Improving z/OS Application Availability by Managing Planned Outages Frank Kyne,Andy Clifton,Justin Deane,Fernando Ferreira,Richard Gunjal,Chuck Laurent,John Papp,Judy Ruby-Brown,Maida Snapper,Michael Stephen,Dave Viguers,Marna Walle,Yvonne Zemotel,IBM Redbooks,2014-12-22 This IBM® Redbooks® publication is intended to make System Programmers, Operators, and Availability Managers aware of the enhancements to recent releases of IBM z/OS® and its major subsystems in the area of planned outage avoidance. It is a follow-on to, rather than a replacement for, z/OS Planned Outage Avoidance Checklist, SG24-7328. Its primary objective is to bring together in one place information that is already available, but widely dispersed. It also presents a different perspective on planned outage avoidance. Most businesses care about application availability rather than the availability of a specific system. Also, a planned outage is not necessarily a bad thing, if it does not affect application availability. In fact, running for too long without an IPL or subsystem restart might have a negative impact on application availability because it impacts your ability to apply preventive service. Therefore, this book places more focus on decoupling the ability to make changes and updates to your system from IPLing or restarting your systems.

America's Role in Nation-Building James Dobbins, Ian O. Lesser, Peter Chalk, 2003-08-01 The post-World War II occupations of Germany and Japan set standards for postconflict nation-building that have not since been matched. Only in recent years has the United States has felt the need to participate in similar transformations, but it is now facing one of the most challenging prospects since the 1940s: Iraq. The authors review seven case studies--Germany, Japan, Somalia, Haiti, Bosnia, Kosovo, and Afghanistan--and seek lessons about what worked well and what did not. Then, they examine the Iraq situation in light of these lessons. Success in Iraq will require an extensive commitment of financial, military, and political resources for a long time. The United States cannot afford to contemplate early exit strategies and cannot afford to leave the job half completed.
