The Financial Numbers Game Charles W. Mulford,Eugene E. Comiskey,2011-03-10 Praise for The Financial Numbers Game So much for the notion 'those who can, do-those who can't, teach.' Mulford and Comiskey function successfully both as college professors and real-world financial mercenaries. These guys know their balance sheets. The Financial Numbers Game should serve as a survival manual for both serious individual investors and industry pros who study and act upon the interpretation of financial statements. This unique blend of battle-earned scholarship and quality writing is a must-read/must-have reference for serious financial statement analysis. --Bob Acker, Editor/Publisher, The Acker Letter Wall Street's unforgiving attention to quarterly earnings presents ever increasing pressure on CFOs to manage

earnings and expectations. The Financial Numbers Game provides a clear explanation of the ways in which management can stretch, bend, and break accounting rules to reach the desired bottom line. This arms the serious investor or financial analyst with the healthy skepticism required to drive beyond reported results to a clear understanding of a firm's true performance. --Mark Hurley, Managing Director, Training and Development, Global Corporate and Investment Banking, Bank of America After reading The Financial Numbers Game, I feel as though I've taken a master's level course in financial statement analysis. Mulford and Comiskey's latest book should be required reading for anyone who is serious about fundamentally analyzing stocks. --Harry Domash, San Francisco Chronicle investing columnist and investment newsletter publisher

First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just
