Comparative Media History Jane Chapman, 2005-07-11

Comparative Media History is a unique thematic textbook which introduces students to the key ideas underpinning media development. It is an essential first step to a better understanding of both the media industry today and the way in which it evolved over time. The textbook compares developments and influences from a broad perspective, highlighting and contrasting different countries, industries and periods of history in order to encourage an understanding of cause and effect. In a style which is clear, accessible and provocative, Jane Chapman argues that most of the roots of today's media - even the globalizing impulse - lie in the late 18th and 19th centuries. The book emphasises continuity and certain decisive factors such as the social use of technology, the character of the institutions in which it is applied and the political approach of the specific countries involved. The comparative element to this book, both across countries and industries, will enable students to reflect on key issues in media studies, including those of diversity, form, method and choice, both past and present.

It will become an essential text for any student of the media and its history. For more information about the book and the author, please see www.janechapman.co.uk

American Juries Neil Vidmar, Valerie P. Hans, 2009-09-25 This monumental and comprehensive volume reviews more than 50 years of empirical research on civil and criminal juries and returns a verdict that strongly supports the jury system.

Frontiers of Creative Industries Candace Jones, Massimo Maoret, 2018-04-03 Creative industries are a growing and globally important area for both economic vitality and cultural expression of industrialized nations. This volume examines their institutional, categorical and structural dynamics to provide an overview of new trends and emerging issues in scholarship on this topic.

A Tale of Two Cultures Mark Walia, 2012-09-09 Mark Walia's *A Tale of Two Cultures: Islam and the West* lays out the contrasts between the Western and Islamic worlds with remarkable clarity and documentation, and concludes there are nearly irreconcilable differences between these worlds. keywords: Islam, Muslim, Religion, Christianity, War, Culture, Travel, Sharia, Hate, Mohammed

The Journey of Becoming a Mother Among Women in Northern

Thailand Pranee Liamputtong,2007 The Journey of Becoming a Mother Among Women in Northern Thailand is the first book-length study of childbearing and motherhood in Thailand. Informed by both anthropology and women's studies, Pranee Liamputtong draws sharp distinctions between the practices of the East and those of the West. Covering virtually every aspect of childbirth and upbringing, this book also examines how women try to adapt to changes - social, economical, and political - that affect their motherhood and reproduction.This very personal and accessible book is an excellent intercultural study of women and health, useful to undergraduate as well as graduate students of Women's Studies, Public Health, and Anthropology.

Climate Change, Conflict and (In)Security Timothy Clack,Ziya Meral,Louise Selisny,2023-12-01 This book offers a multidisciplinary exploration of how climate change is impacting conflicts, contention, and competition in the world. The volume examines how climate change is creating and exacerbating insecurities for millions of people globally, and how states, inter-governmental bodies, and others are attempting to meet challenges today and in the near and medium term. It shows that climate change insecurity is relevant to a battery of security areas,

including warfighting, stabilisation, human security, influence, and resilience and capacity building. The volume provides insights into how climate change has and will impact security at different scales and in different localities, including national and ethnic tensions, food and water security, resource competition, mass displacement, and even the recruitment profiles and operations of violent and extremist organisations. With contributions from pioneering researchers and practitioners, the book discusses shifting operational requirements and responsibilities, and the need for clarity around the size and shape of capacity gaps. In addition to practitioners and policy-makers working in these areas, the book will be of significant interest to researchers and students of defence studies, peace and conflict studies, climate change and environmental security, and International Relations.

Routledge Handbook of the South China Sea Zou

Keyuan, 2021-06-28 The Routledge Handbook of the South China Sea presents a comprehensive and in-depth analysis of South China Sea issues. It evaluates the dynamics of the latest developments and identifies factors that contribute to dispute settlement and a cooperative management regime of one of the most important seas in the world – one which not only contains rich

marine resources and distinctive biodiversity but is also a critical sea route for global trade and communications. The Handbook is divided into six parts, each representing a focused area of enquiry:

- History and geostrategic landscape
- Sovereignty and maritime entitlements
- South China Sea policies of major claimants
- Natural resources and environment
- Cooperation and institutions
- Challenges and prospects

Written by world-renowned experts and scholars, with specialisms from geography to international law, the volume's 25 chapters contribute interdisciplinary perspectives, reflecting the impact of how South China Sea policies are shaped by national governments and international organizations. As such, the Handbook provides an authoritative reference to South China Sea Studies, useful for students and scholars of international relations, history, maritime and Asian studies.

Handbook of Research on Redesigning the Future of Internet Architectures Boucadair, Mohamed, 2015-05-31 As the volume of global Internet traffic increases, the Internet is beginning to suffer from a broad spectrum of performance-degrading infrastructural limitations that threaten to jeopardize the continued growth of new, innovative services. In answer to this challenge, computer scientists seek to maintain the original design principles of the

Internet while allowing for a more dynamic approach to the manner in which networks are designed and operated. The Handbook of Research on Redesigning the Future of Internet Architectures covers some of the hottest topics currently being debated by the Internet community at large, including Internet governance, privacy issues, service delivery automation, advanced networking schemes, and new approaches to Internet traffic-forwarding and path-computation mechanics. Targeting students, network-engineers, and technical strategists, this book seeks to provide a broad and comprehensive look at the next wave of revolutionary ideas poised to reshape the very foundation of the Internet as we know it.

Modern Machine Learning Techniques and Their Applications in Cartoon Animation Research Jun Yu, Dacheng Tao, 2013-03-18

The integration of machine learning techniques and cartoon animation research is fast becoming a hot topic. This book helps readers learn the latest machine learning techniques, including patch alignment framework; spectral clustering, graph cuts, and

convex relaxation; ensemble manifold learning; multiple kernel learning; multiview subspace learning; and multiview distance metric learning. It then presents the applications of these modern machine learning techniques in cartoon animation research. With these techniques, users can efficiently utilize the cartoon materials to generate animations in areas such as virtual reality, video games, animation films, and sport simulations

Social Movements and World-System Transformation Jackie

Smith, MICHAEL GOODHART, Patrick Manning, John

Markoff, 2016-10-26 At a particularly urgent world-historical moment, this volume brings together some of the leading researchers of social movements and global social change and other emerging scholars and practitioners to advance new thinking about social movements and global transformation. Social movements around the world today are responding to crisis by defying both political and epistemological borders, offering alternatives to the global capitalist order that are imperceptible through the modernist lens. Informed by a world-historical perspective, contributors explain today's struggles as building upon the experiences of the past while also coming together globally in ways that are inspiring innovation and consolidating new thinking

about what a fundamentally different, more equitable, just, and sustainable world order might look like. This collection offers new insights into contemporary movements for global justice, challenging readers to appreciate how modernist thinking both colors our own observations and complicates the work of activists seeking to resolve inequities and contradictions that are deeply embedded in Western cultural traditions and institutions. Contributors consider today's movements in the *longue durée*—that is, they ask how Occupy Wall Street, the Arab Spring, and other contemporary struggles for liberation reflect, build upon, or diverge from anti-colonial and other emancipatory struggles of the past. Critical to this volume is its exploration of how divisions over gender equity and diversity of national cultures and class have impacted what are increasingly intersectional global movements. The contributions of feminist and indigenous movements come to the fore in this collective exploration of what the movements of yesterday and today can contribute to our ongoing effort to understand the dynamics of global transformation in order to help advance a more equitable, just, and ecologically sustainable world.

The Chosen A. Beker, 2008-05-12 *The Chosen* explores Judaism's key defining concept and inquires why it remains the

central unspoken and explosive psychological, historical, and theological problem at the heart of Jewish-Gentile relations. Crisscrossing the twin cultural and theological divides between Judaism, Christendom, and Islam, *The Chosen* explains how the Jews, of all people, have come to represent at once the epitome of both the good and the odious. Beker covers not only the great stories of how the Jews came to be chosen and the Christian, Muslim, and Nazi efforts to appropriate the title, but also the key role chosenness plays in contemporary anti-Semitism and in the current Middle East conflict over the Land of Israel and the chosen city of Jerusalem.

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services.

Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Facing China as a New Global Superpower Huhua Cao, Jeremy Paltiel, 2015-11-07 This book brings together diverse perspectives from the newest generation of scholars from Canada and China to better understand China in the 21st century. It examines China's socio-political structure, its particular relationship with Canada, and interaction with the international community; and discusses how to overcome the ideological differences between the two countries to establish positive and sustainable Canada-China bilateral relations for the future. Importantly, the perspectives are from young authors, with a different relationship to China (and Canada) than more established authors. This compilation helps breathe new life into the study of Sino-Canada relations from both countries, and to

reassess and re-frame issues related to China in the 21st century.

State of the World's Indigenous Peoples United Nations Department of Economic and Social Affairs, 2011-05-09 While indigenous peoples make up around 370 million of the world's population – some 5 per cent – they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

Ethics and Pandemics Andrew Sola, 2023-06-23 This book is for readers who wish to understand the ethical implications of the COVID-19 pandemic – holistically – on communities, politics, the

economy, the environment, international relations, public health, and, most importantly, on their own lives and their own futures. It also helps readers to think through the wide-ranging ethical implications of the new age of global pandemics. The COVID-19 pandemic has transformed all of our lives to such an extent that no single publication will ever be able to capture its complexity. The book acknowledges this complexity by embracing interdisciplinary dialogue. It is open to diverse points of view, different ethical systems, and a wide variety of academic disciplines. It suggests three broad avenues to exploring the subject: Ethics for Pandemics: What ethical theories are useful for pandemic living? Ethics in Pandemics: How are long-standing ethical dilemmas revealed in pandemics? Ethics of Pandemics: How should politicians and public health professionals create ethical systems of pandemic management? Interdisciplinary perspectives are another key feature of the book and reflect the important insights that many academic disciplines – medical ethics and public health, history, political science, economics, behavioral and evolutionary psychology, and climate science – bring to bear on the subject. In the chapters, the author joins theory and practice, providing an overview of the major ethical theories: Kant and Deontology

Utilitarianism and Consequentialist Ethics Social Contract Theory
Egoism and Altruism Virtue Ethics It then uses these theories to
analyze both COVID-19 and also historical pandemics, including
typhus, smallpox, the Black Death, HIV/AIDS, and polio. Ethics and
Pandemics: Interdisciplinary Perspectives on COVID-19 and Future
Pandemics prepares readers to better understand ethical living
during times of crisis. While written for students pursuing any
discipline, it is particularly suited for those seeking degrees in
public health, health care, political science, and philosophy.
Furthermore, non-specialized readers and members of the general
public will find the book of interest.
