The Love Surgeon Sarah B. Rodriguez, 2020-07-17 Dr. James Burt believed women's bodies were broken, and only he could fix them. In the 1950s, this Ohio OB-GYN developed what he called "love surgery," a unique procedure he maintained enhanced the sexual responses of a new mother, transforming her into "a horny little house mouse." Burt did so without first getting the consent of his patients. Yet he was allowed to practice for over thirty years, mutilating hundreds of women in the process. It would be easy to dismiss Dr. Burt as a monstrous aberration, a modern-day Dr. Frankenstein. Yet as medical historian Sarah Rodriguez reveals, that's not the whole story. The Love Surgeon asks tough questions about Burt's heinous acts and what they reveal about the failures of the medical establishment: How was he able to perform an untested surgical procedure? Why wasn't he obliged to get informed consent from his patients? And why did it take his peers so long to take action? The Love Surgeon is both a medical horror story and a cautionary tale about the limits of professional self-regulation.

Voice Attractiveness Benjamin Weiss, Jürgen Trouvain, Melissa Barkat-Defradas, John J. Ohala, 2020-10-10 This book addresses various aspects of acoustic-phonetic analysis, including voice quality and fundamental frequency, and the effects of speech fluency and non-native accents, by examining read speech, public speech, and conversations. Voice is a sexually dimorphic trait that can convey important biological and social information about the speaker, and empirical findings suggest that voice characteristics and preferences play an important role in both intra- and intersexual selection, such as competition and mating, and social evaluation. Discussing evaluation criteria like physical attractiveness, pleasantness, likability, and even persuasiveness and charisma, the book bridges the gap between social and biological views on voice attractiveness. It presents conceptual, methodological and empirical work applying methods such as passive listening tests, psychoacoustic rating experiments, and crowd-sourced and interactive scenarios and highlights the diversity not only of the methods used when studying voice attractiveness, but also of the domains investigated, such as politicians' speech, experimental speed dating, speech synthesis, vocal pathology, and voice preferences in human interactions as well as in human-computer and human-robot interactions. By doing so, it identifies widespread and complementary approaches and establishes common ground for further research.

A Brief History of Vice Robert Evans, 2016-08-09 A celebration of the brave, drunken pioneers who built our civilization one seemingly bad decision at a time, A Brief History of Vice explores a side of the past that mainstream history books prefer to hide. History has never been more fun—or more intoxicating. Guns, germs, and steel might have transformed us from hunter-gatherers into modern man, but booze, sex, trash talk, and tripping built our civilization. Cracked editor Robert Evans brings his signature dogged research and lively insight to uncover the many and magnificent ways vice has influenced history, from the prostitute-turned-empress who scored a major victory for women's rights to the beer that helped create—and destroy—South America's first empire. And Evans goes deeper than simply writing about ancient debauchery; he recreates some of history's most enjoyable (and most painful) vices and includes guides so you can follow along at home. You'll learn how to: • Trip like a Greek philosopher. • Rave like your Stone Age ancestors. • Get drunk like a Sumerian. • Smoke a nose pipe like a pre-Columbian Native American. "Mixing science, humor, and grossly irresponsible self-experimentation, Evans paints a vivid picture of how bad habits built the world we know and love."—David Wong, author of John Dies at the End

Competitive Cities in the 21st Century Kyeong Ae Choe, Brian H. Roberts, 2011-10-01 Economic challenges in developing Asian countries have become more complex: urban populations are growing at great cost to the environment, climate change has increased risks of natural disasters, and income gaps within and between developing countries are widening. These factors threaten the sustainable growth and development of urban areas, the drivers of Asia's economy. A strategic approach for inclusive growth is needed. The City Cluster Economic Development approach provides a strategic framework and a set of analytical tools, which governments, businesses, and communities can use to support the inclusive and sustainable development of competitive urban economies in Asia. Said approach was developed and tested by the Asian Development Bank to improve the basis for integrated planning and development of urban regions in Asia and the Pacific. It also elps urban managers and other city stakeholders identify action plans and determine priority investment areas.

**Assigning Responsibility for Children's Health When Parents and Authorities Disagree: Whose Child?** Allan J. Jacobs, 2021-10-25 This book provides a multidisciplinary analysis of the potential conflict between a government's duty to protect children and a parent(s)' right to raise children in a manner they see fit. Using philosophical, bioethical, and legal analysis, the author engages with key scholars in pediatric decision-making and individual and religious rights theory. Going beyond the parent-child dyad, the author is deeply concerned both with the interests of the broader society and with the appropriate limits of government interference in the private sphere. The text offers a balance of individual and population interests, maximizing liberty but safeguarding against harm. Bioethics and law professors will therefore be able to use this text for both a foundational overview as well as specific, subject-level analysis. Clinicians such as pediatricians and gynecologists, as well as policy-makers can use this text to achieve balance between these often competing claims. The book is written by a physician with practical and theoretical knowledge of the subject, and deep sympathy for the parental and family perspectives. As such, the book proposes a new way of evaluating parental and state interventions in children's' healthcare: a refreshing approach and a useful addition to the literature.

**A New Psychology of Men** Ronald F. Levant, William S. Pollack, 2003 Inspired by feminist scholars who revolutionized our understanding of women's gender roles, the contributors to this pioneering book describe how men's proscribed roles are neither biological nor social givens, but rather psychological and social constructions. Questioning the traditional norms of the male role (such as the emphasis on aggression, competition, status, and emotional stoicism), they show how some male problems (such as violence, homophobia, devaluation of women, detached fathering, and neglect of health needs) are unfortunate by-products of the current process by which males are socialized. By synthesizing the latest research, clinical experience, and major theoretical perspectives on men and by figuring in cultural, class, and sexual orientation differences, the authors brilliantly illuminate the many variations of male behavior. This book will be a valuable resource not just for students of gender psychology in any discipline but also for clinicians and researchers who need to account for the relationship between men's behavior and the contradictory and inconsistent gender roles imposed on men. This new understanding of men's psychology is sure to enhance the work of clinical professionals-including psychologists, psychiatrists, social workers, counselors, and psychiatric nurses-in helping men reconstruct a sense of masculinity along healthier and more socially just lines.

**The 80/80 Marriage** Nate Klemp PhD, Kaley Klemp, 2022-02-15 NAMED ONE OF COSMOPOLITAN'S 15 BEST MARRIAGE BOOKS ALL COUPLES SHOULD READ. An accessible, transformative guide for couples seeking greater love, connection, and intimacy in our modern world Nate and Kaley Klemp were both successful in their careers, consulting for high-powered companies around the world. Their work as mindfulness and leadership experts, however, often fell to the wayside when they came home in the evening, only to end up fighting about fairness in their marriage. They believed in a model where each partner contributed equally and fairness ruled, but, in reality, they were finding that balance near impossible to achieve. From this frustration, they developed the idea of the 80/80 marriage, a new model for balancing career, family, and love. The 80/80 Marriage pushes couples beyond the limited idea of fairness toward a new model grounded on radical generosity and shared success, one that calls for each partner to contribute 80 percent to build the strongest possible relationship. Drawing from more than one hundred interviews with couples from all walks of life, stories from business and pop culture, scientific studies, and ancient philosophical insights, husband-and-wife team Nate and Kaley Klemp pinpoint exactly what's not working in modern marriage. Their 80/80 model of marriage provides practical, powerful solutions to transform your relationship and open up space for greater love and connection.

**Preventing HIV Among Young People in Southern and Eastern Africa** Kaymarlin Govender, Nana K Poku, 2020-12-30 This book provides an overview of the current epidemiology of the HIV epidemic among young people in Eastern and Southern Africa (ESA) and examines the efforts to confront and reduce the high level of new HIV infections amongst young people. Taking a multi-dimensional approach to prevention, the contributors discuss the many challenges facing these efforts, in view of the slow progress in curbing the incidence of HIV amongst young people, focusing particularly on the structural and social drivers of HIV. Through an examination of these issues, chapters in this book provide valuable insights on how to mitigate HIV risk among young people and what can be regarded as the catalysts to mounting credible policy and programmatic responses required to achieve epidemic control in the region. The contributors draw on examples from a range of primary and secondary data sources to illustrate promising practices and challenges in HIV prevention, demonstrating links between conceptual approaches to prevention and lessons learnt from implementation projects in the region. Bringing together social scientists and public health experts who are actively engaged in finding effective solutions, the book discusses 'which interventions works', 'why they work', and the limitations and gaps in our knowledge to curb the pandemic amongst young people. As such it is an important read for researchers focusing on HIV/AIDS and public health. Improving Schooling for Language-Minority Children National Research Council and Institute of Medicine, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Developing a Research Agenda on the Education of Limited English Proficient and Bilingual Students, 1997-05-16 How do we effectively teach children from homes in which a language other than English is spoken? In Improving Schooling for Language-Minority Children, a committee of experts focuses on this central question, striving toward the construction of a strong and credible knowledge base to inform the activities of those who educate children as well as those who fund and conduct research. The book reviews a broad range of studies—from basic ones on language, literacy, and learning to others in educational settings. The committee proposes a research agenda that responds to issues of policy and practice yet maintains scientific integrity. This comprehensive volume provides perspective on the history of bilingual education in the United States; summarizes relevant research on development of a second language, literacy, and content knowledge; reviews past evaluation studies; explores what we know about effective schools and classrooms for these children; examines research on the education of teachers of culturally and linguistically diverse students; critically reviews the system for the collection of education statistics as it relates to this student population; and recommends changes in the infrastructure that supports research on these students.

**Hooking Up** Kathleen A. Bogle, 2008 A closer look into the new sexual culture on college campuses It happens every weekend: In a haze of hormones and alcohol, groups of male and female college students meet at a frat party, a bar, or hanging out in a dorm room, and then hook up for an evening of sex first, questions later. As casually as the sexual encounter begins, so it often ends with no strings attached; after all, it was “just a hook up.” While a hook up might mean anything from kissing to oral sex to going all the way, the lack of commitment is paramount. **Hooking Up** is an intimate look at how and why college students get together, what hooking up means to them, and why it has replaced dating on college campuses. In surprisingly frank interviews, students reveal the circumstances that have led to the rise of the booty call and the death of dinner-and-a-movie. Whether it is an expression of postfeminist independence or a form of youthful rebellion, hooking up has become the only game in town on many campuses. In **Hooking Up**, Kathleen A. Bogle argues that college life itself promotes casual relationships among students on campus. The book sheds light on everything from the differences in what young men and women want from a hook up to why freshmen girls are more likely to hook up than their upper-class sisters and the effects this period has on the sexual and romantic relationships of both men and women after college. Importantly, she shows us that the standards for young men and women are not as different as they used to be, as women talk about “friends with benefits” and “one and done” hook ups. Breaking through many misconceptions about casual sex on college campuses, **Hooking Up** is the first book to understand the new sexual culture on its own terms, with vivid real-life stories of young men and women as they navigate the newest sexual revolution.
