Friedrich Nietzsche (1844-1900) Jürgen Backhaus,Wolfgang Drechsler,2006-10-11 Friedrich Nietzsche's influence on the development of modern social sciences has not been well documented. This volume reconsiders some of Nietzsche's writings on economics and the science of state, pioneering a line of research up to now unavailable in English. The authors intend to provoke conversation and inspire research on the role that this much misunderstood philosopher and cultural critic has played – or should play – in the history of economics.

World Report on Ageing and Health World Health Organization,2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

The Value of an Archaeological Open-air Museum is in Its Use Roeland Paardekooper,2012 There are about 300 archaeological open-air museums in Europe, which do more than simply present (re)constructed outdoor sceneries based on archaeology. They have an important role as education facilities and many showcase archaeology in a variety of ways. This research assesses the value of archaeological open-air museums, their management and their visitors, and is the first to do so in such breadth and detail. After a literature study and general data collection among 199 of such museums in Europe, eight archaeological open-air museums from different countries were selected as case studies. Management and visitors have different perspectives leading to different priorities and appreciation levels. The studies conclude with recommendations, ideas and strategies which are applicable not just to the eight archaeological open-air museums under study, but to any such museum in general. The recommendations are divided into the six categories of management, staff, collections, marketing, interpretation and the visitors.

Fundamentals of Solar Cell Design Inamuddin,Mohd Imran Ahamed,Rajender Boddula,Mashallah Rezakazemi,2021-08-24 Solar cells are semiconductor devices that convert light photons into electricity in photovoltaic energy conversion and can help to overcome the global energy crisis. Solar cells have many applications including remote area power systems, earth-orbiting satellites, wristwatches, water pumping, photodetectors and remote radiotelephones. Solar cell technology is economically feasible for commercial-scale power generation. While commercial solar

cells exhibit good performance and stability, still researchers are looking at many ways to improve the performance and cost of solar cells via modulating the fundamental properties of semiconductors. Solar cell technology is the key to a clean energy future. Solar cells directly harvest energy from the sun's light radiation into electricity are in an ever-growing demand for future global energy production. Solar cell-based energy harvesting has attracted worldwide attention for their notable features, such as cheap renewable technology, scalable, lightweight, flexibility, versatility, no greenhouse gas emission, environment, and economy friendly and operational costs are quite low compared to other forms of power generation. Thus, solar cell technology is at the forefront of renewable energy technologies which are used in telecommunications, power plants, small devices to satellites. Aiming at large-scale implementation can be manipulated by various types used in solar cell design and exploration of new materials towards improving performance and reducing cost. Therefore, in-depth knowledge about solar cell design is fundamental for those who wish to apply this knowledge and understanding in industries and academics. This book provides a comprehensive overview on solar cells and explores the history to evolution and present scenarios of solar cell design, classification, properties, various semiconductor materials, thin films, wafer-scale, transparent solar cells, and so on. It also includes solar cells' characterization analytical tools, theoretical modeling, practices to enhance conversion efficiencies, applications and patents.

A Heart for the Work Claire L. Wendland,2010-10 Burnout is common among doctors in the West, so one might assume that a medical career in Malawi, one of the poorest countries in the world, would place far greater strain on the idealism that drives many doctors. But, as A Heart for the Work makes clear, Malawian medical students learn to confront poverty creatively, experiencing fatigue and frustration but also joy and commitment on their way to becoming physicians. The first ethnography of medical training in the global South, Claire L. Wendland's book is a moving and perceptive look at medicine in a world where the transnational movement of people and ideas creates both devastation and possibility. Wendland, a physician anthropologist, conducted extensive interviews and worked in wards, clinics, and operating theaters alongside the student doctors whose stories she relates. From the relative calm of Malawi's College of Medicine to the turbulence of training at hospitals with gravely ill patients and dramatically inadequate supplies, staff, and technology, Wendland's work reveals the way these young doctors engage the contradictions of their circumstances, shedding new light on debates about the effects of medical training, the impact of traditional healing, and the purposes of medicine.

IBM Data Center Networking: Planning for Virtualization and Cloud Computing Michele Girola,Marian Friedman,Mark Lewis,Alessio M. Tarenzio,IBM Redbooks,2011-05-09 The enterprise data center has evolved dramatically in recent years. It has moved from a model that placed multiple data centers closer to users to a more centralized dynamic model. The factors influencing this evolution are varied but can mostly be attributed to regulatory, service level improvement, cost savings, and manageability. Multiple legal issues regarding the security of data housed in the data center have placed security requirements at the forefront of data center architecture. As the cost to operate data centers has increased, architectures have moved towards consolidation of servers and applications in order to better utilize assets and reduce server sprawl. The more diverse and distributed the data center environment becomes, the more manageability becomes an issue. These factors have led to a trend of data center consolidation and resources on demand using technologies such as virtualization, higher WAN bandwidth technologies, and newer management technologies. The intended audience of this book is network architects and network administrators. In this IBM® Redbooks® publication we discuss the following topics: The current state of the data center network The business drivers making the case for change The unique capabilities and network requirements of system platforms The impact of server and storage consolidation on the data center network The functional overview of the main data center network virtualization and consolidation technologies The new data center network design landscape

Leclaire Cindy Reinhardt,2010 The Village of Leclaire was founded in 1890 as an experiment in cooperative living by St. Louis manufacturer N. O. Nelson. Small Victorian cottages with electric lights

and running water were built by Nelson's company and sold at near cost to promote home ownership. The innovative Leclaire factory buildings were described by reporter Nellie Bly as the ideal perfection of buildings for man to labor in, and workers were eligible for pension and profit-sharing opportunities. An educational building and clubhouse provided venues for a variety of programs including a kindergarten, guest speakers, social clubs, and concerts. A baseball diamond, bowling alley, and boating lake were also available to residents. Nelson believed that conflicts between labor and capital could be resolved if his workers' lives were fulfilling. His company town was nationally known for placing the welfare of his workers in high regard.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

A Catalogue of Manuscripts Known to Contain Old English Dry-Point Glosses Dieter Studer-Joho,2017-11-27 While quill and ink were the writing implements of choice in the Anglo-Saxon scriptorium, other colouring and non-colouring writing implements were in active use, too. The stylus, among them, was used on an everyday basis both for taking notes in wax tablets and for several vital steps in the creation of manuscripts. Occasionally, the stylus or perhaps even small knives were used for writing short notes that were scratched in the parchment surface without ink. One particular type of such notes encountered in manuscripts are dry-point glosses, i.e. short explanatory remarks that provide a translation or a clue for a lexical or syntactic difficulty of the Latin text. The present study provides a comprehensive overview of the known corpus of dry-point glosses in Old English by cataloguing the 34 manuscripts that are currently known to contain such glosses. A first general descriptive analysis of the corpus of Old English dry-point glosses is provided and their difficult visual appearance is discussed with respect to the theoretical and practical implications for their future study.

Livelihood and Landscape Change in Africa: Future Trajectories for Improved Well-Being under a Changing Climate Sheona Shackleton, Paul Hebinck,Chinwe Ifejika Speranza,Vanessa Masterson,Dian Spear,Maria Tengö,2019-10-08 This book is based on a Special Issue of the journal LAND that draws together a collection of 11 diverse articles at the nexus of climate change, landscapes, and livelihoods in rural Africa; all explore the links between livelihood and landscape change, including shifts in farming practices and natural resource use and management. The articles, which are all place-based case studies across nine African countries, cover three not necessarily mutually exclusive thematic areas, namely: smallholder farming livelihoods under new climate risk (five articles); long-term dynamics of livelihoods and landscape change and future trajectories (two articles); and natural resource management and governance under a changing climate, spanning forests, woodlands, and rangelands (four articles). The commonalities, key messages, and research gaps across the 11 articles are presented in a synthesis article. All the

case studies pointed to the need for an integrated and in-depth understanding of the multiple drivers of landscape and livelihood change and how these interact with local histories, knowledge systems, cultures, complexities, and lived realities. Moreover, where there are interventions (such as new governance systems, REDD+ or climate smart agriculture), it is critical to interrogate what is required to ensure a fair and equitable distribution of emerging benefits.
