessible account of this work. The Nuclear Physics Division of the EPS represents scientists from all branches of nuclear physics across Europe. One of its aims is the dissemination of knowledge about nuclear physics and its applications. This review is led by Division board member Anna Macková, Head of the Tandetron Laboratory at the Nuclear Physics Institute of the Czech Academy of Sciences, and the review committee includes four other members of the nuclear physics board interested in this area: Faïçal Azaiez, Johan Nyberg, Eli Piasetzky and Douglas MacGregor. To create a truly authoritative account, the Scientific Editors have invited contributions from leading experts across Europe, and this publication is the combined result of their work. The review is extensively illustrated with important discoveries and examples from archaeology, pre-history, history, geography, culture, religion and curation, which underline the breadth and importance of this field. The large number of groups and laboratories working in the study and preservation of cultural heritage across Europe indicate the enormous effort and importance attached by society to this activity
