The Washington Consensus Reconsidered Narcís Serra, Joseph E. Stiglitz, 2008-04-24 This volume brings together many of the leading international figures in development studies, such as Jose Antonio Ocampo, Paul Krugman, Dani Rodrik, Joseph Stiglitz, Daniel Cohen, Olivier Blanchard, Deepak Nayyar and John Williamson to reconsider and propose alternative development policies to the Washington Consensus. Covering a wide range of issues from macro-stabilization to trade and the future of global governance, this important volume makes a real contribution to this important and ongoing debate. The volume begins by introducing the Washington Consensus, discussing how it was originally formulated, what it left out, and how it was later interpreted, and sets the stage for a formulation of a new development framework in the post-Washington Consensus era. It then goes on to analyze and offer differing perspectives and potential solutions to a number of key development issues, some which were addressed by the Washington Consensus and others which were not. The volume concludes by looking toward formulating new policy frameworks and offers possible reforms to the current system of global governance.

Knowledge for Governance Johannes Glückler, Gary Herrigel, Michael Handke, 2021-01-14 This open access book focuses on theoretical and empirical intersections between governance, knowledge and space from an interdisciplinary perspective. The contributions elucidate how knowledge is a prerequisite as well as a driver of governance efficacy, and conversely, how governance affects the creation and use of knowledge and innovation in geographical context. Scholars from the fields of anthropology, economics, geography, public administration, political science, sociology, and organization studies provide original theoretical discussions along these interdependencies.

Moreover, a variety of empirical chapters on governance issues, ranging from regional and national to global scales and covering case studies in Australia, Europe, Latina America, North America and South Africa demonstrate that geography and space are not only important contexts for governance that affect the contingent outcomes of governance blueprints. Governance also creates spaces. It affects the geographical confines as well as the quality of opportunities and constraints that actors enjoy to establish legitimate and sustainable ways of social and environmental co-existence.

Smaller, Quicker, Cheaper Daniel A. Wagner,2011
The effective use of educational assessments is fundamental to improving learning. However, effective use does not refer only to the technical parameters or statistical methodologies. Learning assessments in use todaywhether large-scale or household surveys or hybrid (smaller, quicker, cheaper or SQC)have varied uses and purposes. The present volume provides a review of learning assessments, their status in terms of the empirical knowledge base, and some new ideas for improving their effectiveness, particularly for those children most in need. It is argued here that SQC learning assessments have the potential to enhance educational accountability, increase transparency, and support a greater engagement of stakeholders with an interest in improving learning. In addition, countries need a sustained policy to guide assessment choices, including a focus on poor and marginalized populations.

The Changing Face of Europe Bülent Kaya,2002-01-01 This study examines all aspects of migration, its different flows and types, such as economic, forced and ethnic, as well as its impact on economics, demography and social and cultural

life. National policies on integration and naturalisation, and how they are conditioned are examined and compared. From a variety of sources (maps, statistics, first person accounts of migration life, novels, films and surveys), a web of causes and effects emerges, depicting migrant life today. In this way, the reader gains an overview and the beginning of a deeper understanding of this complex subject.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter

these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

It contains the text of the

recommendation with a detailed commentary on it, together with a report which considers recent developments and analyses the effectiveness of these rules and of imprisonment as a form of punishment.

Youth Policy in Albania Howard Williamson, Zdeňka

Mašková, Imse Nilsson, Guy-Michel Brandtner, Council of Europe, Filip Coussée, Srđ Kišević, Council of Europe. Directorate of Youth and Sport, 2010-01-01
Albania is the seventeenth country to have undergone an international review of its national youth policy, a series which was started by the Council of Europe in 1997. The review was performed in 2009 during two one-week visits by a team of international experts working on the basis of the Albanian National Youth Strategy, published in 2007. The report focuses on three issues identified by the Albanian government: the law, delivery mechanisms and youth participation, and three issues identified as important by the review team itself: youth information, leisure-time

activities and youth crime and justice. While reviewing the youth policy in Albania with special attention to these issues, the international team came across a number of specific or cross-sectoral subjects (education, health, minorities, etc.) which helped depict a broad picture of the situation of young people in the country. Recommendations made by the international team cover not only government action, but address steps to be taken by those who take part, at all levels, in the shaping of youth policy in Albania.

Teacher Education for Change Josef Huber, Pascale Mompoin-Gaillard, 2011-01-01 What is the main role for teachers today? Why is the Council of Europe dealing with education, and teacher education in particular? How is educational thinking guided by visions of a future society desirable for all? How, in the midst of a fierce battle for curriculum time, can education for human rights, democracy and mutual understanding be embedded in the existing curricula? What are the values underlying our educational visions? The aim of this publication is to offer a few answers to these and many other questions. Above all, its purpose is to contribute to the ongoing debate, more necessary than ever, on the role of teachers and teacher education in the broader context of teaching and learning for a sustainable democratic society.

Managing Capital Flows Masahiro Kawai, Mario B. Lamberte, 2010-01-01 Managing Capital Flows provides analyses that can help policymakers develop a framework for managing capital flows that is consistent with prudent macroeconomic and financial sector stability. While capital inflows can provide emerging market economies with invaluable benefits in pursuing economic development and growth, they can also pose serious policy challenges for macroeconomic management and financial sector supervision. The expert

contributors cover a wide range of issues related to managing capital flows and analyze the experience of emerging Asian economies in dealing with surges in capital inflows. They also discuss possible policy measures to manage capital flows while remaining consistent with the goals of macroeconomic and financial sector stability. Building on this analysis, the book presents options for workable national policies and regional policy cooperation, particularly in exchange rate management. Containing chapters that bring in international experiences relevant to Asia and other emerging market economies, this insightful book will appeal to policymakers in governments and financial institutions, as well as public and private finance experts. It will also be of great interest to advanced students and academic researchers in finance.

Federal Employees' Compensation ACT (Feca)

Addison K. James, Filip E. Davis, 2012-01-07 The Federal Employees' Compensation Act (FECA) is the workers' compensation program for federal employees. Like all workers' compensation programs, FECA pays disability, survivors, and medical benefits, without fault, to employees who are injured or become ill in the course of their federal employment and the survivors of employees killed on the job. The FECA program is administered by the Department of Labor (DOL) and the costs of benefits are paid by each employees' host agency. Employees of the U.S. Postal Service (USPS) currently comprise the largest group of FECA beneficiaries and are responsible for the largest share of FECA benefits. This book examines the key policy issues facing the FECA today, including the disproportionate share of claims and program costs attributed to postal workers, the payment of FECA benefits after retirement age, the overall generosity of FECA disability benefits as

compared with those offered by the states, and the overall administration of the FECA program.

U. S. Role in the World Michael Moodie, Ronald O'Rourke, 2019-09-14 The U.S. role in the world refers to the overall character, purpose, or direction of U.S. participation in international affairs and the country's overall relationship to the rest of the world. The U.S. role in the world can be viewed as establishing the overall context or framework for U.S. policymakers for developing, implementing, and measuring the success of U.S. policies and actions on specific international issues, and for foreign countries or other observers for interpreting and understanding U.S. actions on the world stage. While descriptions of the U.S. role in the world since the end of World War II vary in their specifics, it can be described in general terms as consisting of four key elements: global leadership; defense and promotion of the liberal international order; defense and promotion of freedom, democracy, and human rights; and prevention of the emergence of regional hegemony in Eurasia. The issue for Congress is whether the U.S. role in the world is changing, and if so, what implications this might have for the United States and the world. A change in the U.S. role could have significant and even profound effects on U.S. security, freedom, and prosperity. It could significantly affect U.S. policy in areas such as relations with allies and other countries, defense plans and programs, trade and international finance, foreign assistance, and human rights. Some observers, particularly critics of the Trump Administration, argue that under the Trump Administration, the United States is substantially changing the U.S. role in the world. Other observers, particularly supporters of the Trump Administration, while acknowledging that the Trump Administration has changed U.S. foreign policy in a number of areas compared to policies

pursued by the Obama Administration, argue that under the Trump Administration, there has been less change and more continuity regarding the U.S. role in the world. Some observers who assess that the United States under the Trump Administration is substantially changing the U.S. role in the world-particularly critics of the Trump Administration, and also some who were critical of the Obama Administration-view the implications of that change as undesirable. They view the change as an unnecessary retreat from U.S. global leadership and a gratuitous discarding of long-held U.S. values, and judge it to be an unforced error of immense proportions-a needless and self-defeating squandering of something of great value to the United States that the United States had worked to build and maintain for 70 years. Other observers who assess that there has been a change in the U.S. role in the world in recent years-particularly supporters of the Trump Administration, but also some observers who were arguing even prior to the Trump Administration in favor of a more restrained U.S. role in the world-view the change in the U.S. role, or at least certain aspects of it, as helpful for responding to changed U.S. and global circumstances and for defending U.S. interests. Congress's decisions regarding the U.S. role in the world could have significant implications for numerous policies, plans, programs, and budgets, and for the role of Congress relative to that of the executive branch in U.S. foreign policymaking.
