Handbook of Plant Nutrition Allen V. Barker,David J. Pilbeam,2016-04-19 The burgeoning demand on the world food supply, coupled with concern over the use of chemical fertilizers, has led to an accelerated interest in the practice of precision agriculture. This practice involves the careful control and monitoring of plant nutrition to maximize the rate of growth and yield of crops, as well as their nutritional value.

Early FM Radio Gary L. Frost,2010-04-01 The commonly accepted history of FM radio is one of the twentieth century's iconic sagas of invention, heroism, and tragedy. Edwin Howard Armstrong created a system of wideband frequency-modulation radio in 1933. The Radio Corporation of America (RCA), convinced that Armstrong's system threatened its AM empire, failed to develop the new technology and refused to pay Armstrong royalties. Armstrong sued the company at great personal cost. He died despondent, exhausted, and broke. But this account, according to Gary L. Frost, ignores the contributions of scores of other individuals who were involved in the decades-long struggle to realize the potential of FM radio. The first scholar to fully examine recently uncovered evidence from the Armstrong v. RCA lawsuit, Frost offers a thorough revision of the FM story. Frost's balanced, contextualized approach provides a much-needed corrective to previous accounts. Navigating deftly through the details of a complicated story, he examines the motivations and interactions of the three communities most intimately involved in the development of the technology—Progressive-era amateur radio operators, RCA and Westinghouse engineers, and early FM broadcasters. In the process, Frost demonstrates the tension between competition and collaboration that goes hand in hand with the emergence and refinement of new technologies. Frost's study reconsiders both the social construction of FM radio and the process of technological evolution. Historians of technology, communication, and media will welcome this important reexamination of the canonic story of early FM radio.

A National Strategy for the Elimination of Hepatitis B and C National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on a National Strategy for the Elimination of Hepatitis B and C,2017-06-30 Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013 viral hepatitis, of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types, surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV, but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV, but new direct-acting antivirals can cure 95 percent of chronic infections, though these drugs are unlikely to reach all chronically-infected people anytime soon. This report, the second of two, builds off the conclusions of the first report and outlines a strategy for hepatitis reduction over time and specific actions to achieve them.

The Social Biology of Microbial Communities Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2013-01-10 Beginning with the germ theory of disease in the 19th century and extending through most of the 20th century, microbes were believed to live their lives as solitary, unicellular, disease-causing organisms . This perception stemmed from the focus of most investigators on organisms that could be grown in the laboratory as cellular monocultures, often dispersed in liquid, and under ambient conditions of temperature, lighting, and humidity. Most such inquiries were designed to identify microbial pathogens by satisfying Koch's postulates.³ This pathogen-centric approach to the study of microorganisms produced a metaphorical war against these microbial invaders waged with antibiotic therapies, while simultaneously obscuring the dynamic relationships that exist among and between host organisms and their associated microorganisms-only a tiny fraction of which act as pathogens. Despite their obvious importance, very little is actually known about the processes and factors that influence the assembly, function, and stability of microbial communities. Gaining this knowledge will require a seismic shift away from the study of individual microbes in isolation to inquiries into the nature of diverse and often complex microbial communities, the forces that shape them, and their relationships with other communities and organisms, including their multicellular hosts. On March 6 and 7, 2012, the Institute of Medicine's (IOM's) Forum on Microbial Threats hosted a public workshop to explore the emerging science of the social biology of microbial communities. Workshop presentations and discussions embraced a wide spectrum of topics, experimental systems, and theoretical perspectives representative of the current, multifaceted exploration of the microbial frontier. Participants discussed ecological, evolutionary, and genetic factors contributing to the assembly, function, and stability of microbial communities; how microbial communities adapt and respond to environmental stimuli; theoretical and experimental approaches to advance this nascent field; and potential applications of knowledge gained from the study of microbial communities for the improvement of human, animal, plant, and ecosystem health and toward a deeper understanding of microbial diversity and evolution. The Social Biology of Microbial Communities: Workshop Summary further explains the happenings of the workshop.

Future Jihad Walid Phares,2014-12-09 From MSNBC terrorism expert Walid Phares, this is a frightening look into the future of jihad. Though an alarming new picture of what we can expect from terrorists in the future, Walid Phares reveals how the United States can win the war. Phares, who

served as an expert with the Justice Department, briefed the Defense and State Departments, and testifies to Congress, shows that there has been a fundamental misunderstanding about al Qaeda's ultimate goal in the West and what victory means to jihadists. He answers such critical questions as: How long will this war last? Is the United States secure on the inside? Future Jihad shows how our defenses have been infiltrated; identifies the future generation of homegrown terrorists; and points the way for America to win the ideological war at the heart of jihad.

From Pleasure Machines to Moral Communities Geoffrey M. Hodgson, 2013 Are humans at their core seekers of their own pleasure or cooperative members of society? Paradoxically, they are both. Pleasure-seeking can take place only within the context of what works within a defined community, and central to any community are the evolved codes and principles guiding appropriate behavior, or morality. The complex interaction of morality and self-interest is at the heart of Geoffrey M. Hodgson's approach to evolutionary economics, which is designed to bring about a better understanding of human behavior. In *From Pleasure Machines to Moral Communities*, Hodgson casts a critical eye on neoclassical individualism, its foundations and flaws, and turns to recent insights from research on the evolutionary bases of human behavior. He focuses his attention on the evolution of morality, its meaning, why it came about, and how it influences human attitudes and behavior. This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn from diverse environments, including the business world and crucial policy realms like health care and ecology. This book provides a valuable complement to Hodgson's earlier work with Thorbjørn Knudsen on evolutionary economics in *Darwin's Conjecture*, extending the evolutionary outlook to include moral and policy-related issues.

Catch a Falling Star Michael Beyer, 2012-10 It was after midnight in 1990, and a group of NASA technicians are playing chess in the lounge. They never notice the soft clicking noises as radiation detectors kick in and a strange code begins taking over a computer monitor. As a glowing saucer zips past the Voyager, locks itself into orbit around Neptune, rolls over, and then disappears from view, the technicians loudly argue over the rules of the game unaware that aliens are headed toward Earth. Unfortunately, the amphibian-like creatures who reproduce in alarming numbers have made a serious mistake. They have chosen a small town in Iowa as the place to launch their invasion, mistakenly thinking they can attack under a cloak of invisibility. But this rural setting is protected by the Pirates, an elite team of adventurers and foilers of evil plots comprised of the most dangerous creatures on planet Earth young boys. As the alien invaders kidnap one of the pirates and begin to examine him for weaknesses, they have no idea that they have in their possession the girl-hating, chaos-creating nuisance that is the bane of all fourth-grade math teachers in town. It may be the last mistake they'll ever make.

Pharmacoepidemiology Brian L. Strom, Stephen E. Kimmel, Sean Hennessy, 2019-12-16 This classic, field-defining textbook, now in its sixth edition, provides the most comprehensive guidance available for anyone needing up-to-date information in pharmacoepidemiology. This edition has been fully revised and updated throughout and continues to provide a rounded view on all perspectives from academia, industry and regulatory bodies, addressing data sources, applications and methodologies with great clarity.

Encyclopedia of Canonical Ḥadīth Gautier H.A. Juynboll, 2007-09-30 This encyclopedic work on Islam comprises English translations of all canonical Ḥadīths, complete with their respective chains of transmission (isnāds). By conflating the variant versions of the same Ḥadīth, the repetitiveness of its literature has been kept wherever possible to a minimum. The latest methods of isnād analysis, described in the general introduction, have been employed in an attempt to identify the person(s) responsible for each Ḥadīth. The book is organized in the alphabetical order of those persons. These are the so-called 'common links'. Each of them is listed with the tradition(s) for the wording of which he can be held accountable, or with which he can at least be associated.

Global Corruption Gerry Ferguson, 2017 This book has been specifically created to make it easier for professors to offer a law school course on global corruption. It is issued under a creative commons license and can be used for free in whole or in part for non-commercial purposes. The first chapter sets out the general context of global corruption: its nature and extent, and some views on its historical, social, economic and political dimensions. Each subsequent chapter sets out international standards and requirements in respect to combating corruption - mainly in the UN

Convention Against Corruption (UNCAC) and the OECD Bribery of Foreign Officials Convention (OECD Convention). The laws of the United States and United Kingdom are then set out as examples of how those Convention standards and requirements are met in two influential jurisdictions. Finally, the law of Canada is set out. Thus, a professor from Africa, Australia, New Zealand or English speaking countries in Asia and Europe has a nearly complete coursebook - for example, that professor can delete the Canadian sections of this book and insert the law and practices of his or her home country in their place. While primarily directed to a law school course on global corruption, this book will be of interest and use to professors teaching courses on corruption from other academic disciplines and to lawyers and other anti-corruption practitioners.

Theophrastus Against the Presocratics and Plato H. Baltussen,2000 This study of Theophrastus' much neglected *De sensibus* offers a new interpretation of the treatment of the Presocratic and Platonic views on sense perception, and provides new insight into Theophrastus' exegetical procedure by using Peripatetic dialectic as a heuristic tool.

One Acre and Security Bradford Angier,2017-09-15 A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living—now—and income too? One Acre and Security explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising bees for honey, keeping dairy herbs of cows or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature’s free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. “This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best,” says Bradford Angier in One Acre and Security...

The Armenian Massacres in Ottoman Turkey Guenter Lewy,2005-11-30 Avoiding the sterile was-it-genocide-or-not debate, this book will open a new chapter in this contentious controversy and may help achieve a long-overdue reconciliation of Armenians and Turks.
