From the Neighbourhood to the National Great Britain. Home Office,2008 This green paper focuses on seven key issues. Chapter 1 is about the local dimension, and builds on the success of neighbourhood policing by giving the public more chance to drive local priorities and more information on what is being achieved and the service standards to the public. Chapter 2 describes plans to reduce bureaucracy and red-tape and increase use of technology. The next chapter deals with the officers and staff of the service. Chapter 4 explains improvements to the development and deployment of the police workforce. Government support for these changes is set out in Chapter 5, and Chapter 6 covers the progress made in working across police forces to improve protective services and the further steps the Government will take to encourage collaboration and co-operation between forces. It also sets out the approach to counter terrorism policing and policing the UK's borders. Chapter 7 outlines plans for a radical reshaping of national performance management arrangement.

Revisionism and Diversification in New Religious Movements Eileen Barker,2016-04-08 New Religious Movements tend to start their lives with a number of unequivocal statements, not only of a theological nature but also about the world and appropriate behaviours for the believer. Yet these apparently inalienable Truths and their interpretations frequently become revised, 'adjusted' or selectively adopted by different believers. This book explores different ways in which, as NRMs develop, stagnate, fade away, or abruptly cease to exist, certain orthodoxies and practices have, for one reason or another, been dropped or radically altered. Sometimes such changes are adapted by only a section of the movement, resulting in schism. Of particular concern are processes that might lead to violent and/or anti-social behaviour. As part of the Ashgate/Inform series, and in the spirit of the Inform Seminars, this book approaches its topic from a wide range of perspectives. Contributors include academics, current and former members of NRMs, and members of 'cult-watching' movements. All the contributions are of a scholarly rather than a polemic nature, and brought together by Eileen Barker, the founder of Inform.

The Goldwatcher John Katz,Frank Holmes,2009-08-18 Why did the price of gold hit record highs in 2008? Take a look at the headlines - government bailouts of failed banks, mortgage and credit crises, rising inflation, slowing growth and global insecurity. In order to protect themselves from treacherous financial markets and depreciated paper currencies investors worldwide are turning to gold. Gold has long been used as money and as a store of wealth, but what's the source of its value? Why does that value sometimes rise so high and at other times fall so low? And what do we know about gold's complex and often tumultuous past that may yield clues about how it may behave in the future? Gold is a side show on a world financial stage dominated by the dollar. The tail can't wag the dog -gold prices are affected by changes in prospects for the dollar and not vice versa. With uncertain outcomes for the American and global economies, gold's stateless money franchise makes this book compelling reading. John Katz is a clear eyed independent strategist and analyst with an extraordinary ability to get to grips with subjects ranging from biotechnology via alternative energy to commodities and gold. Uniquely for a commentator on gold he has no dogmas. To assess the risks and rewards that come with owning gold he introduces opinions from an impressive range of commentators, examines different scenarios that may play out on the world economic stage and highlights situations when owning gold makes sense and when it doesn't. To complete the picture Frank Holmes's contribution to *The Goldwatcher* explains the risks and rewards. *The Goldwatcher* has been written for 21st century investors. It will be an indispensable resource for responsible people from institutional money managers to private savers - whether the gold price moves up, down, or sideways. —Patrick H. Spencer, Managing Director, Head of Institutional Sales, Robert W. Baird Limited, London Frank Holmes's stellar track record as a resource portfolio manager is a clear reflection of his understanding of the business, the markets and the factors that affect them. His success is as much about unearthing value as it is about creating an investment process that is religiously followed. If you want to succeed in your resource investment,this book is a must. It's all the more enjoyable because the writing style is easy-going,clear and understandable. —Pierre Lassonde, Former chairman, World Gold Council, and past president, Newmont Mining Corp This book is also supported by *The Goldwatcher* blog - <http://wwwthegoldwatcher.com>, which addresses news and developments affecting gold and the dollar, updates statistical information and links with sources for data and commentary.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to

real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Directory of Research Grants 2008 Schoolhouse Partners Llc,2008-05 It was the 50s and life was simple, until September 25, 1954. That was the night that would be etched in the memory of the citizens of Stanfield, Massachusetts. The Chief of Police described the brutal savagery of the double homicide as the most atrocious crime in the history of the city. A fourteen-year-old girl, and the four-year-old boy in her care were murdered at the hands of a deranged, depraved killer. A Thread of Evidence places the reader at the scene of the crime, an eye witness to the senseless stabbing of two innocent children. With a piece of crochet thread as their only clue, the entire police department, lead by detectives Steven Logan and Raymond Gage, scour the city in search of a maniacal savage. When all tips and leads have been exhausted, they review all evidence. They come back to the thread. The only real evidence. With tenacity and perseverance of Logan and Gage the killer is apprehended. The reader experiences the twists and turns of the investigation, and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence. A Thread of Evidence has been written as fiction, but inspired by an actual event. Fifty years later, it remains etched in the minds of all who had lived in the area. The author has researched court records, newspapers, interviewed neighbors, police and has drawn on personal recollections of the crime. The story has been recounted over and over and to this day, it continues to be discussed. A Thread of Evidence is a compelling account of superb detective work, and unprecedented dedication of an entire police department.
