Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Thermodynamics for the Practicing Engineer Louis Theodore,Francesco Ricci,Timothy Vanvliet,2011-11-30 Enables you to easily advance from thermodynamics principles to applications Thermodynamics for the Practicing Engineer, as the title suggests, is written for all practicing engineers and anyone studying to become one. Its focus therefore is on applications of thermodynamics, addressing both technical and pragmatic problems in the field. Readers are provided a solid base in thermodynamics theory; however,

the text is mostly dedicated to demonstrating how theory is applied to solve real-world problems. This text's four parts enable readers to easily gain a foundation in basic principles and then learn how to apply them in practice: Part One: Introduction. Sets forth the basic principles of thermodynamics, reviewing such topics as units and dimensions, conservation laws, gas laws, and the second law of thermodynamics. Part Two: Enthalpy Effects. Examines sensible, latent, chemical reaction, and mixing enthalpy effects. Part Three: Equilibrium Thermodynamics. Addresses both principles and calculations for phase, vapor-liquid, and chemical reaction equilibrium. Part Four: Other Topics. Reviews such important issues as economics, numerical methods, open-ended problems, environmental concerns, health and safety management, ethics, and exergy. Throughout the text, detailed illustrative examples demonstrate how all the principles, procedures, and equations are put into practice. Additional practice problems enable readers to solve real-world problems similar to the ones that they will encounter on the job. Readers will gain a solid working knowledge of thermodynamics principles and applications upon successful completion of this text. Moreover, they will be better prepared when approaching/addressing advanced material and more complex problems.

Mister, You Got Yourself a Horse Roger L. Welsch,1987-02-01 Plains folklorist Roger L. Welsch has edited a lively collection of stories by some master yarnspinners—those old-time traveling horse traders. Told to Federal Writers' Project fieldworkers in the 1930s, these stories cover the span of horse trading: human and equine trickery, orneriness, debility—and generosity.

Advances in Computer, Information, and Systems Sciences, and Engineering Khaled Elleithy,Tarek Sobh,Ausif Mahmood,Magued Iskander,Mohammad A. Karim,2007-06-06 The conference proceedings of: International Conference on Industrial Electronics, Technology & Automation (IETA 05) International Conference on Telecommunications and Networking (TeNe 05) International Conference on Engineering Education, Instructional Technology, Assessment, and E-learning (EIAE 05) include a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of: Industrial Electronics, Technology and Automation, Telecommunications, Networking, Engineering Education, Instructional Technology and e-Learning. The three conferences, (IETA 05, TENE 05 and EIAE 05) were part of the International Joint Conference on Computer, Information, and System Sciences, and Engineering (CISSE 2005). CISSE 2005, the World's first Engineering/Computing and Systems Research E-Conference was the first high-caliber Research Conference in the world to be completely conducted online in real-time via the internet. CISSE received 255 research paper submissions and the final program included 140 accepted papers, from more than 45 countries. The whole concept and format of CISSE 2005 was very exciting and ground-breaking. The powerpoint presentations, final

paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants, so they could pick and choose the presentations they want to attend and think about questions that they might want to ask. The live audio presentations were also recorded and are part of the permanent CISSE archive, which includes all power point presentations, papers and recorded presentations. All aspects of the conference were managed on-line; not only the reviewing, submissions and registration processes; but also the actual conference. Conference participants - authors, presenters and attendees - only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. The on-line structure of this high-quality event allowed academic professionals and industry participants to contribute work and attend world-class technical presentations based on rigorously refereed submissions, live, without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 50 countries, for whose researchers, this opportunity presented a much more affordable, dynamic and well-planned event to attend and submit their work to, versus a classic, on-the-ground conference. The CISSE conference audio room provided superb audio even over low speed internet connections, the ability to display PowerPoint presentations, and cross-platform compatibility (the conferencing software runs on Windows, Mac, and any other operating system that supports Java). In addition, the conferencing system allowed for an unlimited number of participants, which in turn granted CISSE the opportunity to allow all participants to attend all presentations, as opposed to limiting the number of available seats for each session. The implemented conferencing technology, starting with the submission & review system and ending with the online conferencing capability, allowed CISSE to conduct a very high quality, fulfilling event for all participants. Pedagogy and Student Services for Institutional Transformation Jeanne L. Higbee,Emily Goff,2008 PASS IT seeks to address a compelling need in higher education by developing a corps of trainers to facilitate professional development workshops in the implementation of Universal Design (UD) and Universal Instructional Design (UID) in higher education. UID, an adaptation of the architectural concept of Universal Design, is a relatively new model for providing access to higher education for students with disabilities. Through UD and UID, staff and faculty create more welcoming spaces for all students by rethinking professional practices to develop curricula and programs that are inclusive for all learners. This book is organized into six sections, each dealing with a different aspect of the implementation of UD and UID in higher education. The first section (Theoretical Frameworks) presents theoretical frameworks that explores the historical roots of attitudes toward disability and provides the theoretical foundations for UID and then illustrates intersections between UID and student development theory. The second, pedagogical section (Implementing Universal Instructional Design in the Classroom), of the book examines the inclusiveness of first-year courses through Universal Instructional Design and discusses the value of going beyond the usual syllabus statement to communicate to students about the importance of providing equal access to classrooms and the impact that such communication can have on teaching and on all students' learning. Examples are given to demonstrate the relevance of UID principles to courses in art, legal studies, student writing, social sciences, and mathematics. The use of a computer-assisted model known as the Personalized System of Instruction (PSI) to teach a universally-designed psychology course is also explored in this section. The section closes with an examination of the role that learning communities play in implementing UD and UID. The third section (Implementing Universal Design in Academic Support and Student Development Programs and Services) explores the implementation of UD and UID in academic support and student

development programs and services. The fourth section (Professional Preparation) addresses the application of UD and UID to professional preparation programs in higher education. The fifth section (Student Perspectives) is dedicated to student perspectives on the use of Universal Instructional Design. This section presents a discussion of the complicated process of disclosure for students with documented disabilities, as well as the results of the Multicultural Awareness Project for Institutional Transformation (MAP IT) that are specific to students with disabilities. A case study is described that demonstrates how developing accommodations for a student with multiple disabilities benefit the entire class. Finally, the sixth section (Administrative and Practical Considerations in Implementing Universal Instructional Design in Higher Education) addresses administrative and practical considerations in implementing UD in higher education. The book concludes with an expanded set of guidelines for extending UID as a model for multicultural postsecondary education. The book contains 38 articles, as follows: (1) Introduction (Emily Goff and Jeanne L. Higbee); (2) Theoretical Foundations of Universal Instructional Design (Nancy J. Evans); (3) Broadening the Pathway to Academic Success: The Critical Intersections of Social Justice Education, Critical Multicultural Education and Universal Instructional Design (Heather W. Delivering Superior Health and Wellness Management with IoT and Analytics Nilmini Wickramasinghe,Freimut Bodendorf,2019-11-27 This in-depth book addresses a key void in the literature surrounding the Internet of Things (IoT) and health. By systematically evaluating the benefits of mobile, wireless, and sensor-based IoT technologies when used in health and wellness contexts, the book sheds light on the next frontier for healthcare delivery. These technologies generate data with significant potential to enable superior care delivery, self-empowerment, and wellness management. Collecting valuable insights and recommendations in one accessible volume, chapter authors identify key areas in health and wellness where IoT can be used, highlighting the benefits, barriers, and facilitators of these technologies as well as suggesting areas for improvement in current policy and regulations. Four overarching themes provide a suitable setting to examine the critical insights presented in the 31 chapters: Mobile- and sensor-based solutions Opportunities to incorporate critical aspects of analytics to provide superior insights and thus support better decision-

making Critical issues around aspects of IoT in healthcare contexts Applications of portals in healthcare contexts A comprehensive overview that introduces the critical issues regarding the role of IoT technologies for health, Delivering Superior Health and Wellness Management with IoT and Analytics paves the way for scholars, practitioners, students, and other stakeholders to understand how to substantially improve health and wellness management on a global scale.

Anticipatory Policymaking Rob A. DeLeo,2015-09-16 Public policy analysts and political pundits alike tend to describe the policymaking process as a reactive sequence in which government develops solutions for clearly evident and identifiable problems. While this depiction holds true in many cases, it fails to account for instances in which public policy is enacted in anticipation of a potential future problem. Whereas traditional policy concerns manifest themselves through ongoing harms, anticipatory problems are projected to occur sometime in the future, and it is the prospect of their potentially catastrophic impact that generates intense speculation and concern in the present. Anticipatory Policymaking: When Government Acts to Prevent Problems and Why It Is So Difficult provides an in depth examination of the complex process through which United States government institutions anticipate emerging threats. Using contemporary debates over the risks associated with nanotechnology, pandemic influenza, and global warming as case study material, Rob A. DeLeo highlights the distinctive features of proactive governance. By challenging the pervasive assumption of reactive policymaking, DeLeo provides a dynamic approach for conceptualizing the political dimensions of anticipatory policy change.

Guide to Reliable Internet Services and Applications Charles R. Kalmanek,Sudip Misra,Yang (Richard) Yang,2010-06-09 An oft-repeated adage among telecommunication providers goes, "There are ve things that matter: reliability, reliability, reliability, time to market, and cost. If you can't do all ve, at least do the rst three. " Yet, designing and operating reliable networks and services is a Herculean task. Building truly reliable components is unacceptably expensive, forcing us to c- struct reliable systems out of unreliable components. The resulting systems are inherently complex, consisting of many different kinds of components running a variety of different protocols that interact in subtle ways. Inter-networkssuch as the Internet span multiple regions of administrative control, from campus and cor- rate networks to Internet Service Providers, making good end-to-end performance a shared responsibility borne by sometimes uncooperative parties. Moreover, these networks consist not only of routers, but also lower-layer devices such as optical switches and higher-layer components such as rewalls and proxies. And, these components are highly con gurable, leaving ample room for operator error and buggy software. As if that were not dif cult enough, end users understandably care about the performance of their higher-level applications, which has a complicated relationship with the behavior of the underlying network. Despite these challenges, researchers and practitioners alike have made trem- dous strides in improving the reliability of modern networks and services.

Evaluating Environment in International Development Juha I. Uitto,2014-04-24 More than twenty years after the Earth Summit was held in Rio de Janeiro in 1992, both national and international actors in governmental and nongovernmental fields are still searching for insights into how sustainable development can be advanced and environmental concerns incorporated into the development agenda more effectively. Moreover, climate change has emerged as a preeminent challenge to both the environment and to development. Evaluating Environment in International Development provides international perspectives and in-depth knowledge of evaluating development and the environment and applies evaluation knowledge to climate change mitigation and adaptation. The book focuses on the approaches and experiences of leading international organizations, not-for-profits, and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision-makers. It provides novel and in-depth perspectives on evaluating environment and sustainability issues in developing countries. Moving beyond projects and programmes, it considers aspects such as evaluating normative work on the environment and evaluating environmental consequences of economic and social development efforts. This original collection should be of interest to scholars of environment studies, development studies, international relations, sustainable development and evaluation, as well as practitioners in international organizations and development and environmental NGOs.
