Noise and Military Service Institute of Medicine,Medical Follow-up Agency,Committee on Noise-Induced Hearing Loss and Tinnitus Associated with Military Service from World War II to the Present,2006-01-20 The Institute of Medicine carried out a study mandated by Congress and sponsored by the Department of Veterans Affairs to provide an assessment of several issues related to noise-induced hearing loss and tinnitus associated with service in the Armed Forces since World War II. The resulting book, Noise and Military Service: Implications for Hearing Loss and Tinnitus, presents findings on the presence of hazardous noise in military settings, levels of noise exposure necessary to cause hearing loss or tinnitus, risk factors for noise-induced hearing loss and tinnitus, the timing of the effects of noise exposure on hearing, and the adequacy of military hearing conservation programs and audiometric testing. The book stresses the importance of conducting hearing tests (audiograms) at the beginning and end of military service for all military personnel and recommends several steps aimed at improving the military services' prevention of and surveillance for hearing loss and tinnitus. The book also identifies research needs, emphasizing topics specifically related to military service.

Penetration Testing Georgia Weidman,2014-06-14 Penetration testers simulate cyber attacks to find security weaknesses in networks, operating systems, and applications. Information security experts worldwide use penetration techniques to evaluate enterprise defenses. In Penetration Testing, security expert, researcher, and trainer Georgia Weidman introduces you to the core skills and techniques that every pentester needs. Using a virtual machine-based lab that includes Kali Linux and vulnerable operating systems, you'll run through a series of practical lessons with tools like Wireshark, Nmap, and Burp Suite. As you follow along with the labs and launch attacks, you'll experience the key stages of an actual assessment—including information gathering, finding exploitable vulnerabilities, gaining access to systems, post exploitation, and more. Learn how to: -Crack passwords and wireless network keys with brute-forcing and wordlists -Test web applications for vulnerabilities -Use the Metasploit Framework to launch exploits and write your own Metasploit modules -Automate social-engineering attacks -Bypass antivirus software -Turn access to one machine into total control of the enterprise in the post exploitation phase You'll even explore writing your own exploits. Then it's on to mobile hacking—Weidman's particular area of research—with her tool, the Smartphone Pentest Framework. With its collection of hands-on lessons that cover key tools and strategies, Penetration Testing is the introduction that every aspiring hacker needs.

Housing Estates in Europe Daniel Baldwin Hess,Tiit Tammaru,Maarten van Ham,2018-08-14 This open access book explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing

estates in 14 European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe.

Chart No. 1 Nima, 2010 Chart Number One is essential to correct and accurate use of nautical charts. More than a chart, it is a book that defines the symbols, abbreviations and terms used on charts. It also provides important information about buoys, light visibility (range) and aids to navigation. This new and improved edition from Paradise Cay is a complete and accurate high quality reproduction of information provided by NOAA and NIMA.

Vatican Secret Diplomacy Charles R. Gallagher, 2008-06-10 In the corridors of the Vatican on the eve of World War II, American Catholic priest Joseph Patrick Hurley found himself in the midst of secret diplomatic dealings and intense debate. Hurley's deeply felt American patriotism and fixed ideas about confronting Nazism directly led to a mighty clash with Pope Pius XII. It was 1939, the earliest days of Pius's papacy, and controversy within the Vatican over policy toward Nazi Germany was already heated. This groundbreaking book is both a biography of Joseph Hurley, the first American to achieve the rank of nuncio, or Vatican ambassador, and an insider's view of the alleged silence of the pope on the Holocaust and Nazism. Drawing on Hurley's unpublished archives, the book documents critical debates in Pope Pius's Vatican, secret U.S.-Vatican dealings, the influence of Detroit's flamboyant anti-Semitic priest Charles E. Coughlin, and the controversial case of Croatia's Cardinal Stepinac. The book also sheds light on the powerful connections between religion and politics in the twentieth century.

Food Security in Africa Alexander Sarris, 2010-01-01 'As they often do, Jamie Morrison and Alexander Sarris have provided researchers, policy-makers, and the interested public with the firm empirical grounding needed for sound agricultural development policies. They have synthesized from a rich and varied set of country studies a unique contribution to one of the key challenges of our times increasing the productivity of smallholder food production in the age of globalization.' Timothy A. Wise, Tufts University, US 'Food security has been a major concern in Africa for decades, and a more pressing problem with recent increases in food prices. The editors and contributors to this volume are experts in the field and should be commended for a timely, informative and in places challenging analysis of food production and markets in eastern and southern Africa. The volume brings a refreshing variety of theoretical, analytical and informed case study approaches to bear on the food security problem; it should be read by anybody seriously interested in African development.' Oliver Morrissey, University of Nottingham, UK Drawing on insights from theoretical applications, empirically based approaches and case study experience, this book contributes to the improved design and use of trade and related policy interventions in staple food markets. Trade policy interventions have a potentially critical role to play in the development of staple food markets in developing countries and, as a source of revenue, in wider processes of rural development. Governments have long defended trade and related policy interventions in staple food markets on the basis of food security concerns. However, the design and implementation of these policies has often resulted in unintended impacts, increasing the risks faced by private sector actors and reducing their incentives for investment in improved market performance. In the context of increasingly volatile staple food markets, this book, commissioned from leading experts in this field, seeks to enhance dialogue between stakeholders involved in, and affected by, the design and use of trade and related policy interventions. This significant book will appeal to policy analysts and decision makers influential in the design and implementation of trade and related market interventions, as well as students of development economics. Researchers contributing to debates on the use and impacts of trade and related market interventions in staple food markets in poor countries will also find this volume of great benefit.

IBM ProtecTIER Implementation and Best Practices Guide Karen Orlando, Mara Miranda Bautista, Emmanuel Barajas Gonzalez, Carlos A. Martinez Vazquez, IBM Redbooks, 2016-08-16 This IBM® Redbooks® publication provides best practice guidance for planning, installing, configuring, and employing the IBM TS7600 ProtecTIER® family of products. It provides the latest best practices for the practical application of ProtecTIER Software Version 3.4. This latest release introduces the new ProtecTIER Enterprise Edition TS7650G DD6 model high performance server. This book also includes information about the revolutionary and patented IBM HyperFactor® deduplication engine, along with other data storage efficiency techniques, such as compression and defragmentation. The IBM System Storage® TS7650G ProtecTIER Deduplication Gateway and the IBM System Storage TS7620 ProtecTIER Deduplication Appliance Express are disk-based data storage systems: The Virtual Tape Library (VTL) interface is the foundation of ProtecTIER and emulates traditional automated tape libraries. For your existing ProtecTIER solution, this guide provides best practices and suggestions to boost the performance and the effectiveness of data deduplication with regards to your application platforms for your VTL and FSI (systems prior to version 3.4). When you build a ProtecTIER data deduplication environment, this guide can help IT architects and solution designers plan for the best option and scenario for data deduplication for their environments. This book can help you optimize your deduplication ratio, while reducing the hardware, power and cooling, and management costs. This Redbooks publication provides expertise that was gained from an IBM ProtecTIER System Client Technical Specialist (CTS), Development, and Quality Assurance teams. This planning should be done by the Sales Representative or IBM Business Partner, with the help of an IBM System CTS or IBM Solution Architect.

Designing and Implementing Health Care Provider Payment Systems Jack Langenbrunner, Cheryl Cashin, Sheila O'Dougherty, 2009-01-01 Strategic purchasing of health services involves a continuous search for the best ways to maximize health system performance by deciding which interventions should be purchased, from whom these should be purchased, and how to pay for them. In such an arrangement, the passive cashier is replaced by an intelligent purchaser that can focus scarce resources on existing and emerging priorities rather than continuing entrenched historical spending patterns. Having experimented with different ways of paying providers of health care services, countries increasingly want to know not only what to do when paying providers, but also how to do it, particularly how to design, manage, and implement the transition from current to reformed systems. 'Designing and Implementing Health Care Provider Payment Systems: How-To Manuals' addresses this need. The book has chapters on three of the most effective provider payment systems: primary care per capita (capitation) payment, case-based hospital payment, and hospital global budgets. It also includes a primer on a second policy lever used by purchasers, namely, contracting. This primer can be especially useful with one provider payment method: hospital global budgets. The volume's final chapter provides an outline for designing, launching, and running a health management information system, as well as the necessary infrastructure for strategic purchasing.
