*Tactical Biopolitics* Beatriz Da Costa,Kavita Philip,2010-08-13 Scientists, scholars, and artists consider the political significance of recent advances in the biological sciences. Popular culture in this “biological century” seems to feed on proliferating fears, anxieties, and hopes around the life sciences at a time when such basic concepts as scientific truth, race and gender identity, and the human itself are destabilized in the public eye. Tactical Biopolitics suggests that the political challenges at the intersection of life, science, and art are best addressed through a combination of artistic intervention, critical theorizing, and reflective practices. Transcending disciplinary boundaries, contributions to this volume focus on the political significance of recent advances in the biological sciences and explore the possibility of public participation in scientific discourse, drawing on research and practice in art, biology, critical theory, anthropology, and cultural studies. After framing the subject in terms of both biology and art, Tactical Biopolitics discusses such topics as race and genetics (with contributions from leading biologists Richard Lewontin and Richard Levins); feminist bioscience; the politics of scientific expertise; bioart and the public sphere (with an essay by artist Claire Pentecost); activism and public health (with an essay by Treatment Action Group co-founder Mark Harrington); biosecurity after 9/11 (with essays by artists' collective Critical Art Ensemble and anthropologist Paul Rabinow); and human-animal interaction (with a framing essay by cultural theorist Donna Haraway). Contributors Gaymon Bennett, Larry Carbone, Karen Cardozo, Gary Cass, Beatriz da Costa, Oron Catts, Gabriella Coleman, Critical Art Ensemble, Gwen D'Arcangelis, Troy Duster, Donna Haraway, Mark Harrington, Jens Hauser, Kathy High, Fatimah Jackson, Gwyneth Jones, Jonathan King, Richard Levins, Richard Lewontin, Rachel Mayeri, Sherie McDonald, Claire Pentecost, Kavita Philip, Paul Rabinow, Banu Subramanian, subRosa, Abha Sur, Samir Sur, Jacqueline Stevens, Eugene Thacker, Paul Vanouse, Ionat Zurr

**An Old-Fashioned Girl** Louisa May Alcott,2023-10-09 An Old-Fashioned Girl tells the story of Polly Milton, a young girl from the countryside who goes to visit her wealthy and sophisticated friends in the city. The novel is structured in two parts, with the first part focusing on Polly's childhood visit and the second part on her experiences as a young woman. In the first part, Polly stays with the Shaw family, including Tom, Maud, and Fanny. She is initially seen as old-fashioned and unsophisticated compared to her more fashionable city friends. However, her kindness, honesty, and good-hearted nature soon win over the Shaw family, and she becomes a beloved member of their household. The novel explores the contrast between Polly's simple, virtuous upbringing and the more worldly values of her city friends. Polly's influence on the Shaws and her ability to maintain her integrity in the face of societal pressures serve as central themes. In the second part of the book, Polly returns to the city as a young woman, and the story follows her experiences as she navigates the challenges of adulthood, including romance, career aspirations, and the importance of staying true to oneself. Polly's character development is a central focus as she matures and finds her place in the world. An Old-Fashioned Girl is known for its moral and ethical themes, as well as its portrayal of the importance of character and virtue. It contrasts the values of simplicity and authenticity with the superficiality of social conventions. The novel also explores themes of friendship, love, and the pursuit of happiness. Louisa May Alcott's An Old-Fashioned Girl is a charming and heartwarming coming-of-age story that continues to resonate with readers for its timeless lessons and the enduring appeal of its characters.

*Cleanliness and Culture* Jean Gelman Taylor,2011 Contributors explore cleanliness and hygiene in Indonesian culture, from policing the habits of homosexuals in the Netherlands Indies in the 1930s to tropical spa cultures.

*Deep Time of the Media* Siegfried Zielinski,2008-02-15 A quest to find something new by excavating the deep time of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of dreamers and modelers of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. Media are spaces of action for constructed attempts to connect what is separated, Zielinski writes. He describes models and

machines that make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the deep time media history shed light on today's media landscape and may help us map our expedition to the media future.

**Climatic Variability in Sixteenth-Century Europe and Its Social Dimension** Christian Pfister,Rudolf Brázdil,Rüdiger Glaser,2013-03-14 A multidecadal cooling is known to have occurred in Europe in the final decades of the sixteenth-century. It is still open to debate as to what might have caused the underlying shifts in atmospheric circulation and how these changes affected societies. This book is the fruit of interdisciplinary cooperation among 37 scientists including climatologists, hydrologists, glaciologists, dendroclimatologists, and economic and cultural historians. The known documentary climatic evidence from six European countries is compared to results of tree-ring studies. Seasonal temperature and precipitation are estimated from this data and monthly mean surface pressure patterns in the European area are reconstructed for outstanding anomalies. Results are compared to fluctuations of Alpine glaciers and to changes in the frequency of severe floods and coastal storms. Moreover, the impact of climate change on grain prices and wine production is assessed. Finally, it is convincingly argued that witches at that time were burnt as scapegoats for climatic change.

**Pirate Modernity** Ravi Sundaram,2009-07-30 Using Delhi's contemporary history as a site for reflection, Pirate Modernity moves from a detailed discussion of the technocratic design of the city by US planners in the 1950s, to the massive expansions after 1977, culminating in the urban crisis of the 1990s. As a practice, pirate modernity is an illicit form of urban globalization. Poorer urban populations increasingly inhabit non-legal spheres: unauthorized neighborhoods, squatter camps and bypass legal technological infrastructures (media, electricity). This pirate culture produces a significant enabling resource for subaltern populations unable to enter the legal city. Equally, this is an unstable world, bringing subaltern populations into the harsh glare of permanent technological visibility, and attacks by urban elites, courts and visceral media industries. The book examines contemporary Delhi from some of these sites: the unmaking of the city's modernist planning design, new technological urban networks that bypass states and corporations, and the tragic experience of the road accident terrifyingly enhanced by technological culture. Pirate Modernity moves between past and present, along with debates in Asia, Africa and Latin America on urbanism, media culture, and everyday life. This pioneering book suggests cities have to be revisited afresh after proliferating media culture. Pirate Modernity boldly draws from urban and cultural theory to open a new agenda for a world after media urbanism.

*Faraway Ranch Special History Study, Chiricahua National Monument* Elizabeth Wegman-French,2006

**The Holocaust and European Societies** Frank Bajohr,Andrea Löw,2016-11-30 This book explores the Holocaust as a social process. Although the mass murder of European Jews was essentially the result of political-ideological decisions made by the Nazi state leadership, the events of the Holocaust were also part of a social dynamic. All European societies experienced developments that led to the social exclusion, persecution and murder of the continent's Jews. This volume therefore questions Raul Hilberg's category of the 'bystander'. In societies where the political order expects citizens to endorse the exclusion of particular groups in the population, there cannot be any completely uninvolved bystanders. Instead, this book examines the multifarious forms of social action and behaviour connected with the Holocaust. It focuses on institutions and persons, helpers, co-perpetrators, facilitators and spectators, beneficiaries and profiteers, as well as Jewish victims and Jewish organisations trying to cope with the dynamics of exclusion and persecution.

**Business Performance Measurement and Management** Paolo Taticchi,2010-01-22 Measuring and managing the performance of a business is one of the most genuine desires of management. Balanced scorecard, the performance prism and activity-based management are the most popular frameworks in this setting. Based on the findings of R.G. Eccles' acclaimed Performance Measurement Manifesto (1991) this book introduces new contexts and themes of application and presents emerging research areas related to business performance measurement and management, e.g. SMEs and sustainability. As a result of the 1st International Summer School Piero Lunghi on Perspectives of Business Performance Management this book is written both for students and academics, as well as for practitioners looking for new, yet proven ways to measure and manage business performance.

**Literature after 9/11** Ann Keniston,Jeanne Follansbee Quinn,2013-04-15 Drawing on trauma theory, genre theory, political theory, and theories of postmodernity, space, and temporality, Literature After 9/11 suggests ways that these often distinct discourses can be recombined and set into dialogue with one another as it explores 9/11's effects on literature and literature's attempts to convey 9/11.

**The Bios Companion** Phil Croucher,2001 This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

**Cultural Techniques** Jörg Dünne,Kathrin Fehringer,Kristina Kuhn,Wolfgang Struck,2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine —from a variety of disciplinary perspectives—the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and operations. These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order. Ranging from manual and philological paper work to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors.

**Understanding Nature** Hub Zwart,2008-01-29 Science is not the only route to understanding nature. This volume presents a series of case studies in comparative epistemology, critically comparing the works of prominent representatives of the life sciences, such as Aristotle, Darwin, and Mendel, with the writings of literary masters, such as Andersen, Melville, Verne, and Ibsen. It constitutes a major contribution to the growing field of science and literature studies.
