  PoC or GTFO Manul Laphroaig,2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker

Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

  Fireworks Algorithm Ying Tan,2015-10-11 This book is devoted to the state-of-the-art in all aspects of fireworks algorithm (FWA), with particular emphasis on the efficient improved versions of FWA. It describes the most substantial theoretical analysis including basic principle and implementation of FWA and modeling and theoretical analysis of FWA.   Mobile Unleashed Don Dingee,2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows

ARM as its founders launch their own company,
select a new leader, a new strategy, and find
themselves partnered with Apple, TI, Nokia, and
other companies just as digital technology starts
to unleash mobile devices. ARM grows rapidly, even
as other semiconductor firms struggle in the dot
com meltdown, and establishes itself as a standard
for embedded RISC processors. Apple aficionados
will find the opening of Part II of interest the
moment Steve Jobs returns and changes the
direction toward fulfilling consumer dreams.
Samsung devotees will see how that firm evolved
from its earliest days in consumer electronics and
semiconductors through a philosophical shift to
innovation. Qualcomm followers will learn much of
their history as it plays out from satellite
communications to development of a mobile phone
standard and emergence as a leading fabless
semiconductor company. If ARM could be summarized
in one word, it would be collaboration. Throughout
this story, from Foreword to Epilogue, efforts to
develop an ecosystem are highlighted. Familiar
names such as Google, Intel, Mediatek, Microsoft,
Motorola, TSMC, and others are interwoven
throughout. The evolution of ARM's first 25 years
as a company wraps up with a shift to its next
strategy: the Internet of Things, the ultimate
connector for people and devices. Research for
this story is extensive, simplifying a complex
mobile industry timeline and uncovering critical
points where ARM and other companies made fateful
and sometimes surprising decisions. Rare photos,
summary diagrams and tables, and unique
perspectives from insiders add insight to this

important telling of technology history.
