**Principles of SAN Design** Josh Judd, 2005-08-30 Storage Area Networks provide highly reliable, high-performance connectivity between hosts and storage devices. This allows storage resource sharing, improving asset utilization, and enabling solutions such as high availability, disaster recovery, information lifecycle management, and utility computing. These solutions provide a high return on investment, resulting in an accelerating SAN adoption rate in all IT markets. This book provides an overview of SAN protocols and technologies, and practical guidance on SAN design, implementation, and management topics. Some future SAN trends and technologies are discussed, but the focus is on designing SANs with current, real-world products such as Fibre Channel switches and routers. Supramolecular Polymers, Second Edition Alberto Ciferri, 2005-04-26 Supramolecular Polymers, Second Edition details assembly processes and structure-function correlation in natural and synthetic self-assembling materials, focusing on developments occurred over the past five years. The book highlights developments in the synthesis of complex structures, chemical design principles, and theoretical models of growth processes resulting in an increasingly accurate prediction of stability, degree of polymerization, and shape of various assemblies. It focuses on the rich variety of properties, functions, and applications of self-assembling supramolecular polymers. Supramolecular Polymers, Second Edition ties together potential applications such as those of nanostructures with dynamic-combinatorial-adaptive self-healing features, opto-electronic devices, supramolecular

amphiphiles, hydrogels, organic/inorganic nanocomposites, molecular biosensors, molecular imprinting, molecular engines, templates for superlattices with prescribed symmetry. Several chapters of the first edition have been updated or rewritten, and an equal number of new chapters have been added. More than 500 drawings, photographs, micrographs, equations, and tables enhance and reinforce essential concepts presented in the book. Authored by an expert in polymer mechanics, biopolymers, liquid crystals, and supramolecular assemblies, *Supramolecular Polymers, Second Edition* emphasizes fundamental principles at the basis of bottom-up nanotechnology, chemical design strategies, and exciting applications for various self-assembling materials for a unified and cutting-edge account of the field.

**Multicore Processors and Systems** Stephen W. Keckler, Kunle Olukotun, H. Peter Hofstee, 2009-08-29 *Multicore Processors and Systems* provides a comprehensive overview of emerging multicore processors and systems. It covers technology trends affecting multicores, multicore architecture innovations, multicore software innovations, and case studies of state-of-the-art commercial multicore systems. A cross-cutting theme of the book is the challenges associated with scaling up multicore systems to hundreds of cores. The book provides an overview of significant developments in the architectures for multicore processors and systems. It includes chapters on fundamental requirements for multicore systems, including processing, memory systems, and interconnect. It also includes several case studies on commercial multicore systems that have recently been developed and deployed across multiple application domains. The architecture chapters focus on innovative multicore execution models as well as infrastructure for multicores, including memory systems and on-chip interconnections. The case studies examine multicore implementations across different application domains, including general purpose, server, media/broadband, network

processing, and signal processing. **Multicore Processors and Systems** is the first book that focuses solely on multicore processors and systems, and in particular on the unique technology implications, architectures, and implementations. The book has contributing authors that are from both the academic and industrial communities.

**The Amazons** Adrienne Mayor, 2016-02-09 The real history of the Amazons in war and love—fierce warrior women dwelling on the fringes of the known world—were the mythic archenemies of the ancient Greeks. Heracles and Achilles displayed their valor in duels with Amazon queens, and the Athenians reveled in their victory over a powerful Amazon army. In historical times, Cyrus of Persia, Alexander the Great, and the Roman general Pompey tangled with Amazons. But just who were these bold barbarian archers on horseback who gloried in fighting, hunting, and sexual freedom? Were Amazons real? In this deeply researched, wide-ranging, and lavishly illustrated book, National Book Award finalist Adrienne Mayor presents the Amazons as they have never been seen before. This is the first comprehensive account of warrior women in myth and history across the ancient world, from the Mediterranean Sea to the Great Wall of China. Mayor tells how amazing new archaeological discoveries of battle-scarred female skeletons buried with their weapons prove that

women warriors were not merely figments of the Greek imagination. Combining classical myth and art, nomad traditions, and scientific archaeology, she reveals intimate, surprising details and original insights about the lives and legends of the women known as Amazons. Provocatively arguing that a timeless search for a balance between the sexes explains the allure of the Amazons, Mayor reminds us that there were as many Amazon love stories as there were war stories. The Greeks were not the only people enchanted by Amazons—Mayor shows that warlike women of nomadic cultures inspired exciting tales in ancient Egypt, Persia, India, Central Asia, and China. Driven by a detective's curiosity, Mayor unearths long-buried evidence and sifts fact from fiction to show how flesh-and-blood women of the Eurasian steppes were mythologized as Amazons, the equals of men. The result is likely to become a classic.

Rabies in Britain N. Pemberton, M. Worboys, 2007-10-17 Rabies was a constant threat in Victorian Britain and gripped popular imagination, not least because its human form, hydrophobia, produced a vile death with the mind and body out of control. This book explores the changing understanding of rabies amongst veterinarians, animal welfare campaigners, state officials, politicians and the public.

*The Passing-on of Knowledge* Max Kreijn, 2010-04-02 Assuming 'God' as in 'God will provide' is the biggest excuse used in the last two thousand years or more, Anthony Ramekin sets about using his extensive contacts in the art-world, which he has been part of for more than twenty five years, to facilitate the rise and rise of a brilliant young photographer, Dorian Grey, his lover. Soon he realizes

that the knowledge he is passing on, comes in equal measurements to the wisdom, love and fast mind of someone so much younger than himself. As Oscar Wilde so famously said: 'I'm not young enough to know everything...' Scandal, sets off a useful precedent for the people's interest in imagery, which somehow strikes a chord deep in their hearts. This is, after all, a love story, set in some of the world's great cities and Grand Hotels. The 'Hotel de l'Europe' in Amsterdam, the 'Cloitre de St.Louis' in Avignon, the 'Grand Hotel Wagner' in Palermo, The 'Hotel des Bains' in Venice. Berlin, London, Cordoba in Southern Spain, Monreale in Sicily and Bangkok all pass by. 'Recognizing fresh talent is not an act of abuse,' Anthony is heard to say at some press-conference, beleaguered by tabloid scribblers, 'but can be gentle and enrich everybody's life.' Soon Dorian is working on his second book of photographs, cataloguing first love between two under-aged boys, with two of Luchino Visconti's most famous films, 'The Leopard' and 'Death in Venice' as background. Again Anthony is facilitating this new love-affair, which takes on an integral part of the story. Soon they realize they have a worldwide best-seller on their hands.

**The conduct of Baroness Uddin** Great Britain: Parliament: House of Lords: Committee for Privileges and Conduct, 2010-10-18 The focus of this report is Baroness Uddin's use of the Members' Reimbursement Scheme from May 2005 onwards, regarding her designation of three successive properties - in Frinton on Sea, Maidstone and Wapping, London - as her main residence. The last of these, designated on 1 January 2010, has been Lady Uddin's family home since 1993. The Sub-committee on Lords' Conduct found that Lady Uddin's interpretation of main residence was unreasonable. The designation of the Frinton and Maidstone properties was a deliberate misrepresentation of her position and the travel claims were made with the intention of substantiating her designation of her main residences. In total, the Sub-committee calculated that she wrongly

claimed £125,349.10 over the period in question. Lady Uddin appealed to the full Committee against the Sub-committee's findings and recommendations. The Committee upholds the finding on the sum wrongly claimed, and recommends that she makes a personal statement of apology to the House and is then suspended from the House for three years or until she has repaid the sum wrongly claimed, whichever is the later.
