Autonomous Horizons Greg Zacharias, 2019-04-05 Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way Forward* identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

A Few Streets More to Kensington Alex Sheremet, 2017-08-30 As a child, Artem escaped the Chernobyl disaster in the hope of finding solid ground. As an adult, he must now unearth it, and learn to disentangle his past from the trick of memory we must all succumb to. In this remembrance—real or imagined?—he will befriend hoodlums, indulge the sage advice of a local pimp, and betray and face betrayals before settling on his true goal: to become an artist in order to recreate a world that's disappearing with his childhood. Set against turn-of-the-millennium New York, *A Few Streets More to Kensington* deals with classic tropes of boyhood-nostalgia, curiosity, and the wars of self—now transposed to the streets of Brooklyn, and examined through an artist's reluctant gaze. Rich, melancholy, and contemplative, the tale subsists on the magic of the 1990s—even as it aims to transcend it, too.

What Every Employer Needs to Know about OSHA Recordkeeping Jayne Lowe, 1973

Attitudes Aren't Free James E. Parco, 2010-09 Attitudes Aren't Free:

Thinking Deeply about Diversity in the US Armed Forces emerged from a vision to collect essays from the brightest voices of experts across the range of contentious social issues to catalyze productive discussions between military members of all ranks and services. Forty-nine experts contributed to the following 29 chapters writing on the primary themes of religious expression, homosexuality, gender, race, and ethics. Chapters appearing in this volume passed the scrutiny of a double-blind peer-review by one or more referees from the board of reviewers. The chapters are largely written in a colloquial, intellectual op-ed fashion and capture a snapshot of the current discussions regarding a particular topic of interest to uniformed personnel,

policy makers, and senior leaders. Each section seeks to frame the spectrum of perspectives captured within the current debates and lines of argument. Authors were specifically asked not to address all sides of the issue, but rather to produce a well-reasoned argument explaining why they believe their well-known position on an issue is in the best interests of the military members and make specific recommendations about how best to address the policy issues from their perspective. The volume is arranged in four primary sections by theme: Religious Expression, Homosexuality, Race and Gender, and Social Policy Perspectives. Within each section, readers will find multiple chapters—each embracing a different perspective surrounding the section's theme. Thus, because of the unbalanced nature of many of the individual chapters, it is critically important that readers focus on the entire spectrum of perspectives presented within a section to ensure they have the context necessary to frame any single perspective. Diversity of opinion has been the hallmark of the United States since its dramatic birth in 1776 and has continued unfettered through today where we now have developed the most innovative and effective military the world has ever known. Thus, it is imperative that we continue to reflect upon the diversity of ideas about how best to formulate the right social policy to ensure our service members can most effectively execute their missions.

From the Mind to the Feet Lawrence A. Kuznar, Sarah Canna, Air University Press, 2011-02 The 12 essays in this volume examine the concept of intent in defense, security, and foreign-policy contexts. They provide operational and academic perspectives on measuring the intent of adversaries, including nation-states and nonstate actors, and understanding the relationship of intent to behavior. The essays apply the insights and methods of multiple

disciplines—anthropology, psychology, political science, neuroscience, and others—to the study of intent, for which there is currently no coherent body of research. As Lt Gen Robert Elder, USAF, retired, notes, we are good at estimating an adversary's capabilities but not as good at estimating his intent. To influence an adversary's behavior, we must understand the perception-to-intent-to-action dynamic that underlies his behavior. This collection of essays, which emerged from a Department of Defense Strategic Multilayer Assessment, provides perspectives for doing so. The authors represent multiple agencies and fields of study; some are academics, and some are military subject-matter experts. Their expertise includes decision and behavioral analysis, social psychology, warfare and military strategy, political behavior, applications of neuroscience to behavioral studies, foreign policy, and antiterrorism.

Defending Air Bases in an Age of Insurgency Shannon Caudill, Air University Press, 2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer

recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

Guidelines for Perinatal Care American Academy of Pediatrics, American College of Obstetricians and Gynecologists, 1997 This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their fetuses, and their neonates.

SBS John Parker, 2013-02-28 The men of the SBS are the maritime equivalent of their counterparts in the SAS; they are the elite of the British Special Forces and also the most secretive. Although SAS activity has been extensively documented, the SBS has remained in the state it prefers - a shadowy silhouette, with identities protected and missions kept from public view. Formed during the Second World War, when they took part in many daring raids (one of which was filmed as *The Cockleshell Heroes*), they were active in the jungle campaigns in the Far East, in the Falklands, the Gulf War and Bosnia. Since this seminal book was published in 1997, John Parker has been privy to much more inside information about the SBS's original operations and he brings the book right up to date with accounts of their exploits in East Timor, Somalia, Sierra Leone, Kosovo and most recently in Iraq.

Unity of Mission Melanne A Civic, Air University Press, Jon Gundersen, 2019-07-20 While much has been written about civilian-military teams in Vietnam and, most recently, in Iraq and Afghanistan, the subject has not been addressed in a single, comprehensive publication containing historical context and reflecting a broad diversity of views. It is the

intention of the coeditors of *Unity of Mission* to fill this gap. The authors are convinced that without unity among military and civilian actors, long-term mission success is difficult at best. They believe the essays contained in this volume attest to this assertion. They are also fully aware that civilian-military teams are not a silver bullet. Rather, at best, such teams serve as a useful tool in a more comprehensive security framework. Nevertheless, in an age of budgetary constraints, the need to coordinate military and civilian resources—hard, kinetic, and soft power—is clear. It is the opinion of the coeditors that civilian-military teams are critical to achieving the goals of sustainable peace, stability, and security.

Centralized Control and Decentralized Execution: a Catchphrase in Crisis?
Clint Hinote, 2012-07-23 The Air Force's master tenet of centralized control, decentralized execution is in danger of becoming dogma. Airmen have difficulty communicating the meaning of this phrase in a joint setting. This is partially due to our limited understanding of its history and the imprecise meaning of the words involved. Furthermore, the irregular conflicts in Afghanistan and Iraq (and the ongoing service debates in the Pacific) have demonstrated the need for a deeper understanding of this master tenet to advocate effectively for airpower solutions. We must get this right, as it is critical to maximizing airpower's potential. Getting it right, however, requires moving beyond sound bites and bumper stickers.

The Fusarium Laboratory Manual John F. Leslie, Brett A. Summerell, 2008-02-15 For the first time in over 20 years, a comprehensive collection of photographs and descriptions of species in the fungal genus *Fusarium* is available. This laboratory manual provides an overview of the biology of *Fusarium* and the techniques involved in the isolation, identification and

characterization of individual species and the populations in which they occur. It is the first time that genetic, morphological and molecular approaches have been incorporated into a volume devoted to *Fusarium* identification. The authors include descriptions of species, both new and old, and provide protocols for genetic, morphological and molecular identification techniques. The *Fusarium* Laboratory Manual also includes some of the evolutionary biology and population genetics thinking that has begun to inform the understanding of agriculturally important fungal pathogens. In addition to practical "how-to" protocols it also provides guidance in formulating questions and obtaining answers about this very important group of fungi. The need for as many different techniques as possible to be used in the identification and characterization process has never been greater. These approaches have applications to fungi other than those in the genus *Fusarium*. This volume presents an introduction to the genus *Fusarium*, the toxins these fungi produce and the diseases they can cause. "The *Fusarium* Laboratory Manual is a milestone in the study of the genus *Fusarium* and will help bridge the gap between morphological and phylogenetic taxonomy. It will be used by everybody dealing with *Fusarium* in the Third Millennium." --W.F.O. Marasas, Medical Research Council, South Africa

Principles and Recommendations for a Vital Statistics System United Nations. Statistical Office, 2014 The publication is an international standard on the design and operation of an efficient and accurate vital statistics system at national level. It provides guidelines on collection, compiling and disseminating vital statistics. More specifically it contains (a) basic principles for a vital statistics system; (b) uses of vital statistics and civil registration records; (c) topics to be covered in a vital statistics

system; (d) sources of vital statistics and how they function; (e) quality assurance in the vital statistics system and (f) strategies in improving civil registration and vital statistics systems in countries. It also informs policy makers and the general public on the importance of vital statistics and hence further improving the vital statistics system.

Best Practices in Data Cleaning Jason W. Osborne, 2013 Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of *Best Practices in Quantitative Methods* (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Bridging the Gulf: EU-GCC Relations at a Crossroads Silvia Colombo, 2014-05-27 Relations between the European Union (EU) and the Gulf Cooperation Council (GCC) are at a crossroads. After the derailment of the negotiations for the Free Trade Agreement (FTA) in 2008, the cooperation between the two regional blocs has remained low-key in a number of different areas, while the unprecedented changes that have taken place in North Africa and the Middle East, the common neighbourhood of the EU and the GCC, have not

led to a renewed, structured cooperation on foreign and security policy issues. This volume addresses the shortcomings and potential of EU-GCC relations by taking stock of their past evolution and by advancing policy recommendations as to how to revamp this strategic cooperation. In this light, it highlights the areas where greater room for manoeuvre exists in order to enhance EU-GCC relations, discusses the instruments available and sheds light on the features of the regional and international context that are likely to significantly influence the new phase in the mutual relation between the two blocs. The book is the result of the research conducted in the framework of the project 'Sharaka - Enhancing Understanding and Cooperation in EU-GCC Relations' co-funded by the European Commission.

The Wicked Problem of Forest Policy William Nikolakis, John L. Innes, 2020-07-30 Provides a global analysis of policies to address deforestation, an important driver of climate change.

Beneficial Microorganisms in Food and Nutraceuticals Min-Tze Liong, 2015-12-11 This book discusses the use of microorganisms for improving nutrient quality and producing healthier foods. Conventional roles of microbes in food preservation and in producing more readily digestible nutrients via natural fermentation processes are also examined. Individual chapters explore topics such as bio-preservation, incorporation of lactic acid bacteria, traditional fermented Mongolian foods, fermented fish products of Sudan, probiotics in China, fermented soymilk, food colorants, and the effect of food on gut microbiota. Readers will gain insights into current trends and future prospects of functional foods and nutraceuticals. This volume will be of particular interest to scientists working in the fields of food sciences, microbiology, agriculture and public health.
