Smart Card. Research and Applications Jean-Jacques Quisquater, Bruce Schneier, 2006-12-30 Smart cards have been driven by the need for a secure, portable, computing platform. Hence it is no surprise that security considerations dominated their research. The CARDIS conferences were created to provide a forum for this research. CARDIS 1998 is the third international conference on Smart Card Research and Advanced Applications, held in Louvain-la-Neuve, Belgium, 14-16 Sept-ber 1998. The ?rst CARDIS was held in Lille, France in November 1994, and the second was held in Amsterdam, The Netherlands in September 1996. The fourth CARDIS is scheduled to take place in Bristol, UK in September 2000 (<http://www.cardis.org>). This volume contains the refereed papers presented at CARDIS 1998. These 35 papers were ?rst published in a pre-proceedings and distributed to the - tendees at the conference; they have subsequently been revised and updated for this volume. The papers discuss all aspects of smart-card research: Java cards, elect- nic commerce applications, e?ciency, security (including cryptographic al- rithms, cryptographic protocols, and authentication), and architecture. Subm- sions from Europe, the U.S., Asia, and Australia show that this is indeed an international area of research, and one that is becoming more popular as pr- tical demand for smart cards increase. We wish to thank the Program Committee members who did an excellent job in reviewing papers and providing feedback to the authors.

Directors' Liability and Indemnification Edward Smerdon, 2011 Directors' liabilities have been a key concern in boardrooms since the various high-profile corporate failures in Europe and the United States over the past two decades, when regulation increased and shareholders' and companies' rights to bring civil claims were extended. The current financial crisis will inevitably bring with it greater risks and challenges for directors. There is an increasingly aggressive environment for civil claims, fuelled by insolvencies, shareholders' pressure and public outcry. The attention of the regulators is also ever more sharply focussed on directors' conduct. Directors are understandably looking closely at the protection available to them, through both indemnification and directors' and officers' insurance. The exposures faced by directors and the extent to which indemnification and insurance may provide protection vary significantly around the world. This comprehensive second edition features contributions by leading experts on the important aspects of directors' liability, the protection available to directors and the risks of doing business in multiple jurisdictions. New to the second edition are chapters on China, the Czech Republic, Kazakhstan, Saudi Arabia, Slovakia, South Korea and the United Arab Emirates. In addition to civil claims and indemnification, each chapter now includes commentary on

regulatory and criminal liability. Particular focus is placed on the impact of the credit crisis. There is also a new section dealing with regulatory issues surrounding global directors' and officers' programmes and their ability to provide cover in all intended jurisdictions. Unique in its approach, this forthcoming second edition is a powerful tool in assisting directors, officers, in-house counsel and the private practice lawyers advising them to make well-informed judgements about the risks they are taking.
