Southeast Asian Anthropologies Eric C. Thompson,Vineeta Sinha,2019 Anthropology is a flourishing discipline in Southeast Asia. This book makes visible the development of national traditions and transnational practices of anthropology across the region. The authors are practising anthropologists with decades of experience in the intellectual traditions and institutions that have taken root in the region. Three overlapping issues are addressed in these pages. First, the historical development of traditions of research, scholarship, and social engagement across diverse anthropological communities of the region, which have adopted and adapted global anthropological trends to their local circumstances. Second, the opportunities and challenges faced by Southeast Asian anthropologists as they practise their craft in different political contexts. Third, the emergence of locally-grounded, intra-regional, transnational linkages and practices. The book contributes to a 21st-century, world anthropologies paradigm from a Southeast Asian perspective.

**A training of trainers manual to develop capacities in gender sensitive rural advisory services** Food and Agriculture Organization of the United Nations,World Health Organization,2017-01-01 This manual provides guidance for organizing and facilitating training of trainers in gender-sensitive rural advisory services design and delivery. It has been developed as part of the FAO project "Capacity Development Support to Rural Women on the Socio-economic and Gender Aspects of Sustainable Rural Development", which was implemented in Turkey and Azerbaijan, in 2014-16. The project was realized under the FAO-

Turkey Partnership Programme and financed by the Government of Turkey. The manual is based on the pilot trainings carried out in Turkey and Azerbaijan and is intended to help meet the needs for training guidelines specifically designed for strengthening the gender sensitivity of rural advisory services. The guidelines are developed to be applied not just to one country situation, but for easy adaptation and use in strengthening advisory services globally. The manual content is organized into three main sections. Section 1 introduces the manual, section 2 provides detailed guidelines for all stages of a workshop design and preparation and section 3 is a step by step programme for delivery of a four day workshop. A final section of annexes includes sample training materials, sample slide presentations and notes for use in workshop delivery, a glossary of gender related terminology, and useful references and resource material on gender and agriculture.

*Framing Global Health Governance* Colin McInnes,Kelley Lee,2016-01-08 Globalisation is influencing not only patterns of health and disease worldwide, but how decisions on health are made and organised. This is the arena of 'Global Health Governance'. Despite some successes in developing better global governance for health, progress overall has been disappointingly slow. This is especially so given the number of health crises today, some of which are long standing but others relatively new. This book explores how progress has often been limited, but also on occasion assisted, by the role of ideas. It identifies how health issues, such as HIV/AIDS, pandemic influenza and tobacco control, are framed in such a way as to resonate with a set of ideas, or worldviews, associated with particular policy communities. A successful framing can generate possibilities for action, but can also lead to competition when ideas conflict or suggest different pathways of response. Global Health Governance therefore is an arena of competition as well as cooperation, where ideas matter as well as resources and political will. This book was originally published as a special issue of Global Public Health.
