A briefe and true report of the new found land of Virginia (ed. by H. Stevens). Thomas Harriot, Henry Stevens,1900

To the Lighthouse Virginia Woolf,2023-06-27 Virginia Woolf's classic modernist novel, *To the Lighthouse*, draws from her own life and experiences. Hailed as one of the greatest works of modernist fiction, Virginia Woolf's semi-autobiographical novel about the Ramsay family explores the themes of perspective, interpersonal relationships, and the complexity of human experience. Woolf's use of shifting points of view in the narrative highlights how each person sees and experiences events in their own way. As conflict and grief impact the Ramsays throughout their time on Scotland's Isle of Skye, the reader is pulled into Woolf's own life.

Fantasies of the Library Anna-Sophie Springer,Etienne Turpin,2018-08-28 A book that acts both as library and exhibition space, selecting, arranging, and housing texts and images, aligning itself with printed matter in the process. *Fantasies of the Library* lets readers experience the library anew. The book imagines, and enacts, the library as both keeper of books and curator of ideas—as a platform of the future. One essay occupies the right-hand page of a two-page spread while interviews scrolls independently on the left. Bibliophilic artworks intersect both throughout the book-as-exhibition. A photo essay, “Reading Rooms Reading Machines” further interrupts the book in order to display images of libraries (old and

new, real and imagined), and readers (human and machine) and features work by artists including Kader Atta, Wafaa Bilal, Mark Dion, Rodney Graham, Katie Paterson, Veronika Spierenburg, and others. The book includes an essay on the institutional ordering principles of book collections; a conversation with the proprietors of the Prelinger Library in San Francisco; reflections on the role of cultural memory and the archive; and a dialogue with a new media theorist about experiments at the intersection of curatorial practice and open source ebooks. The reader emerges from this book-as-exhibition with the growing conviction that the library is not only a curatorial space but a bibliological imaginary, ripe for the exploration of consequential paginated affairs. The physicality of the book—and this book—“resists the digital,” argues coeditor Etienne Turpin, “but not in a nostalgic way.” Contributors Erin Kissane, Hammad Nasar, Megan Shaw Prelinger, Rick Prelinger, Anna-Sophie Springer, Charles Stankievech, Katharina Tauer, Etienne Turpin, Andrew Norman Wilson, Joanna Zylinska

Introduction to Controlled Vocabularies Patricia Harpring, 2010-04-13 This detailed book is a “how-to” guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

On Their Own Terms Benjamin A. ELMAN, 2009-06-30 Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries, under the influence of both Jesuit and Protestant missionaries. In the end, he argues, the Chinese produced modern science on their own terms.
