Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11

inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. Nudge Richard H. Thaler, Cass R. Sunstein, 2009-02-24 Now available: Nudge:

The Final Edition The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell’s *Blink*, Charles Duhigg’s *The Power of Habit*, James Clear’s *Atomic Habits*, and Daniel Kahneman’s *Thinking, Fast and Slow* Named a Best Book of the Year by *The Economist* and the *Financial Times* Every day we make choices—about what to buy or eat, about financial investments or our children’s health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. *Nudge* is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Protection of Materials and Structures from Space Environment J.

Kleiman, Zelina Iskanderova, 2006-04-11 This publication presents the proceedings of ICPMSE-6, the sixth international conference on Protection of Materials and Structures from Space Environment, held in Toronto May 1-3, 2002. The ICPMSE series of meetings became an important part of the LEO space community since it was started in 1991. Since then, the meeting has grown steadily, attracting a large number of engineers, researchers, managers, and scientists from industrial companies, scientific institutions and government agencies in Canada, U. S. A. , Asia, and Europe, thus becoming a true international event. This year's meeting is gaining even stronger importance with the resumption of the ISS and other space projects in LEO, GEO and Deep Space. To reflect on these activities, the topics in the program have been extended to include protection of materials in GEO and Deep Space. The combination of a broad selection of technical and scientific topics addressed by internationally known speakers with the charm of Toronto and the hospitality of the organizers brings participants back year after year. The conference was hosted and organized by Integrity Testing Laboratory Inc. (ITL), and held at the University of Toronto's Institute for Aerospace Studies (UTIAS). The meeting was sponsored by the Materials and Manufacturing

Ontario (MMO) and the CRES Tech, two Ontario Centres of Excellence; Air Force Office of Scientific Research (AFOSR/NL); MD Robotics; EMS Technologies; The Integrity Testing Laboratory (ITL); and the UTIAS.

Maximum Wireless Security Cyrus Peikari, Seth Fogie, 2003 0672324881.1d A detailed guide to wireless vulnerabilities, written by authors who have first-hand experience with wireless crackers and their techniques. Wireless

technology and Internet security are the two fastest growing technology sectors. Includes a bonus CD packed with powerful free and demo tools to audit wireless networks. Reviewed and endorsed by the author of WEPCrack, a well-known tool for breaking 802.11 WEP encryption keys. Maximum Wireless Security is a practical handbook that reveals the techniques and tools crackers use to break into wireless networks, and that details the steps network administrators need to take to secure their systems. The authors provide information to satisfy the experts' hunger for in-depth information with actual source code, real-world case studies, and step-by-step configuration recipes. The book includes detailed, hands-on information that is currently unavailable in any printed text -- information that has been gleaned from the authors' work with real wireless hackers (war drivers), wireless security developers, and leading security experts. Cyrus Peikari is the chief technical officer for VirusMD Corporation and has several patents pending in the anti-virus field. He has published several consumer security software programs, including an encrypted instant messenger, a personal firewall, a content filter and a suite of network connectivity tools.
