Aging in Sub-Saharan Africa National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Policy Research and Data Needs to Meet the Challenge of Aging in Africa, 2006-11-10 In sub-Saharan Africa, older people make up a relatively small fraction of the total population and are supported primarily by family and other kinship networks. They have traditionally been viewed as repositories of information and wisdom, and are critical pillars of the community but as the HIV/AIDS pandemic destroys family systems, the elderly increasingly have to deal with the loss of their own support while absorbing the additional responsibilities of caring for their orphaned grandchildren. *Aging in Sub-Saharan Africa* explores ways to promote U.S. research interests and to augment the sub-Saharan governments' capacity to address the many challenges posed by population aging. Five major themes are explored in the book such as the need for a basic definition of older person, the need for national governments to invest more in basic research and the coordination of data collection across countries, and the need for improved dialogue between local researchers and policy makers. This book makes three major recommendations: 1) the development of a research agenda 2) enhancing research opportunity and implementation and 3) the translation of research findings.

Strategies to Improve Cardiac Arrest Survival Institute of Medicine, Board on Health Sciences Policy, Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions, 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five

cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Introduction to Permanent Plug and Abandonment of Wells Mahmoud Khalifeh, Arild Saasen, 2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the

integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Reading Stephen King Brenda Miller Power, Jeffrey D. Wilhelm, 1997 This collection of essays grew out of the Reading Stephen King Conference held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including mass market popular literature in middle and high school English classes and of who chooses what students read. King's fiction is among the most popular of pop literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and the need for adolescent readers to be able to choose books in school reading programs. The essays and their authors are: (1) Reading Stephen King: An Ethnography of an Event (Brenda Miller Power); (2) I Want to Be Typhoid Stevie (Stephen King); (3) King and Controversy in Classrooms: A Conversation between Teachers and Students (Kelly Chandler and others); (4) Of Cornflakes, Hot Dogs, Cabbages, and King (Jeffrey D. Wilhelm); (5) The 'Wanna Read' Workshop: Reading for Love (Kimberly Hill Campbell); (6) When 'IT' Comes to the Classroom (Ruth Shagoury Hubbard); (7) If Students Own Their Learning, What Do Teachers Do? (Curt Dudley-Marling); (8) Disrupting Stephen King: Engaging in Alternative Reading Practices (James Albright and Roberta F. Hammett); (9) Because Stories Matter: Authorial Reading and the Threat of Censorship (Michael W. Smith); (10) Canon Construction Ahead (Kelly Chandler);

(11) King in the Classroom (Michael R. Collings); (12) King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher (John Skretta); (13) Reading the Cool Stuff: Students Respond to 'Pet Sematary' (Mark A. Fabrizio); (14) When Reading Horror Subliterature Isn't So Horrible (Janice V. Kristo and Rosemary A. Bamford); (15) One Book Can Hurt You...But a Thousand Never Will (Janet S. Allen); (16) In the Case of King: What May Follow (Anne E. Pooler and Constance M. Perry); and (17) Be Prepared: Developing a Censorship Policy for the Electronic Age (Abigail C. Garthwait). Appended are a joint manifesto by National Council of Teachers of English (NCTE) and International Reading Association (IRA) concerning intellectual freedom; an excerpt from a teacher's guide to selected horror short stories of Stephen King; and the conference program. Contains a 152-item reference list of literary works.(NKA)

Hacker Disassembling Uncovered: Powerful Techniques To Safeguard Your Programming Kris Kaspersky,2003 Going beyond the issues of analyzing and optimizing programs as well as creating the means of protecting information, this guide takes on the programming problem of, once having found holes in a program, how to go about disassembling it without its source code. Covered are the hacking methods used to analyze programs using a debugger and disassembler. These methods include virtual functions, local and global variables, branching, loops, objects and their hierarchy, and mathematical operators. Also covered are methods of fighting disassemblers, self-modifying code in operating systems, and executing code in the stack. Advanced disassembler topics such as optimizing compilers and movable code are discussed as well.

Geology of the San Francisco Bay Region Doris Sloan,2006-06-27 You can't really know the place where you live until you know the shapes and origins of the land around you. To feel truly at home in the Bay Area, read Doris Sloan's intriguing stories of this region's spectacular, quirky landscapes.—Hal Gilliam, author of Weather of the San Francisco Bay Region This is a fascinating look at some of the world's most complex and engaging geology. I highly recommend this book to

anyone interested in an understanding of the beautiful landscape and dynamic geology of the Bay Area.—Mel Erskine, geological consultant This accessible summary of San Francisco Bay Area geology is particularly timely. We are living in an age where we must deal with our impact on our environment and the impact of the environment on us. Earthquake hazards, and to a lesser extent landslide hazards, are well known, but the public also needs to be aware of other important engineering and environmental impacts and geologic resources. This book will allow Bay Area residents to make more intelligent decisions about the geological issues affecting their lives.—John Wakabayashi, geological consultant

Oer Andrew Wesolek, Anne Langley, Jonathan Lashley, 2018-10 For many of us, the drive to affect positive change--however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and Yagan; 2017). Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have projected that the cost of attending college would keep 2.4 million low-to-moderate income, college-qualified high school graduates from completing a college degree (Advisory Committee on Student Financial Assistance, 2006). During that same period, college students in the United States saw expenses related to tuition and fees increase by 63 percent, school housing costs (excluding board) increase by 51 percent, textbook prices increase by 88 percent (Bureau of Labor, 2016). Because few students can afford a college education by salary alone, 44.2 million Americans have sought financial aid via student loans. As a result, total student loan debt is now topping \$1.45

trillion in the United States (Board of Governors of the Federal Reserve System, 2017), and student loan delinquency rates are averaging 11.2 percent (Federal Reserve Bank of New York, 2017). The burden of a student's financial decisions extends beyond the mere individual: society will inevitably carry the weight of this debt for years to come.
