Smart Card. Research and Applications Jean-Jacques

Quisquater, Bruce Schneier, 2006-12-30 Smart cards have been driven by the need for a secure, portable, computing platform. Hence it is no surprise that security considerations dominated their research. The CARDIS conferences were created to provide a forum for this research. CARDIS 1998 is the third international conference on Smart Card Research and Advanced Applications, held in Louvain-la-Neuve, Belgium, 14-16 September 1998. The first CARDIS was held in Lille, France in November 1994, and the second was held in Amsterdam, The Netherlands in September 1996. The fourth CARDIS is scheduled to take place in Bristol, UK in September 2000

(<http://www.cardis.org>). This volume contains the refereed papers presented at CARDIS 1998. These 35 papers were first published in a pre-proceedings and distributed to the attendees at the conference; they have subsequently been revised and updated for this volume. The papers discuss all aspects of smart-card research: Java cards, electronic commerce applications, efficiency, security (including cryptographic algorithms, cryptographic protocols, and authentication), and architecture. Submissions from Europe, the U.S., Asia, and Australia show that this is indeed an international area of research, and one that is becoming more popular as practical demand for smart cards increase. We wish to thank the Program Committee members who did an excellent job in reviewing papers and providing feedback to the authors.

Directors' Liability and Indemnification Edward Smerdon,2011
Directors' liabilities have been a key concern in boardrooms since the various high-profile corporate failures in Europe and the United States over the past two decades, when regulation increased and shareholders' and companies' rights to bring civil claims were extended. The current financial crisis will inevitably bring with it greater risks and challenges for directors. There is an increasingly aggressive environment for civil claims, fuelled by insolvencies, shareholders' pressure and public outcry. The attention of the

regulators is also ever more sharply focussed on directors' conduct. directors are understandably looking closely at the protection available to them, through both indemnification and directors' and officers' insurance. The exposures faced by directors and the extent to which indemnification and insurance may provide protection vary significantly around the world. This comprehensive second edition features contributions by leading experts on the important aspects of directors' liability, the protection available to directors and the risks of doing business in multiple jurisdictions. New to the second edition are chapters on China, the Czech Republic, Kazakhstan, Saudi Arabia, Slovakia, South Korea and the United Arab Emirates. In addition to civil claims and indemnification, each chapter now includes commentary on regulatory and criminal liability. Particular focus is placed on the impact of the credit crisis. There is also a new section dealing with regulatory issues surrounding global directors' and officers' programmes and their ability to provide cover in all intended jurisdictions. Unique in its approach, this forthcoming second edition is a powerful tool in assisting directors, officers, in-house counsel and the private practice lawyers advising them to make well-informed judgements about the risks they are taking.

Agriculture Today and Tomorrow Orville L. Freeman, 1961

Miles to Millions Bill Grenier, 2017-06-27 When he became a commercial pilot at age nineteen, Bill Grenier never imagined that one day he'd be captain of the largest commercial plane the world had seen, flying the highest profile routes of a proud national carrier. Even less could he have imagined, at age nineteen and with barely a penny to his name, that he'd one day be a wealthy man. But he would ultimately control an empire worth nearly a billion dollars. With liberal doses of wit and humour, *Miles to Millions* shows what a little luck, lots of perseverance, and an appetite for adventure can do. From boarding house to boardroom, from cradle to cockpit, Grenier offers a fascinating story of success both as a commercial pilot and as a businessman. Filled with anecdotes you'd never expect from a single career - from acting as repo man taking planes for payment to saving hundreds of passengers in a stricken 747 with a collapsed co-pilot - *Miles to Millions* is a high-flier of a story bound to entertain both aviation experts and enthusiasts alike.
