The Conscious Mind and the Material World Douglas M.

Stokes,2007-05-16 What makes us who we are? From a scientific viewpoint, any individual's existence is improbable at best.

Consciousness as an actuality is inarguable; its nature, however, remains elusive. This work argues the view of self as a field of pure consciousness, debating the existence of a continuing self and drawing conclusions about this entity and its relation to the physical body and the physical world. Beginning with an exploration of the relationship between mind and matter, it discusses ostensible psi phenomena such as extra-sensory perception and psychokinesis and their implications for our understanding of the mind and the cosmos. Additional topics include the perennial mind-body problem; the role of consciousness in quantum mechanics (and conversely the role of quantum mechanics in the study of consciousness); the anthropic principle; and evidence for Intelligent Design. Quasi-religious questions such as the survival of consciousness after death are also addressed.

Sister Carrie Theodore Dreiser,2012-03-05 The first masterpiece of the American naturalistic movement, *Sister Carrie* made its controversial debut in 1900. Condemned for its alleged

immorality, the novel traces the fortunes of a small-town girl's rise from obscurity to fame.

My Omaha Obsession Miss Cassette, 2020-11 *My Omaha Obsession* takes the reader on an idiosyncratic tour through some of Omaha's neighborhoods, buildings, architecture, and people, celebrating the city's unusual history. Rather than covering the city's best-known sites, Miss Cassette is irresistibly drawn to strange little buildings and glorious large homes that don't exist anymore as well as to stories of Harkert's Holsum Hamburgers and the Twenties Club. Piecing together the records of buildings and homes and everything interesting that came after, Miss Cassette shares her observations of the property and its significance to Omaha. She scrutinizes land deeds, insurance maps, tax records, and old newspaper articles to uncover a property's singular story. Through conversations with fellow detectives and history enthusiasts, she guides readers along her path of hunches, personal interests, mishaps, and more. As a longtime resident of Omaha, Miss Cassette is informed by memories of her youth combined with an enduring curiosity about the city's offbeat relics and remains. Part memoir and part research guide with a healthy dose of colorful wandering, *My Omaha Obsession* celebrates the

historic built environment and searches for the people who shaped early Omaha.

Anna, Age Eight Katherine Ortega Courtney,Dominic Cappello,2017-12-25 With research showing child maltreatment is substantiated for one in eight children in the US, it's clear Adverse Childhood Experiences (ACEs), a broader category of experiences than just maltreatment, are at an epidemic scale in our society ... The authors' main thesis, quite simply, is that protecting all our children is entirely possible, but only when we know the scope of the challenges families face. The book provides a detailed, data-driven analysis of the scope of the problem and how to strengthen systems designed to protect our children--

The Nature of Mind Douglas M. Stokes, 2014-02-28 Western science teaches that our beings are governed by the laws of physics and our minds play no part. There are, however, flaws in this thinking, most prominently unexplained paranormal phenomena that defy explanation by modern theories of physics. Collected by parapsychologists, these data include extrasensory perception (ESP), poltergeist occurrences, and psychokinesis. Much of the current data in parapsychology and their implications for understanding the true nature of the self are examined here. Beginning with a consideration of several instances of spontaneous psi, the book examines the theoretical explanations of paranormal

phenomena. It covers the hypothesis and evidence that minds contain the so-called hidden variables that determine the outcomes of the quantum process, thus interweaving parapsychology with modern physics. The reader is also forced to consider in detail the relationship between the conscious mind and the physical brain and the evidence that minds survive the death of bodies.

IBM Platform Computing Solutions Dino Quintero, Scott Denham, Rodrigo Garcia da Silva, Alberto Ortiz, Aline Guedes Pinto, Atsumori Sasaki, Roger Tucker, Joanna Wong, Elsie Ramos, IBM Redbooks, 2012-12-07 This IBM® Platform Computing Solutions Redbooks® publication is the first book to describe each of the available offerings that are part of the IBM portfolio of Cloud, analytics, and High Performance Computing (HPC) solutions for our clients. This IBM Redbooks publication delivers descriptions of the available offerings from IBM Platform Computing that address challenges for our clients in each industry. We include a few implementation and testing scenarios with selected solutions. This publication helps strengthen the position of IBM Platform Computing solutions with a well-defined and documented deployment model within an IBM System x® environment. This deployment model offers clients a planned foundation for dynamic

cloud infrastructure, provisioning, large-scale parallel HPC application development, cluster management, and grid applications. This IBM publication is targeted to IT specialists, IT architects, support personnel, and clients. This book is intended for anyone who wants information about how IBM Platform Computing solutions use IBM to provide a wide array of client solutions.

The Fingerprint U. S. Department Justice,2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Modern Computer Arithmetic Richard P. Brent,Paul

Zimmermann,2010-11-25 *Modern Computer Arithmetic* focuses on arbitrary-precision algorithms for efficiently performing arithmetic operations such as addition, multiplication and division, and their connections to topics such as modular arithmetic, greatest common divisors, the Fast Fourier Transform (FFT), and the computation of elementary and special functions. Brent and Zimmermann present algorithms that are ready to implement in your favourite language, while keeping a high-level description and avoiding too low-level or machine-dependent details. The book is intended for anyone

interested in the design and implementation of efficient high-precision algorithms for computer arithmetic, and more generally efficient multiple-precision numerical algorithms. It may also be used in a graduate course in mathematics or computer science, for which exercises are included. These vary considerably in difficulty, from easy to small research projects, and expand on topics discussed in the text. Solutions to selected exercises are available from the authors.

Abundant Harvests John Dietler, Heather Gibson, James M. Potter, 2015 This book is no longer in print, but is available for download as a free e-book through SWCA, Inc. Mission San Gabriel Arcangél was known as the Pride of the Missions due to its legendary agricultural productivity and its prominence in Southern California as a center of commerce and social interaction during the mission period (1771-1834). This volume, SWCA Anthropological Research Paper No. 11, reports on the first archaeological data recovery undertaken at the mission. Working within the mission's garden area, the study revealed more than

300,000 artifacts and 45 archaeological features, including a large granary, a reservoir complex, and one of the first industrial properties on the West Coast: Chapman's Mill and Millrace. Using archaeological results to critically examine historical narratives, the project examined the economic and social organization of the mission through detailed analyses of the public architecture and everyday materials left behind by Native American residents in the productive heart of the community, including animal bones, plant remains, ceramics, and tools. These studies revealed a dynamic and resilient native population that, despite clear hardships, was well-supplied with domesticated meat and locally gathered plant foods. The architectural remains clearly demonstrate the stepwise process through which a European worldview was molded to the unfamiliar California landscape, where self-taught engineers developed techniques of harnessing water that enabled the population explosion that came to characterize the Los Angeles Basin in succeeding decades. Lavishly illustrated and richly detailed, the volume is a resource for archaeologists, historians, and mission scholars alike.
