Bowen, 2009-04-03 The second edition of *The Diversity of Fishes* represents a major revision of the world's most widely adopted ichthyology textbook. Hundreds of new and redrawn illustrations augment readable text, and every chapter has been revised to reflect the discoveries and greater understanding achieved during the past decade. Written by a team of internationally-recognized authorities, the first edition of *The Diversity of Fishes* was received with enthusiasm and praise, and incorporated into ichthyology and fish biology classes around the globe, at both undergraduate and postgraduate levels. The second edition is a substantial update of an already classic reference and text. **Environmental Law, Disrupted** KEITH. OWLEY HIROKAWA (JESSICA.) Jessica Owley, 2021-12-14 To date, U.S. law has largely served as an obstacle to an honest assessment of our preparedness to face the climate change challenge. Given that society has become comfortable amidst mild climatic conditions, and given a pervasive reluctance to change, extreme and abrupt climatic changes will hit hard. Our current legal structure maintains a dangerous status quo and it is time to unleash the potential of communities and the private sector to produce innovative solutions. This book, the fourth in a series by the Environmental Law Collaborative, addresses disruption from a variety of influences and perspectives. Some essays consider the disruptive effects of environmental changes on human and ecological safety, security, and well-being, suggesting that the impacts of climate changes are not accounted for in the current legal system. Some identify key changes needed to respond to climatic challenges, social inequities, and dwindling grey and green resources. Others deconstruct social, political, and professional frameworks to understand how such influences might be used to disrupt the current regime, or even ones where expectations are being disrupted with the endorsement of law. Taken together, these essays provide an understanding of the cause, effect, and opportunity that environmental disruption presents in the climate change era.

Mexico June S Beittel, 2020-01-04 Mexican drug trafficking organizations (DTOs) pose the greatest crime threat to the United States and have the

greatest drug trafficking influence, according to the annual U.S. Drug Enforcement Administration's (DEA's) National Drug Threat Assessment. These organizations work across the Western Hemisphere and globally. They are involved in extensive money laundering, bribery, gun trafficking, and corruption, and they cause Mexico's homicide rates to spike. They produce and traffic illicit drugs into the United States, including heroin, methamphetamine, marijuana, and powerful synthetic opioids such as fentanyl, and they traffic South American cocaine. Over the past decade, Congress has held numerous hearings addressing violence in Mexico, U.S. counternarcotics assistance, and border security issues. Mexican DTO activities significantly affect the security of both the United States and Mexico. As Mexico's DTOs expanded their control of the opioids market, U.S. overdoses rose sharply to a record level in 2017, with more than half of the 72,000 overdose deaths (47,000) involving opioids. Although preliminary 2018 data indicate a slight decline in overdose deaths, many analysts believe trafficking continues to evolve toward opioids. The major Mexican DTOs, also referred to as transnational criminal organizations (TCOs), have continued to diversify into such crimes as human smuggling and oil theft while increasing their lucrative business in opioid supply. According to the Mexican government's latest estimates, illegally siphoned oil from Mexico's state-owned oil company costs the government about \$3 billion annually. Mexico's DTOs have been in constant flux. In 2006, four DTOs were dominant: the Tijuana/Arellano Felix organization (AFO), the Sinaloa Cartel, the Juárez/Vicente Carrillo Fuentes Organization (CFO), and the Gulf Cartel. Government operations to eliminate DTO leadership sparked organizational changes, which increased instability among the groups and violence. Over the next dozen years, Mexico's large and comparatively more stable DTOs fragmented, creating at first seven major groups, and then nine, which are briefly described in this report. The DEA has identified those nine organizations as Sinaloa, Los Zetas, Tijuana/AFO, Juárez/CFO, Beltrán Leyva, Gulf, La Familia Michoacana, the Knights Templar, and Cartel Jalisco-New Generation (CJNG). In mid-2019, leader of the long-dominant Sinaloa Cartel, Joaquin (El Chapo) Guzmán, was sentenced to life in a maximum-security U.S. prison, spurring further fracturing of a once hegemonic DTO. By some accounts, a direct effect of this fragmentation has been escalated levels of violence. Mexico's intentional homicide rate reached new records in 2017 and 2018. In 2019, Mexico's national public security system reported more than 17,000 homicides between January and June, setting a new record. In the last months of 2019, several fragments of formerly cohesive cartels conducted flagrant acts of violence. For some Members of Congress, this situation has increased concern about a policy of returning Central American migrants to cities across the border in Mexico to await their U.S. asylum hearings in areas with some of Mexico's highest homicide rates. Mexican President Andrés Manuel López Obrador, elected in a landslide in July 2018, campaigned on fighting corruption and finding new ways to combat crime, including the drug trade. According to some analysts, challenges for López Obrador since his inauguration include a persistently ad hoc approach to security; the absence of strategic and tactical intelligence concerning an increasingly fragmented, multipolar, and opaque criminal market; and endemic corruption of Mexico's judicial and law enforcement systems. In December 2019, Genaro Garcia Luna, a former top security minister under the Felipe Calderón Administration (2006-2012), was arrested in the United States on charges he had taken enormous bribes from the Sinaloa Cartel.

Research and Development in the Pharmaceutical Industry (A CBO Study) Congressional Budget Office, 2013-06-09 Perceptions that the pace of new-drug development has slowed and that the pharmaceutical industry is highly profitable have sparked concerns that significant problems loom for future drug development. This Congressional Budget Office (CBO) study-prepared at the request of the Senate Majority Leader-reviews basic facts about the drug industry's recent spending on research and development (R&D) and its output of new drugs. The study also examines issues relating to the costs of R&D, the federal government's role in pharmaceutical research, the performance of the pharmaceutical industry in developing innovative drugs, and the role of expected profits in private firms' decisions about investing in drug R&D. In keeping with CBO's mandate to provide

objective, impartial analysis, the study makes no recommendations. David H. Austin prepared this report under the supervision of Joseph Kile and David Moore. Colin Baker provided valuable consultation...

**Global Crossroads: Rethinking Dominant Orders in Our Contested World** Sahar Taghdisi Rad, Steve F.R. Fröhlich, Kate Vasiljeva, 2020-06-10 Global Crossroads: Rethinking Dominant Orders in Our Contested World is an edited collection of papers mostly presented at the 2019 DEN International Student Conference. This publication is one of the many annual projects conducted under the umbrella of the Democratic Education Network (DEN) which came to existence in 2016 at the then Department of Politics and International Relations at the University of Westminster. Today DEN has expanded across multiple departments within the University's School of Social Sciences, aiming to inspire engagement with communities and involvement in student-led projects. DEN aspires to be a platform for empowering students, offering them opportunities for personal, intellectual and professional development, and enhancing students' engagement and experience. This book is an articulation of the students' research and analytical work on some of the most pressing global issues of our times. It is, further, a product of their hard work and skills, developed through DEN, in editing and compiling academic publications — a testimony to DEN's ability to encourage and empower students to work together and achieve remarkable results.

**Beyond Zero-Sum Environmentalism** SARAH. POWERS KRAKOFF (MELISSA ANN. ROSENBLOOM, JONATHAN D.), Melissa Ann Powers, Jonathan D. Rosenbloom, 2019-05-28 Environmental law and environmental protection have long been portrayed as requiring tradeoffs between incompatible ends: jobs versus environment; markets versus regulation; enforcement versus incentives. Behind these views are a variety of concerns, including resistance to government regulation, skepticism about the importance or extent of environmental harms, and sometimes even pro-environmental views about the limits of Earth's carrying capacity. This framework is perhaps best illustrated by the Trump Administration, whose rationales for a host of environmental and natural resources policies have embraced a zero-sum approach, seemingly preferring a world divided into winners and losers. Given the many significant challenges we face, does playing the zero-sum game cause more harm than good? And, if so, how do we move beyond it? This book is the third in a series of books authored by members of the Environmental Law Collaborative (ELC), an affiliation of environmental law professors that began in 2011. In it, the authors tackle the origins and meanings of zero-sum frameworks and assess their implications for natural resource and environmental protection. The authors have different angles on the usefulness and limitations of zero-sum framing, but all go beyond the oversimplified view that environmental protection always imposes a dead loss on some other societal value.

**Understanding Mobilities for Designing Contemporary Cities** Paola Pucci, Matteo Colleoni, 2015-12-08 This book explores mobilities as a key to understanding the practices that both frame and generate contemporary everyday life in the urban context. At the same time, it investigates the challenges arising from the interpretation of mobility as a socio-spatial phenomenon both in the social sciences and in urban studies. Leading sociologists, economists, urban planners and architects address the ways in which spatial mobilities contribute to producing diversified uses of the city and describe forms and rhythms of different life practices, including unexpected uses and conflicts. The individual sections of the book focus on the role of mobility in transforming contemporary cities; the consequences of interpreting mobility as a socio-spatial phenomenon for urban projects and policies; the conflicts and inequalities generated by the co-presence of different populations due to mobility and by the interests gathered around major mobility projects; and the use of new data and mapping of mobilities to enhance comprehension of cities. The theoretical discussion is complemented by references to practical experiences, helping readers gain a broader understanding of mobilities in relation to the capacity to analyze, plan and design contemporary cities.
