**Pulmonary Manifestations of Rheumatic Disease** Paul F. Dellaripa,Aryeh Fischer,Kevin R. Flaherty,2014-05-23 The spectrum of systemic rheumatologic disease (often termed connective tissue disease) is characterized by autoimmune-mediated organ dysfunction, and the lungs are a frequent target. There are numerous pulmonary manifestations associated with connective tissue diseases, and all patients with rheumatologic disease are at risk of developing associated lung disease. Pulmonary Manifestations of Rheumatic Disease covers the comprehensive management of rheumatologic lung disease, which requires a multi-disciplinary approach and is optimized by active engagement by rheumatologists working closely with pulmonologists and other specialists. The book offers a practical reference using a case-based approach for practicing clinicians in the ongoing assessment and understanding of rheumatologic lung disease, and presents the science and pathophysiology underlying rheumatologic lung diseases. The first text of its kind specifically dedicated to describe diverse, commonplace, and challenging aspects of rheumatologic lung diseases, Pulmonary Manifestations of Rheumatic Disease serves as an invaluable tool for the practicing clinician.

**Handbook of Risk and Crisis Communication** Robert L. Heath,H. Dan O'Hair,2020-10-28 The Handbook of Risk and Crisis Communication explores the scope and purpose of risk, and its counterpart, crisis, to facilitate the understanding of these issues from conceptual and strategic perspectives. Recognizing that risk is a central feature of our daily lives, found in relationships, organizations, governments, the environment, and a wide variety of interactions, contributors to this volume explore such questions as What is likely to happen, to whom, and with what consequences? To what extent can science and vigilance prevent or mitigate negative outcomes? and What obligation do some segments of local, national, and global populations have to help other segments manage risks?, shedding light on the issues in the quest for definitive answers. The Handbook offers a broad approach to the study of risk and crisis as joint concerns. Chapters explore the reach of crisis and risk communication, define and examine key constructs, and parse the contexts of these vital areas. As a whole, the volume presents a comprehensive array of studies that highlight the standard principles and theories on both topics, serving as the largest effort to date focused on engaging risk communication discussions in a comprehensive manner. Now available in paperback, the Handbook of Risk and Crisis Communication can be readily used in graduate coursework and individual research programs. With perspectives from psychology, sociology, anthropology, political science, economics, and communication, the Handbook provides vital insights for all disciplines studying risk, and is required reading for scholars and researchers investigating risk and crisis in various contexts.

*Conquering Complexity* Mike Hinchey,Lorcan Coyle,2012-01-03 Software has long been perceived as complex, at least within Software Engineering circles. We have been living in a recognised state of crisis since the first NATO Software Engineering conference in 1968. Time and again we have been proven unable to engineer reliable software as easily/cheaply as we imagined. Cost overruns and expensive failures are the norm. The problem is fundamentally one of complexity: software is fundamentally complex because it must be precise. Problems that appear to be specified quite easily in plain language become far more complex when written in a more formal notation, such as computer code. Comparisons with other engineering disciplines are deceptive. One cannot easily increase the factor of safety of software in the same way that one could in building a steel structure, for example. Software is typically built assuming perfection, often without adequate safety nets in case the unthinkable happens. In such circumstances it should not be surprising to find out that (seemingly) minor errors have the potential to cause entire software systems to collapse. The goal of this book is to uncover techniques that will aid in overcoming complexity and enable us to produce reliable, dependable computer systems that will operate as intended, and yet are produced on-time, in budget, and are evolvable, both over time and at run time. We hope that the contributions in this book will aid in understanding the nature of software complexity and provide guidance for the control or avoidance of complexity in the engineering of complex software systems.

**Research and Education in Robotics - EUROBOT 2011** David Obdrzalek,Achim Gottscheber,2011-06-14 This book constitutes the proceedings of the International Conference on Research and Education in Robotics, EUROBOT 2011, held in Prague, Czech Republic, in June 2011. The 28 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers present current basic research such as robot control and behaviour, applications of autonomous intelligent robots, and perception, processing and action; as well as educationally oriented papers addressing issues like robotics at school and at university, practical educational robotics activities, practices in educational robot design, and future pedagogical activities.

*A Frequency Dictionary of German* Randall Jones,Erwin Tschirner,2015-06-03 A Frequency Dictionary of German is an invaluable tool for all learners of German, providing a list of the 4,034 most frequently used words in the language. Based on a 4.2 million-word corpus which is evenly divided between spoken, fiction and non-fiction texts, the dictionary provides a detailed frequency-based list plus alphabetical and part of speech indexes. All entries in the rank frequency list feature the English equivalent, a sample sentence plus an indication of major register variation. The dictionary also contains twenty-one thematically organized lists of frequently used words on a variety of topics as well as eleven special vocabulary lists. A Frequency Dictionary of German aims to enable students of all levels to maximize their study of German vocabulary in an efficient and engaging way.

*Creating Your Own Monologue* Glenn Alterman,2005-09-01 In the second edition of this popular guide, actors learn to use their skills to write monologues, performance art pieces, and one-person plays. Updated to include exclusive interviews and tips on marketing, this guide helps actors create their own exciting performance opportunities and follow in the footsteps of Elaine Stritch, Billy Crystal, John Leguizamo, and other stunningly successful writer-performers of one-person shows. The author, an award-winning actor, breaks down the writing process into simple steps, coaching the reader through each stage of the creative journey.

Proceedings of the 36th International MATADOR Conference Srichand Hinduja,Lin Li,2010-08-05 Presented here are 130 refereed papers given at the 36th MATADOR Conference held at The University of Manchester in July 2010. The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology, Applications, Design, Organisation and Management, and Research. The proceedings of this Conference contain original papers contributed by researchers from many countries on different continents. The papers cover the principles, techniques and applications in aerospace, automotive, biomedical, energy, consumable goods and process industries. The papers in this volume reflect: • the importance of manufacturing to international wealth creation; • the emerging fields of micro- and nano-manufacture; • the increasing trend towards the fabrication of parts using lasers; • the growing demand for precision engineering and part inspection techniques; and • the changing trends in manufacturing within a global environment.

Visual Informatics: Sustaining Research and Innovations Halimah Badioze Zaman,Peter Robinson,Maria Petrou,Patrick Olivier,Timothy K. Shih,Sergio Velastin,Ingela Nyström,2011-10-28 The two-volume set LNCS 7066 and LNCS 7067 constitutes the proceedings of the Second International Visual Informatics Conference, IVIC 2011, held in Selangor, Malaysia, during November 9-11, 2011. The 71 revised papers presented were carefully reviewed and selected for inclusion in these proceedings. They are organized in topical sections named computer vision and simulation; virtual image processing and engineering; visual computing; and visualisation and social computing. In addition the first volume contains two keynote speeches in full paper length, and one keynote abstract.

Understanding and Applying Medical Anthropology Peter Brown,Ron Barrett,2009-05-18 This collection of 49 readings with extensive background description exposes students to the breadth of theoretical perspectives and issues in the field of medical anthropology. The text provides specific examples and case studies of research as it is applied to a range of health settings: from cross-cultural clinical encounters to cultural analysis of new biomedical technologies to the implementation of programs in global health settings.

**Skilled Interpersonal Communication** Owen Hargie,2004-06-01 Previous editions ('Social Skills in Interpersonal Communication') have established this work as the standard textbook on communication. Directly relevant to a multiplicity of research areas and professions, this thoroughly revised and updated edition has been expanded to include the latest research as well as a new chapter on negotiating. Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications. Combining both clarity and a deep understanding of the subject matter, the authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication.

*EUROHIS* A. Nosikov,Claire Gudex,2003 The EUROHIS project has focused on the comparability of health surveys and has uncovered some problems that arise when aiming to compare data from different countries. Similar problems of cross-cultural comparability also arise when comparing data from other sources, such as health registers, and are just as complex and difficult to tackle. One of the main advantages of health surveys, however, is the relatively low cost and time involved in adapting them according to the needs of health policy-makers. This work shows that the output from the EUROHIS project provides common instruments for the measurement of eight health indicators. The development of these instruments has required careful consideration of relevant common concepts and how these should be defined and operationalized. The instruments are freely available for use by all countries, with the aim of enhancing national health information systems and facilitating cross-national comparisons of health data.
