Java Cryptography Jonathan Knudsen,1998-05 Cryptography, the science of secret writing, is the biggest, baddest security tool in the application programmer's arsenal. Cryptography provides three services that are crucial in secure programming. These include a cryptographic cipher that protects the secrecy of your data; cryptographic certificates, which prove identity (authentication); and digital signatures, which ensure your data has not been damaged or tampered with. This book covers cryptographic programming in Java. Java 1.1 and Java 1.2 provide extensive support for cryptography with an elegant architecture, the Java Cryptography Architecture (JCA). Another set of classes, the Java Cryptography Extension (JCE), provides additional cryptographic functionality. This book covers the JCA and the JCE from top to bottom, describing the use of the cryptographic classes as well as their innards. The book is designed for moderately experienced Java programmers who want to learn how to build cryptography into their applications. No prior knowledge of cryptography is assumed. The book is peppered with useful examples, ranging from simple demonstrations in the first chapter to full-blown applications in later chapters. Topics include: The Java Cryptography Architecture (JCA) The Java Cryptography Extension (JCE) Cryptographic providers The Sun key management tools Message digests, digital signatures, and certificates (X509v3) Block and stream ciphers Implementations of the ElGamal signature and cipher algorithms A network talk application that encrypts all data sent over the network An email application that encrypts its messages Covers JDK 1.2 and JCE 1.2.

The New Faces of Christianity Philip Jenkins,2006-09-01 Named one of the top religion books of 2002 by USA Today, Philip Jenkins's phenomenally successful *The Next Christendom* permanently changed the way people think about the future of Christianity. In that volume, Jenkins called the world's attention to the little noticed fact that Christianity's center of gravity was moving inexorably southward, to the point that Africa may soon be home to the world's largest Christian populations. Now, in this brilliant sequel, Jenkins takes a much closer look at Christianity in the global South, revealing what it is like, and what it means for the future. The faith of the South, Jenkins finds, is first and foremost a biblical faith. Indeed, in the global South, many Christians identify powerfully with the world portrayed in the New Testament--an agricultural world very much like their own, marked by famine and plague, poverty and exile, until very recently a society of peasants, farmers, and small craftsmen. In the global South, as in the biblical world, belief in spirits and witchcraft are commonplace, and in many places--such as Nigeria, Indonesia, and Sudan--Christians are persecuted just as early Christians were. Thus the Bible speaks to the global South with a vividness and authenticity simply unavailable to most believers in the industrialized North. More important, Jenkins shows that throughout the global South, believers are reading the Bible with fresh eyes, and coming away with new and sometimes startling interpretations. Some of their conclusions are distinctly fundamentalist, but Jenkins finds an intriguing paradox, for they are also finding ideas in the Bible that are socially liberating, especially with respect to women's rights. Across Africa, Asia, and Latin America, such Christians are social activists in the forefront of a wide range of liberation movements. It's hard to overstate how interesting, how eye-opening, how frequently surprising (and sometimes disturbing) Jenkins' findings are. Anyone interested in the implications of these trends for the major denominations, for Muslim-Christian conflict, and for global politics will find *The New Faces of Christianity* provocative and incisive--and indispensable.

Collaborative Networked Organizations Luis M. Camarinha-Matos,Hamideh Afsarmanesh,2007-05-08 A research agenda for collaborative networks Purpose. Many practical application experiments and pilot cases nowadays provide evidence on what works and what still remains as a challenge for collaborative networked organizations (CNOs). The fast evolution of the information and communication technologies and in particular the so-called Internet technologies, also represents an important motivator for the emergence of new forms of collaboration. However, most efforts in this area are highly fragmented, considering only some partial facets and not a holistic perspective that would be required. We are therefore at a point in which it is

necessary to define much more consolidated and sustainable research strategies for a second phase of research and development in this area. This book addresses the main disciplines involved in CNOs. It further synthesizes the views and opinions expressed by a large number of visionaries from the main disciplines involved in CNOs, and offers a comprehensive set of recommendations for the establishment of a research agenda on collaborative networks. As recognized experts in their specific areas, different authors in this book have presented work that is backed by a large number of research results, each focusing on specific facets of collaborative networks, and coming out of a large number of international and national projects.

Freudian Fadeout Arij Ouweneel, 2012-08-07 In Western culture, the psychoanalysis that has guided popular psychology for almost a century is now on the retreat. Better equipped with proven results, cognitive and evolutionary psychology has driven psychoanalysis out of the spotlight. In cultural and film studies, however, the debate between cognitive sciences and psychoanalysis remains contentious. This volume explores this state of things by examining criticism of 18 films, juxtaposing them with cognitive-based films to reveal the flaws in the psychoanalytical concepts. It pays particular attention to simulation theory, the concept that narratives “learned” from films could work in human minds as simulations for solutions to particular problems. By introducing the idea of narrative stimulation to film studies, this work argues for a different method of film critique, encouraging further research into this nascent field.

NATO and Weapons of Mass Destruction Eric Terzuolo, 2009-05-07 NATO was hugely successful in facing off the Soviet Union during the Cold War. But has it been equally successful in addressing the new threats of the post-Cold War era? This new study assesses the organization’s political and military initiatives, and how its outreach to Russia, Ukraine, and other countries in the Euro-Atlantic and Mediterranean regions, devoted considerable attention to WMD proliferation risks. It also probes the political factors, both inside and outside NATO, as well as resource constraints, which have limited the alliance's added value in the international community's effort to combat proliferation. The events of 11 September 2001 and bitter intra-alliance controversy over the 2003 Iraq intervention have highlighted questions regarding NATO's future role, and even its continued viability. This is a serious reflection on how the alliance should figure in the fight against WMD and terrorist threats and an examination of today’s key issues, including the use of force in international relations and the possibility of constructing new, post-Cold War collective security rules. This is the first study to evaluate, critically and in-depth, how a long-standing security organization has adapted - and must continue to adapt - to the global security challenges of our time. This book will be of great interest to all students and scholars of international politics, military history and all readers interested in the future of NATO and international security.

Understanding Language through Humor Stanley Dubinsky, Chris Holcomb, 2011-09-15 Students often struggle to understand linguistic concepts through examples of language data provided in class or in texts. Presented with ambiguous information, students frequently respond that they do not 'get it'. The solution is to find an example of humour that relies on the targeted ambiguity. Once they laugh at the joke, they have tacitly understood the concept, and then it is only a matter of explaining why they found it funny. Utilizing cartoons and jokes illustrating linguistic concepts,

this book makes it easy to understand these concepts, while keeping the reader's attention and interest. Organized like a course textbook in linguistics, it covers all the major topics in a typical linguistics survey course, including communication systems, phonetics and phonology, morphemes, words, phrases, sentences, language use, discourses, child language acquisition and language variation, while avoiding technical terminology.

Yearbook of International Organizations 1999-2000 Ed 99-2000,2000-01-30 The latest edition of this standard international reference work provides detailed information for over 32,000 organizations active in over 225 countries. It covers everything from intergovernmental and national bodies to conferences and religious orders and fraternities. Volume 3: Global Action Networks is an overview of the range and network of activities of the international organizations themselves -- organized alphabetically by subject and by region. Similar to a yellow pages, it groups international and regional bodies under 4,300 categories of common ideas, aims, and activities.

Foundations of Low Vision Anne Lesley Corn,Jane N. Erin,2010 Foundations of Low Vision: Clinical and Functional Perspectives, the ground-breaking text that highlighted the importance of focusing on the functional as well as the clinical implications of low vision, has been completely updated and expanded in this second edition. The revised edition goes even further in its presentation of how best to assess and support both children and adults with low vision and plan programs and services that optimize their functional vision and ability to lead productive and satisfying lives, based on individuals' actual abilities. Part 1, Personal and Professional Perspectives, provides the foundations of this approach, with chapters focused on the anatomy of the eye, medical causes of visual impairment, optics and low vision devices, and clinical low vision services, as well as psychological and social implications of low vision and the history of the field. Part 2 focuses on children and youths, providing detailed treatment of functional vision assessment, instruction, use of low vision devices, orientation and mobility, and assistive technology. Part 3 presents rehabilitation and employment issues for working-age adults and special considerations for older adults.

The 1966 Green Bay Packers George Bozeka,2016-06-21 The 1966 Green Bay Packers were one of the greatest teams in professional football history. Led by legendary head coach Vince Lombardi and 10 future Hall of Famers--including Bart Starr, Jim Taylor, Forrest Gregg, Willie Davis and Ray Nitschke--they were the decisive winners of Super Bowl I, defeating the Kansas City Chiefs and upholding the superiority of the National Football League over the upstart American Football League. This book tells the story of the hard-working '66 Packers on the gridiron and their legacy in Tittletown, USA.

Dairy Fats and Related Products Adnan Y. Tamime, 2009-09-08 Whilst milk fat has always been appreciated for its flavour, the market had suffered from concerns over cardiovascular diseases associated with the consumption of animal fats. However, recent clinical studies have indicated benefits, particularly in relation to conjugated linoleic acids (CLA), in the prevention of certain diseases. The range of spreads has also increased, including the addition of probiotic organisms and/or plant extracts to reduce serum cholesterol levels. The primary aim of this publication is to detail the state-of-the-art manufacturing methods for: Cream Butter Yellow fat spreads, both pure milk fat based and mixtures with other fats Anhydrous milk fat and its derivatives Coverage of the manufacturing technologies is complemented by examinations of the relevant nutrition issues and analytical methods. The authors, who are all specialists in their fields in respect to these products, have been chosen from around the world. It is hoped that the book will provide a valuable reference work for dairy scientists and technologists within the dairy industry and those with similar processing requirements, as well as researchers and students, thus becoming an important component of the SDT's Technical Series. The Editor Dr Adnan Y. Tamime is a Consultant in Dairy Science and Technology, Ayr, UK. He is the Series Editor of the SDT's Technical Book Series.
