This report sets the economic and business case for urgent and ambitious action on biodiversity. It presents a preliminary assessment of current biodiversity-related finance flows, and discusses the key data and indicator gaps that need to be addressed to underpin effective monitoring of both the pressures on biodiversity and the actions (i.e. responses) being implemented. The report concludes with ten priority areas where G7 and other countries can prioritise their efforts.

Essentials of Interventional Cancer Pain Management Amitabh Gulati,Vinay

Puttanniah,Brian M. Bruel,William S. Rosenberg,Joseph C. Hung,2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. Essentials of Interventional Cancer Pain Management globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the

field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and fellows.

Making Change Work Brien Palmer, 2004-01-01 As organizations strive to remain ahead of the competition, there will inevitably and often come the need for change. All successful organizations regularly use change to improve processes and increase performance. While these times of change can be a great opportunity for an organization, it also can be a time of stress and angst for all involved. Not all organizations are in a position to make these changes effectively and efficiently, and for many their efforts often fall short of the intended goals. *Making Change Work: Practical Tools for Overcoming Human Resistance to Change* was written to help organizations prepare for and successfully implement change. The price of a failed change effort can be steep, both monetarily and in a loss of credibility. *Making Change Work* will first provide tools to measure your organization's readiness to change, helping make sure that the efforts will not be doomed to fail from the beginning. The book then provides many tools to apply sequentially and logically in order to gain acceptance of the change throughout the organization. In helping your organization make change successfully, *Making Change Work* addresses buy-in, acceptance, motivation, anticipation, fear, uncertainty, and all

the other messy human considerations that cause change to fail in the real world.

Interpreting the Prohibition Era at Museums and Historic Sites Jason S. Lantzer,2014-11-20

Interpreting the Prohibition Era at Museums and Historic Sites chronicles the rise and fall of one of the greatest attempted reforms in American History. Why were Americans so worried about alcohol? Why did they seek to ban an entire industry? How did those involved in the trade react? How did repeal come about? How should we remember the noble crusade? Such questions are important, both for historians and museums who seek to interpret the Prohibition Era, as well as for the general public who wants to know more about the Roaring Twenties and how it continues to shape the United States today. This captivating guide will help interpreters explain the history of prohibition, its repeal, and its legacies. Case studies cover: · Breweries · Reformers · Women · Saloons, both before and after Prohibition · Gamblers and gumshoes This guide will help museum and history professionals make sense of a complex story, relate the history and legacy of political pressure groups, and help learners think about the era in new ways.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help

beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Closing the Cancer Divide Felicia Marie Knaul,2012-12-17 Cancer has become a leading cause of death and disability and a serious yet unforeseen challenge to health systems in low- and middle-income countries. A protracted and polarized cancer transition is under way and fuels a concentration of preventable risk, illness, suffering, impoverishment from ill health, and death among poor populations. Closing this cancer divide is an equity imperative. The world faces a huge, unperceived cost of failure to take action that requires an immediate and large-scale global response. Closing the Cancer Divide presents strategies for innovation in delivery, pricing, procurement, finance, knowledge-building, and leadership that can be scaled up by applying a diagonal approach to health system strengthening. The chapters provide evidence-based recommendations for developing programs, local and global policy-making, and prioritizing research. The cases and frameworks provide a guide for developing responses to the challenge of cancer and other chronic illnesses. The book summarizes results of the Global Task Force on Expanding Access to Cancer Care and Control in Developing Countries, a collaboration among leaders from the global health and cancer care communities worldwide, originally convened by Harvard University. It includes contributions from civil society, global and national policy-makers, patients and practitioners, and academics representing an array of fields.
