My Man Jeeves Sir Pelham Grenville Wodehouse, 2020-09-28

Jeeves—my man, you know—is really a most extraordinary chap. So capable. Honestly, I shouldn't know what to do without him. On broader lines he's like those chappies who sit peering sadly over the marble battlements at the Pennsylvania Station in the place marked Inquiries. You know the Johnnies I mean. You go up to them and say: When's the next train for Melonsquashville, Tennessee? and they reply, without stopping to think, Two-forty-three, track ten, change at San Francisco. And they're right every time. Well, Jeeves gives you just the same impression of omniscience. As an instance of what I mean, I remember meeting Monty Byng in Bond Street one morning, looking the last word in a grey check suit, and I felt I should never be happy till I had one like it. I dug the address of the tailors out of him, and had them working on the thing inside the hour. Jeeves, I said that evening. I'm getting a check suit like that one of Mr. Byng's. Injudicious, sir, he said firmly. It will not become you. What absolute rot! It's the soundest thing I've struck for years. Unsuitable for you, sir. Well, the long and the short of it was that the confounded thing came home, and I put it on, and when I caught sight of myself in the

glass I nearly swooned. Jeeves was perfectly right. I looked a cross between a music-hall comedian and a cheap bookie. Yet Monty had looked fine in absolutely the same stuff. These things are just Life's mysteries, and that's all there is to it. But it isn't only that Jeeves's judgment about clothes is infallible, though, of course, that's really the main thing. The man knows everything. There was the matter of that tip on the Lincolnshire. I forget now how I got it, but it had the aspect of being the real, red-hot tabasco. Jeeves, I said, for I'm fond of the man, and like to do him a good turn when I can, if you want to make a bit of money have something on Wonderchild for the 'Lincolnshire.'

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes

taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Top Dog Po Bronson, Ashley Merryman, 2013-02-19 New York Times Bestseller Po Bronson and Ashley Merryman's work changes the national dialogue. Beyond their bestselling books, you know them from commentary and features in the New York Times, CNN, NPR, Time, Newsweek, Wired, New York, and more. E-mail, Facebook, and Twitter accounts are filled with demands to read their reporting (such as *How Not to Talk to Your Kids*, *Creativity Crisis*, and *Losing Is Good for You*). In *TOP DOG*, Bronson and Merryman again use their astonishing blend of science and storytelling to reveal what's truly in the heart of a champion. The joy of victory and the character-building agony of defeat. Testosterone and the neuroscience of mistakes. Why rivals motivate. How home field advantage gets you a raise. What teamwork really requires. It's baseball, the SAT, sales contests,

and Linux. How before da Vinci and FedEx were innovators, first, they were great competitors. Olympians carry TOP DOG in their gym bags. It's in briefcases of Wall Street traders and Madison Avenue madmen. Risk takers from Silicon Valley to Vegas race to implement its ideas, as educators debate it in halls of academia. Now see for yourself what this game-changing talk is all about.

Statistics Using Technology, Second Edition Kathryn Kozak, 2015-12-12 Statistics With Technology, Second Edition, is

an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation of data is more important than how to compute basic statistical values.

Fostering Integrity in Research National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Committee on Science, Engineering, Medicine, and Public Policy,Committee on Responsible Science,2018-01-13 The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in

every step of the research process. Understanding the dynamics that support â or distort â practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. The 1992 report *Responsible Science: Ensuring the Integrity of the Research Process* evaluated issues related to scientific responsibility and the conduct of research. It provided a valuable service in describing and analyzing a very complicated set of issues, and has served as a crucial basis for thinking about research integrity for more than two decades. However, as experience has accumulated with various forms of research misconduct, detrimental research practices, and other forms of misconduct, as subsequent empirical research has revealed more about the nature of scientific misconduct, and because technological and social changes have altered the environment in which science is conducted, it is clear that the framework established more than two decades ago needs to be updated. *Responsible Science* served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process. *Fostering Integrity in Research* identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and

detrimental research practices.

Neoliberal Apartheid Andy Clarno,2017-03-07 This is the first comparative analysis of the political transitions in South Africa and Palestine since the 1990s. Clarno s study is grounded in impressive ethnographic fieldwork, taking him from South African townships to Palestinian refugee camps, where he talked to a wide

array of informants, from local residents to policymakers, political activists, business representatives, and local and international security personnel. The resulting inquiry accounts for the simultaneous development of extreme inequality, racialized poverty, and advanced strategies for securing the powerful and policing the poor in South Africa and Palestine/Israel over the last 20 years. Clarno places these transitions in a global context while arguing that a new form of neoliberal apartheid has emerged in both countries. The width and depth of Clarno's research, combined with wide-ranging first-hand accounts of realities otherwise difficult for researchers to access, make *Neoliberal Apartheid* a path-breaking contribution to the study of social change, political transitions, and security dynamics in highly unequal societies. Take one example of Clarno's major themes, to wit, the issue of security. Both places have generated advanced strategies for securing the powerful and policing the racialized poor. In South Africa, racialized anxieties about black crime shape the growth of private security forces that police poor black South Africans in wealthy neighborhoods. Meanwhile, a discourse of Muslim terrorism informs the coordinated network of security forces involving Israel, the United States, Jordan, and the

Palestinian Authority that polices Palestinians in the West Bank. Overall, Clarno's pathbreaking book shows how the shifting relationship between racism, capitalism, colonialism, and empire has generated inequality and insecurity, marginalization and securitization in South Africa, Palestine/Israel, and other parts of the world.

The Expanding News Desert Penelope Muse

Abernathy, 2018-11-15 This report delves into the implications for communities at risk of losing their primary source of credible news. By documenting the shifting news landscape and evaluating the threat of media deserts, this report seeks to raise awareness of the role interested parties can play in addressing the challenges confronting local news and democracy. *The Expanding News Desert* documents the continuing loss of papers and readers, the consolidation in the industry, and the social, political and economic consequences for thousands of communities throughout the country. It also provides an update on the strategies of the seven large investment firms--hedge and pension funds, as well as private and publicly traded equity groups--that swooped in to purchase hundreds of newspapers in recent years and explores the

indelible mark they have left on the newspaper industry during a time of immense disruption.
