### Linux Observability with BPF David

Calavera, Lorenzo Fontana, 2019-11-14 Build your expertise in the BPF virtual machine in the Linux kernel with this practical guide for systems engineers. You'll not only dive into the BPF program lifecycle but also learn to write applications that observe and modify the kernel's behavior; inject code to monitor, trace, and securely observe events in the kernel; and more. Authors David Calavera and Lorenzo Fontana help

you harness the power of BPF to make any computing system more observable. Familiarize yourself with the essential concepts you'll use on a day-to-day basis and augment your knowledge about performance optimization, networking, and security. Then see how it all comes together with code examples in C, Go, and Python. Write applications that use BPF to observe and modify the Linux kernel's behavior on demand Inject code to monitor, trace, and observe events in the kernel in a secure way—no need to recompile the kernel or reboot the system Explore code examples in C, Go, and Python Gain a more thorough understanding of the BPF program lifecycle

**One Acre and Security** Bradford Angier,2017-09-15 A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living—now—and income too? One Acre and Security explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising

bees for honey, keeping dairy herbs of cows or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature's free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. "This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best," says Bradford Angier in *One Acre and Security*...
