Acoustic Absorbers and Diffusers Trevor J. Cox,Peter D'Antonio,2009-01-26 Absorbers and diffusers are two of the main design tools for altering the acoustic conditions of rooms, semi-enclosed spaces and the outdoor environment. Their correct use is important for delivering high quality acoustics. Unique and authoritative, this book describes how to effectively measure, model, design and apply diffusers and absorbers. It is a resource for new and experienced acousticians, seeking an understanding of the evolution, characteristics and application of modern diffusers. Absorption is a more established technology and so the book blends traditional designs with modern developments. The book covers practical and theoretical aspects of absorbers and diffusers and is well illustrated with examples of installations and case studies. This new edition brings Acoustic Absorbers and Diffusers up-to-date with current research, practice and standards. New developments in measurement, materials, theory and practice since the first edition (published in 2004) are included. The sections on absorbers are extended to include more about noise control.

When Scotland Was Jewish Elizabeth Caldwell Hirschman,Donald N. Yates,2015-05-07 The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

The Land Beyond the Forest Emily Gerard,1888
The Strange Story Book Mrs. Andrew Lang,2024-02-03 Now as this is the very last book of all this series that began in the long long ago, perhaps you may like to hear something of the man who thought over every one of the twenty-five, for fear lest a story should creep in which he did not wish his little boys and girls to read. He was born when nobody thought of travelling in anything but a train—a very slow one—or a steamer. It took a great deal of persuasion to induce him later to get into a motor and he had not the slightest desire to go up in an aeroplane—or to possess a telephone. Somebody once told him of a little boy who, after giving a thrilling account at luncheon of how Randolph had taken Edinburgh Castle, had expressed a desire to go out and see the Museum; 'I like old things better than new,' said the child! 'I wish I knew that little boy,' observed the man. 'He would just suit me.' And that was true, for he too loved great deeds of battle and adventure as well as the curious carved and painted fragments guarded in museums which show that the lives described by Homer and the other old poets were not tales made up by them to amuse tired crowds gathered round a hall fire, but were real—real as our lives now, and much more beautiful and splendid. All beasts were his friends, just because they were beasts, unless they had been very badly brought up. He never could resist a cat, and cats, like beggars, tell each other these things and profit by them. A cat knew quite well that it had only to go on sitting for a few days outside the window where the man was writing, and that if it began to snow or even to rain, the window would be pushed up and the cat would spend the rest of its days stretched in front of the fire, with a saucer of milk beside it, and fish for every meal. But life with cats was not all peace, and once a terrible thing hap-pened when Dickon-draw-the-blade was the Puss in Possession. His master was passing through London on the way to take a journey to some beautiful old walled towns in the south of France where the English fought in the Hundred Years War, and he meant to spend a few weeks in the country along the Loire which is bound up with the memory of Joan of Arc. Unluckily, the night after he arrived from Scotland Dickon went out for a walk on the high trellis behind the house, and once there did not know how to get down again. Of course it was quite easy, and there were ropes of Virginia creeper to help, but Dickon lost his presence of mind, and instead of doing anything sensible only stood and shrieked, while his master got ladders and steps and clambered about in the dark and in the cold, till he put Dickon on the ground again. Then Dickon's master went to bed, but woke up so ill that he was obliged to do without the old towns, and go when he was better to a horrid place called Cannes, all dust and tea-parties.
