*Addressing Unhealthy Alcohol Use in Primary Care* Richard Saitz, 2012-12-22 While there is a wealth of published information on addiction medicine, the psychological aspects of alcohol abuse, and behavioral medicine with regard to addiction, virtually none of these resources were written with the primary care provider in mind. *Addressing Unhealthy Alcohol Use in Primary Care* is a resource for primary care clinicians who are confronted by patients with these problems daily, and who wish to successfully address these issues in their practice. It would focus on the literature and science relevant to primary care practice and cover the range of interventions appropriate for this setting. Topics include assessment, brief counseling interventions, pharmacotherapy, referrals to both specialty care and Alcoholics Anonymous (and other self-help programs), psychiatric co-morbidity and other drug use, and other information specific to the needs of the primary care provider.

100% Renewable Energy Transition Claudia Kemfert, Christian Breyer, Pao-Yu Oei, 2020-01-23 Energy markets are already undergoing considerable transitions to accommodate new (renewable) energy forms, new (decentral) energy players, and new system requirements, e.g. flexibility and resilience. Traditional energy markets for fossil fuels are therefore under pressure, while not-yet-mature (renewable) energy markets are emerging. As a consequence, investments in large-scale and capital intensive (traditional) energy production projects are surrounded by high uncertainty, and are difficult to hedge by private entities. Traditional energy production companies are transforming into energy service suppliers and companies aggregating numerous potential market players are emerging, while regulation and system management are playing an increasing role. To address these increasing uncertainties and complexities, economic analysis, forecasting, modeling and investment assessment require fresh approaches and views.

Novel research is thus required to simulate multiple actor interplays and idiosyncratic behavior. The required approaches cannot deal only with energy supply, but need to include active demand and cover systemic aspects. Energy market transitions challenge policy-making. Market coordination failure, the removal of barriers hindering restructuring and the combination of market signals with command-and-control policy measures are some of the new aims of policies. The aim of this Special Issue is to collect research papers that address the above issues using novel methods from any adequate perspective, including economic analysis, modeling of systems, behavioral forecasting, and policy assessment. The issue will include, but is not be limited to: Local control schemes and algorithms for distributed generation systems Centralized and decentralized sustainable energy management strategies Communication architectures, protocols and properties of practical applications Topologies of distributed generation systems improving flexibility, efficiency and power quality Practical issues in the control design and implementation of distributed generation systems Energy transition studies for optimized pathway options aiming for high levels of sustainability

**Assessing Medical Technologies** Institute of Medicine, Division of Health Promotion and Disease Prevention, Division of Health Sciences Policy, Committee for Evaluating Medical Technologies in Clinical Use, 1985-02-01 New drugs, new devices, improved surgical techniques, and innovative diagnostic procedures and equipment emerge rapidly. But development of these technologies has outpaced evaluation of their safety, efficacy, cost-effectiveness, and ethical and social consequences. This volume, which is strongly recommended by The New England Journal of Medicine to all those interested in the future of the practice of medicine, examines how new discoveries can be translated into better care, and how the current system's inefficiencies prevent effective health care delivery. In addition, the book offers detailed profiles of 20

organizations currently involved in medical technology assessment, and proposes ways to organize U.S. efforts and create a coordinated national system for evaluating new medical treatments and technology.

Digital Economies at Global Margins Mark

Graham, 2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici, Hernan Galperin, Catrìhel Greppi, Anita Gurumurthy, Isis Hjorth, Lilly Irani, Molly Jackman, Calestous Juma, Dorothea Kleine, Madlen Krone, Vili Lehdonvirta, Chris Locke, Silvia Masiero, Hannah McCarrick, Deepak K.

**Isoscapes** Jason B. West, Gabriel J. Bowen, Todd E.

Dawson, Kevin P. Tu, 2009-11-25 Stable isotope ratio variation in natural systems reflects the dynamics of Earth systems processes and imparts isotope labels to Earth materials. Carbon isotope ratios of atmospheric CO<sub>2</sub> record exchange of carbon between the biosphere and the atmosphere; the incredible journeys of migrating monarchs is documented by hydrogen isotopes in their wings; and water carries an isotopic record of its source and history as it traverses the atmosphere and land surface. Through these and many other examples, improved understanding of spatio-temporal isotopic variation in Earth systems is leading to innovative new approaches to scientific problem-solving. This volume provides a comprehensive overview of the theory, methods, and applications that are enabling new disciplinary and cross-disciplinary advances through the study of isoscapes: isotopic landscapes. This impressive new volume shows scientists deciphering and using the natural isotope landscapes that subtly adorn our spaceship Earth., Brian Fry, Coastal Ecology Institute, Louisiana State University, USA An excellent timely must read and must-have reference book for anybody interested or engaged in applying stable isotope signatures to questions in e.g. Anthropology, Biogeochemistry, Ecology, or Forensic Science regarding chronological and spatial movement, changes, or distribution relating to animals, humans, plants, or water., Wolfram Meier-Augenstein, Centre for Anatomy & Human Identification, University of Dundee, UK Natural resources are being affected by global change, but exactly where, how, and at what pace? Isoscapes provide new and remarkably precise answers., John Hayes, Woods Hole Oceanographic Institution, USA This exciting volume is shaping a new landscape in environmental sciences that is utilizing the remarkable advances

in isotope research to enhance and extend the capabilities of the field., Dan Yakir, Weizmann Institute of Science, Israel

*Treatment of the Obese Patient* Robert F. Kushner, Daniel H. Bessesen, 2007-10-18 The aim of this book is to inform clinicians of recent advances in obesity research and provide a review of current treatment issues and strategies. Part 1 covers new discoveries in the physiological control of body weight, as well as the pathophysiology of obesity. Part 2 covers a range of issues that are central to the clinical management of obese patients. This illustrated volume will stimulate and engage clinicians.

**Animals and their Relation to Gods, Humans and Things in the Ancient World** Raija Mattila, Sanae Ito, Sebastian Fink, 2019-03-11 While Human-Animal Studies is a rapidly growing field in modern history, studies on this topic that focus on the Ancient World are few. The present volume aims at closing this gap. It investigates the relation between humans, animals, gods, and things with a special focus on the structure of these categories. An improved understanding of the ancient categories themselves is a precondition for any investigation into the relation between them. The focus of the volume lies on the Ancient Near East, but it also provides studies on Ancient Greece, Asia Minor, Mesoamerica, the Far East, and Arabia.

Fungal Diseases Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2011-10-08 Fungal diseases have contributed to death and disability in humans, triggered global wildlife extinctions and population declines, devastated agricultural crops, and altered forest ecosystem dynamics. Despite the extensive influence of fungi on health and economic well-being, the threats posed by emerging fungal pathogens to life on Earth are often underappreciated and poorly understood.

On December 14 and 15, 2010, the IOM's Forum on Microbial Threats hosted a public workshop to explore the scientific and policy dimensions associated with the causes and consequences of emerging fungal diseases.

*Topological Persistence in Geometry and Analysis* Leonid Polterovich, Daniel Rosen, Karina Samvelyan, Jun Zhang, 2020-05-11 The theory of persistence modules originated in topological data analysis and became an active area of research in algebraic topology. This book provides a concise and self-contained introduction to persistence modules and focuses on their interactions with pure mathematics, bringing the reader to the cutting edge of current research. In particular, the authors present applications of persistence to symplectic topology, including the geometry of symplectomorphism groups and embedding problems. Furthermore, they discuss topological function theory, which provides new insight into oscillation of functions. The book is accessible to readers with a basic background in algebraic and differential topology.

*Extrinsic Geometric Flows* Bennett Chow, Christine Guenther, Mat Langford, 2020-05-14 Extrinsic geometric flows are characterized by a submanifold evolving in an ambient space with velocity determined by its extrinsic curvature. The goal of this book is to give an extensive introduction to a few of the most prominent extrinsic flows, namely, the curve shortening flow, the mean curvature flow, the Gauß curvature flow, the inverse-mean curvature flow, and fully nonlinear flows of mean curvature and inverse-mean curvature type. The authors highlight techniques and behaviors that frequently arise in the study of these (and other) flows. To illustrate the broad applicability of the techniques developed, they also consider general classes of fully nonlinear curvature flows. The book is written at the level of a graduate student who has had a basic course in differential geometry and has some familiarity with partial differential equations. It is intended also to be useful as a reference for specialists. In

general, the authors provide detailed proofs, although for some more specialized results they may only present the main ideas; in such cases, they provide references for complete proofs. A brief survey of additional topics, with extensive references, can be found in the notes and commentary at the end of each chapter.

*The Shape of a Life* Shing-Tung Yau, Steve Nadis, 2019-02-19 A Fields medalist recounts his lifelong effort to uncover the geometric shape—the Calabi-Yau manifold—that may store the hidden dimensions of our universe. Harvard geometer Shing-Tung Yau has provided a mathematical foundation for string theory, offered new insights into black holes, and mathematically demonstrated the stability of our universe. In this autobiography, Yau reflects on his improbable journey to becoming one of the world's most distinguished mathematicians. Beginning with an impoverished childhood in China and Hong Kong, Yau takes readers through his doctoral studies at Berkeley during the height of the Vietnam War protests, his Fields Medal-winning proof of the Calabi conjecture, his return to China, and his pioneering work in geometric analysis. This new branch of geometry, which Yau built up with his friends and colleagues, has paved the way for solutions to several important and previously intransigent problems. With complicated ideas explained for a broad audience, this book offers not only insights into the life of an eminent mathematician, but also an accessible way to understand advanced and highly abstract concepts in mathematics and theoretical physics. "The remarkable story of one of the world's most accomplished mathematicians . . . Yau's personal journey—from escaping China as a youngster, leading a gang outside Hong Kong, becoming captivated by mathematics, to

making breakthroughs that thrust him on the world stage—inspires us all with humankind’s irrepressible spirit of discovery.” —Brian Greene, New York Times–bestselling author of *The Elegant Universe* “An unexpectedly intimate look into a highly accomplished man, his colleagues and friends, the development of a new field of geometric analysis, and a glimpse into a truly uncommon mind.” —The Boston Globe “Engaging, eminently readable. . . . For those with a taste for elegant and largely jargon-free explanations of mathematics, *The Shape of a Life* promises hours of rewarding reading.” —American Scientist

*Hawthorne in Concord* Philip McFarland, 2007-12-01 A richly textured account of the writer’s three sojourns in New England

“illuminates Hawthorne’s art and the intellectual ferment originating in that small, bucolic town” (Publishers Weekly). On his wedding day in 1842, Nathaniel Hawthorne escorted his new wife, Sophia, to their first home, the Old Manse in Concord, Massachusetts. There, enriched by friendships with Thoreau and Emerson, he enjoyed an idyllic time. But three years later, unable to make enough money from his writing, he returned ingloriously, with his wife and infant daughter, to live in his mother’s home in Salem. In 1853, Hawthorne moved back to Concord, now the renowned author of *The Scarlet Letter* and *The House of the Seven Gables*. Eager to resume writing fiction at the scene of his earlier happiness, he assembled a biography of his college friend Franklin Pierce, who was running for president. When Pierce won the election, Hawthorne was appointed the lucrative post of consul in Liverpool. Coming home from Europe in 1860, Hawthorne settled down in Concord once more. He tried to take up writing one last time, but deteriorating health found him withdrawing into private life. In Hawthorne in Concord, acclaimed historian Philip McFarland paints a revealing portrait of this well-loved American author during three distinct periods of his life, spent in the bucolic village of Concord, Massachusetts. “I don’t know when I have read a book as satisfying as Hawthorne in Concord.” —David Herbert Donald

and other disorders, and is authored by prominent clinicians with years of experience in providing integrated, individualized treatments. With its thorough exploration of psychopharmacological treatments, psychosocial treatments, and, crucially, the integration of the two, *Anxiety Disorders* is a text no 21st-century clinician or student can afford to be without.
