The Warcraft Civilization William Sims Bainbridge,2012-09-21 An exploration of the popular online role-playing game World of Warcraft as a virtual prototype of the real human future. World of Warcraft is more than a game. There is no ultimate goal, no winning hand, no princess to be rescued. WoW is an immersive virtual world in which characters must cope in a dangerous environment, assume identities, struggle to understand and communicate, learn to use technology, and compete for dwindling resources. Beyond the fantasy and science fiction details, as many have noted, it's not entirely unlike today's world. In *The Warcraft Civilization*, sociologist William Sims Bainbridge goes further, arguing that WoW can be seen not only as an allegory of today but also as a virtual prototype of tomorrow, of a real human future in which tribe-like groups will engage in combat over declining natural resources, build temporary alliances on the basis of mutual self-interest, and seek a set of values that transcend the need for war. What makes WoW an especially good place to look for insights about Western civilization, Bainbridge says, is that it bridges past and future. It is founded on Western cultural tradition, yet aimed toward the virtual worlds we could create in times to come.

Precalculus Jay P. Abramson,Valeree Falduto,Rachael Gross (Mathematics teacher),David Lippman,Melonie Rasmussen,Rick Norwood,Nicholas Belloit,Jean-Marie Magnier,Harold Whipple,Christina Fernandez,2014-10-23 *Precalculus* is intended for college-level precalculus students. Since precalculus courses vary from one institution to the next, we have attempted to meet the needs of as broad an audience as possible, including all of the content that might be covered in any particular course. The result is a comprehensive book that covers more ground than an instructor could likely cover in a typical one- or two-semester course; but instructors should find, almost without fail, that the topics they wish to include in their syllabus are covered in the text. Many chapters of OpenStax College *Precalculus* are suitable for other freshman and sophomore math courses such as College Algebra and Trigonometry; however, instructors of those courses might need to supplement or adjust the material. OpenStax will also be releasing College Algebra and Algebra and trigonometry titles tailored to the particular scope, sequence, and pedagogy of those courses.--Preface.

PowerHA with HyperSwap adds transparent storage protection for replicated storage, improving overall system availability by masking storage failures. The PowerHA cluster is an Extended Distance cluster with two sites. It manages, in principle, the replicated storage infrastructure through HyperSwap functionality. The storage is provided by two DS8800s configured to replicate each other using Metro Mirror Peer-to-Peer Remote Copy (PPRC) synchronous replication. DS8800

supports in-band (SCSI commands) communication, which is used to manage (and automate) the replication using IBM AIX® HyperSwap framework and PowerHA automation and management capabilities.

Going for Broke Jean-Pierre Brun,Molly Silver,2019-12-06 Going for Broke focuses on insolvency as an additional civil remedy in the arsenal of asset recovery practitioners, specifically in the context of grand corruption investigations and proceedings. The recovery of corruption proceeds is often sought through criminal prosecution and confiscation or civil lawsuits. Insolvency proceedings can also be an effective mechanism in the right circumstances, with their own advantages and disadvantages. The scenario that is most likely to benefit from this type of remedy is one in which bribes and stolen funds have been routed through special-purpose companies. This guidebook is intended as a practical tool to help policy makers, public officials, and those who have been entrusted with recovering their nations' stolen assets. It informs them about the ways that insolvency can be used to pursue proceeds of corruption. It may also serve as a quick reference for other practitioners: insolvency professionals, auditors, financial institutions, in-house counsel, and other professionals who deal with corruption.

The New Frontiers of Fashion Law Rossella Esther Cerchia,Barbara Pozzo,2021-01-13 Fashion law encompasses a wide variety of issues that concern an article of clothing or a fashion accessory, starting from the moment they are designed and following them through distribution and marketing phases, all the way until they reach the end-user. Contract law, intellectual property, company law, tax law, international trade, and customs law are of fundamental importance in defining this new field of law that is gradually taking shape. This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective renders more interesting. The volume seeks to sketch out the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

Hazard Mitigation Grant Program Desk Reference (FEMA 345) Federal Emergency Management Agency, 2013-02-01
FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal, State, and local government, as well as private industry and homeowners, to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost-share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between "predisaster" and "post-disaster" time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate

specific information.

Green Economy and Good Governance for Sustainable Development José Antonio Puppim de Oliveira,2012 Much of the debate on green growth and environmental governance tends to be general in nature, and is often conceptual or limited to single disciplines. This book examines such terms within the context of wide-interest topics including education, oceans and cities, and mixes conceptual discussion with empirical research. It takes stock of the achievements and obstacles towards sustainability over the last 20 years, and proposes new ideas and changes to create a more sustainable future. Students, academics and professionals interested in the notion of using a green economy and good governance to achieve sustainable development and poverty eradication are recommended to read this book.
