Introduction to Permanent Plug and Abandonment of Wells Mahmoud Khalifeh,Arild Saasen,2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Get Better Faster Paul Bambrick-Santoyo,2016-07-25 Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while at the same time closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, *Get Better Faster* provides agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. *Get Better Faster* will teach you: The core principles of coaching: Go Granular; Plan, Practice, Follow Up, Repeat; Make Feedback More Frequent Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide It also walks you through the four phases of skill building: Phase 1 (Pre-Teaching): Dress Rehearsal Phase 2: Instant Immersion Phase 3: Getting into Gear Phase 4: The Power of Discourse Perfect for new educators and those who supervise them, *Get Better Faster* will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource.

Applied Multivariate Statistics with R Daniel Zelterman,2023-01-20 Now in its second edition, this book brings multivariate statistics to graduate-level practitioners, making these analytical methods accessible without lengthy mathematical derivations. International marketing and trade of quality food products Alessandra Castellini, Erika Pignatti, Roberta Spadoni, Maurizio Canavari, Nicola Cantore, 2023-09-04 Due to increased purchasing power of certain consumer segments all over the world and the related growing demand for food specialties for differentiated goods in the international markets, agri-food trade and marketing is no longer focused on commodities only. Key concepts of 'Marketing', 'International Trade' and 'Quality' are taking the forefront in the scientific debate among agricultural economists dealing with agricultural and food products markets. The need for scientific knowledge about several aspects of marketing for quality food products is growing. The aim of this book is to link these key concepts together and consider connections, overlaps, contradictions and complementarities between them. This book contains peer-reviewed articles covering a range of studies on international marketing and trade for quality food products and is edited with the support of the BEAN-QUORUM project, funded by the European Union's Asia Link Programme. The topics covered by the studies range from geographical indications to organic food; from fair trade to functional food; from knowledge about quality requirements to the impact of the quest for quality. The geographical scope of the studies is broad and the perspectives vary including the consumer, the producer and the supply chain side. The focal interest of the studies also range from competitiveness, to policy, to potential demand. The book is of interest to researchers and practitioners in international food networks of all types.

An Introduction to Applied Multivariate Analysis with R Brian Everitt, Torsten Hothorn, 2011-04-23 The majority of data sets collected by researchers in all disciplines are multivariate, meaning that several measurements, observations, or recordings are taken on each of the units in the data set. These units might be human subjects, archaeological artifacts, countries, or a vast variety of other things. In a few cases, it may be sensible to isolate each variable and study it separately, but in most instances all the variables need to be examined simultaneously in order to fully grasp the structure and key features of the data. For this purpose, one or another method of multivariate analysis might be helpful, and it is with such methods that this book is largely concerned. Multivariate analysis includes methods both for describing and exploring such data and for making formal inferences about them. The aim of all the techniques is, in general sense, to display or extract the signal in the data in the presence of noise and to find out what the data show us in the midst of their apparent chaos. An Introduction to Applied Multivariate Analysis with R explores the correct application of these methods so as to extract as much information as possible from the data at hand, particularly as some type of graphical representation, via the R software. Throughout the book, the authors give many examples of R code used to apply the multivariate techniques to multivariate data.

Unexploded Ordnance Detection and Mitigation James Byrnes, 2008-12-19 The chapters in this volume were presented at the July–August 2008 NATO Advanced Study Institute on Unexploded Ordnance Detection and Mitigation. The conference was held at the beautiful Il Ciocco resort near Lucca, in the glorious Tuscany region of northern Italy. For the ninth time we gathered at this idyllic spot to explore and extend the reciprocity between mathematics and engineering. The dynamic interaction between world-renowned scientists from the usually disparate communities of pure mathematicians and applied scientists which occurred at our eight previous ASI's continued at this meeting. The detection and neutralization of unexploded ordnance (UXO) has been of major concern for very many decades; at least since the First World war. UXO continues to be the subject of intensive research in many fields of science, including mathematics, signal processing (mainly radar and sonar) and chemistry. While today's headlines emphasize the mayhem resulting from the placement of improvised explosive devices (IEDs), humanitarian landmine clearing continues to draw significant global attention as well. In many countries of the world, landmines threaten the population and hinder reconstruction and fast, efficient utilization of large areas of the mined land in the aftermath of military conflicts.
