Essentials of Interventional Cancer Pain Management Amitabh Gulati, Vinay Puttanniah, Brian M. Bruel, William S. Rosenberg, Joseph C. Hung, 2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. Essentials of Interventional Cancer Pain Management globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and fellows.

Global Atmospheric Change and its Impact on Regional Air Quality Ian Barnes, 2002-11-30 The NATO ARW in Irkutsk was an excellent occasion for the coming together of Eastern and Western scientists who are involved in tropospheric science; the workshop has greatly contributed to the scientific and social understanding among the participants from the many different countries. Many new personal contacts were made which will help to strengthen future collaborations. In particular, the Lake Baikal area and the Limnological Institute offer splendid opportunities for environmental research which, in part, is already on going. For most participants it was the first time to see the impressive nature of the Lake Baikal region. Hopefully, there will be a chance for a follow-up event in Siberia where researchers from the East and West can again meet and engage in fruitful scientific dialogue. The book contains extended abstracts of the lectures and the poster presentations presented at the NATO ARW Global Atmospheric Change and its Impact on Regional Air Quality Irkutsk, Lake Baikal, Russian Federation, August 21-27, 2001. The ARW was composed of 22 oral presentations by key lecturers and 6 additional shorter oral presentations from participants. In a special poster session the 36 poster contributions were presented and discussed. Unfortunately not all contributors submitted extended abstracts, however, to compensate two contributions have been added from 2 participants who were originally invited but were unable to attend.

Ethical Engineering for International Development and Environmental Sustainability Marion Hersh, 2015-03-20 Ensuring that their work has a positive influence on society is a responsibility and a privilege for engineers, but also a considerable challenge. This book addresses the ways in which engineers meet this challenge, working from the assumption that for a project to be truly ethical both the undertaking itself and its implementation must be ethically sound. The contributors discuss varied topics from an international and interdisciplinary perspective, including 1 robot ethics; 1 outer space; 1 international development; 1 internet privacy and security; 1 green branding; 1 arms conversion; 1 green employment; and 1 deliberate misinformation about climate change. Important questions are answered, such as 1 what is meant by engineering ethics and its practical implications; 1 how decisions made by engineers in their working lives make an impact at the global as well as the local level; and 1 what ethics-related questions should be asked before making such decisions. Ethical Engineering for International Development and Environmental Sustainability will be a valuable resource for practising and student engineers as well as all who are interested in professional ethics, especially as it relates to engineering. Researchers and policy makers concerned with the effects of engineering decisions on environmental sustainability and international stability will find this book to be of special interest.

A Modern Epidemic Professor Louise A Baur, Stephen M Twigg, Roger S Magnusson, 2012-03-21 Obesity and diabetes are not just problems for the individual. They pose risks to the environmental, psychological and economic stability of the entire world. The solutions, therefore, need to be equally wide-ranging and accessible to all. The authors write about the causes and consequences of obesity and diabetes, as well as prevention and treatment.

Irrationality Stuart Sutherland, 2007 Why do qualified professional make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

Advances in Systems, Control and Automation Avinash Konkani, Rabindranath Bera, Samrat Paul, 2017-12-11 This book comprises the select proceedings of the ETAEERE 2016 conference. The book aims to shed light on different systems or machines along with their complex operation, behaviors, and linear-nonlinear relationship in different environments. It covers problems of multivariable control systems and provides the necessary background for performing research in the field of control and automation. Aimed at helping readers understand the classical and modern design of different intelligent automated systems, the book presents coverage on the control of linear and nonlinear systems, intelligent systems, stochastic control, knowledge-based systems applications, fault diagnosis and tolerant control, real-time control applications, etc. The contents of this volume will prove useful to researchers and professionals alike.

Exploring the Last Continent Daniela Liggett, Bryan Storey, Yvonne Cook, Veronika Meduna, 2015-09-29 This multi-disciplinary book will cater to students and those who want to have a more critical look behind the scenes of Antarctic science. This book will take a systems approach to providing insights into Antarctic ecosystems and the geophysical environment. Further, the book will link these insights to a discussion of current issues, such as climate change, bio prospecting, environmental management and Antarctic politics. It will be written and edited by experienced Antarctic researchers and scientists from a wide range of disciplines. Academic references will be included for those who wish to delve deeper into the topics discussed in the book.

Faith-Rooted Organizing Rev. Alexia Salvatierra, Peter Heltzel, 2013-12-06 With so many injustices, small and great, across the world and right at our doorstep, what are people of faith to do? Since the 1930s, organizing movements for social justice in the U.S. have largely been built on assumptions that are secular origin—such as reliance on self-interest and having a common enemy as a motivator for change. But what if Christians were to shape their organizing around the implications of the truth that God is real and Jesus is risen? Alexia Salvatierra has developed a model of social action that is rooted in the values and convictions born of faith. Together with theologian Peter Heltzel, this model of faith-rooted organizing offers a path to meaningful social change that takes seriously the command to love God and to love our neighbor as ourself.

Reflections on Socialism in the Twenty-First Century Claes Brundenius, 2020-02-27 In this volume, the authors reflect on the question “what is socialism” as it pertains to today's economy. There is particular emphasis on democratic socialism models as a potential alternative to classic authoritarian socialism. A number of topical questions are addressed such as: What is democratic socialism and is it feasible, or even viable? What can be learnt from existing democratic socialist experiences? What would an ideal democratic socialist society look like today? Under what circumstances, and where, could such a model emerge today? In exploring these questions, several themes arise within these chapters such as the role of socialist values and inspirations in capitalist societies; and how capitalism and socialism relate to the knowledge economy. The contemporary world is showing many contradictions with uncertain future scenarios that preoccupy mankind. The global capitalist system as we know it

is in deep crisis—and some even predict its slow death, because of its inability to handle the environmental imperative. At the same time, classic socialism as experienced in the Soviet Union and its proxies is a stone dead alternative to capitalism today. So what options remain? The book considers this question as it examines a range of countries where socialism (in one form or another) has arisen, or where democratic socialism could be possible, including Brazil, Chile, Cuba, Sweden and the United States.

Data Mining and Bioinformatics Mehmet M Dalkilic, Sun Kim, Jiong Yang, 2006-11-28 This book constitutes the thoroughly refereed post-proceedings of the First VLDB 2006 International Workshop on Data Mining and Bioinformatics, VDMB 2006, held in Seoul, Korea in September 2006 in conjunction with VLDB 2006. The 15 revised full papers cover various topics in the areas of microarray data analysis, bioinformatics system and text retrieval, application of gene expression data, and sequence analysis.

Innovations in Technologies for Fermented Food and Beverage Industries Sandeep Kumar Panda, Prathap Kumar Halady Shetty, 2018-04-09 This book covers innovations in starter culture, production of health beneficial fermented food products, technological intervention in beer, wine and spirits production, marketing of alcoholic beverages, modernization of dairy plants for production of fermented dairy products, non-dairy probiotics, development of automatic fermenters, and packaging technology. Furthermore, it includes genetic engineering for improved production and quality improvement of food and beverages, which allows forecasting of the quality of the final product. Specifically this includes applications of hybrid methods combining multivariate statistics and computational intelligence, the role of consumers in innovation of novel food and beverages, and IPRS in respect to food and beverages. Innovations in Technologies for Fermented Food and Beverage Industries is a resource for students, researchers, professionals in the industry, as well as governments in their efforts to adopt technologies of their interest.

A New Understanding of Terrorism M.R. Haberfeld, Agostino Hassell, 2009-07-09 Terrorism is a complex phenomenon that cannot be understood through reading of a number of unrelated academic articles or a dry overview of the history of terrorism or the investigative techniques. For A New Understanding of Terrorism, the Editors have chosen a different paradigm. They have selected numerous case studies from actual events that illustrate various typologies of terrorist actions, be it from a separatist, nationalist, lone-wolf individual terrorist, religious fanatics or environmentalist orientation, and they present these cases within the context of following the trajectories of the terrorist activity, the terrorist act itself and, the response to the event from the relevant authorities. Some chapters concentrate on terrorist attacks that actually took place, others speculate about the possibilities of an attack occurring sometime in the future, such as the chapters on the Olympic Games, Aviation or Rail Security. When possibilities rather than a specific event are discussed, the authors of these chapters draw the attention of the reader towards the same direction—the reasoning, the actual event and the response that followed. The thorough analysis of the presented case studies and the applied counter-measures will, hopefully, if not curtail then possibly at least mitigate the operational and ideological strength of terrorist groups or individual actors. A New Understanding of Terrorism will enable the reader to make the connection between the emotional charge inherent in any terrorist activity, the cold-blooded tactics that lead to the terrorist event itself and the pragmatic and very straightforward, but at the same time very simplistically designed, strategic response that has to come from a synergy between academics, military and law enforcement brainstorming design in order to be more effective in the future. ABOUT THE EDITORS: M.R. (Maki) Haberfeld is a Professor of Police Science at John Jay College of Criminal Justice in New York City. She has worked for the U.S. Drug Enforcement Administration, in the New York Field Office, as a special consultant. Prior to that she has served in a counter-terrorist unit in the Israeli Defense Forces and she left the army at the rank of Sergeant. She was also a lieutenant in the Israel National Police. For the past eight years, Dr. Haberfeld has been involved in developing, coordinating and teaching in a special training program for the New York City Police Department, where she teaches courses in police ethics, leadership and counter-terrorism. She was also an Academic Coordinator of the Law Enforcement Executive Police Institute for the State of New York, where she taught modules on counter-terrorism response. Agostino von Hassell is the president of The Repton Group LLC, a New York City based consulting group that deals mostly with national security issues. He has written numerous political and historical articles and is the author of two major military histories, Warriors: The United States Marine Corps and Strike Force: Marine Corps Special Operations. In 2003, he published a pictorial portrait of the United States—In Honor of America. He has taught as an adjunct professor in the graduate program of John Jay College of Criminal Justice in New York, teaching members of the New York City Police Department in subjects such as counter-terrorism and leadership. He is a life member of the United States Marine Corps Combat Correspondents, the National Defense Industry Association, the Association of Former Intelligence Officers and the Authors' Guild.

Digital Methods Richard Rogers, 2013-05-10 A proposal to repurpose Web-native techniques for use in social and cultural scholarly research. In Digital Methods, Richard Rogers proposes a methodological outlook for social and cultural scholarly research on the Web that seeks to move Internet research beyond the study of online culture. It is not a toolkit for Internet research, or operating instructions for a software package; it deals with broader questions. How can we study social media to learn something about society rather than about social media use? Rogers proposes repurposing Web-native techniques for research into cultural change and societal conditions. We can learn to reapply such “methods of the medium” as crawling and crowd sourcing, PageRank and similar algorithms, tag clouds and other visualizations; we can learn how they handle hits, likes, tags, date stamps, and other Web-native objects. By “thinking along” with devices and the objects they handle, digital research methods can follow the evolving methods of the medium. Rogers uses this new methodological outlook to examine such topics as the findings of inquiries into 9/11 search results, the recognition of climate change skeptics by climate-change-related Web sites, and the censorship of the Iranian Web. With Digital Methods, Rogers introduces a new vision and method for Internet research and at the same time applies them to the Web's objects of study, from tiny particles (hyperlinks) to large masses (social media).

Alternative Historiographies of the Digital Humanities Dorothy Kim, Adeline Koh, 2021 Alternative Historiographies of the Digital Humanities examines the process of history in the narrative of the digital humanities and deconstructs its history as a straight line from the beginnings of humanities computing. By discussing alternatives histories of the digital humanities that address queer gaming, feminist game studies praxis, Cold War military-industrial complex computation, the creation of the environmental humanities, monolingual discontent in DH, the hidden history of DH in English studies, radical media praxis, cultural studies and DH, indigenous futurities, Pacific Rim post-colonial DH, the issue of scale and DH, the radical, indigenous, feminist histories of the digital database, and the possibilities for an antifascist DH, this collection hopes to re-set discussions of the DH straight, white origin myths. Thus, this collection hopes to reexamine the silences in such a straight and white masculinist history and how power comes into play to shape this straight, white DH narrative.--Page 4 of cover

Geotechnical Baseline Reports for Construction Randall J. Essex, 2007 This book examines the role of the geotechnical baseline report (GBR) as a means of allocating and managing subsurface risks associated with subsurface construction.

The Apple House John Blankenship, 2018-04-19 Yours can be the first APPLE house on the block! Learn how to save time and money by using your Apple II computer to control your home: the security, lights, temperature, telephone, and much more. With John Blankenship's system of software and hardware, your house can accept verbal commands and respond with its own voice. It does not need human instruction and performs many useful tasks on its own. Once you get used to an intelligent house, you will wonder how you ever got along without one. Even though devices featured

in The Apple House can be purchased, the author shows how you can save money by building some from scratch. He also points out that you can substitute equipment you already own because of the system's modularity. Although written with an Apple II computer in mind, the principles discussed can easily be transferred to other computer systems.

Molecular Profiling Virginia Espina,Lance Liotta,2011-11-12 The next revolution in molecular medicine is the application of molecular profiling to individualized patient therapy. Molecular profiling technology has advanced dramatically, particularly in the field of cancer tissue biomarkers. It is now possible to gather complex genomic and proteomic information from a routine clinical needle biopsy or surgical specimen. In *Molecular Profiling : Methods and Protocols*, expert researchers in the field focus on the entire process from discovery to commercialization, with practical guides that are not limited to experimental methods. Written in the highly successful *Methods in Molecular Biology*™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, as well as essays and guidelines for grants, patents, and commercialization of products related to molecular profiling. Authoritative and practical, *Molecular Profiling: Methods and Protocols* seeks to aid scientists in understanding the latest advancements in genomics, proteomics, imagining, and bioinformatics.
