The Wal-Mart Revolution Richard K. Vedder, Wendell Cox, 2006 Wal-Mart is under attack--from labor unions, urban planners, globalization critics, and community activists. Looking at Wal-Mart, the authors review conditions before and after Wal-Mart entered a local market and look more broadly at Wal-Mart's impact on wages, productivity growth and inflation. Vedder and Cox show that the retailer has been a force for good.

The Helian ,1966 Mariana Scott, poet and translator of Hofmannsthal, Meyrink, Celan, and others, translates the eight-century Old Saxon Heliand into its original meter in this work originally published in 1966. This anonymous masterpiece presents the life of Christ and affords an excellent insight into medieval life.

Fantasy and Science Fiction Medievalisms: From Isaac Asimov to A Game of Thrones - Student Edition Helen Young, 2015-07-30 Note: this is an abridged version of the book with references removed. The complete edition is also available on this website. From advertisements to amusement parks, themed restaurants, and Renaissance fairs twenty-first century popular culture is strewn with reimaginings of the Middle Ages. They are nowhere more prevalent, however, than in the films, television series, books, and video games of speculative genres: fantasy and science fiction. Peter Jackson's The Lord of the Rings and The Hobbit film trilogies and George R. R. Martin's multimedia Game of Thrones franchise are just two of the most widely known and successful fantasy conglomerates of recent decades. Medievalism has often been understood as a defining feature of fantasy, and as the antithesis of science fiction, but such constructs vastly underestimate the complexities of both genres and their interactions. Medieval has multiple meanings in fantasy and science fiction, which shift with genre convention, and which bring about their own changes as authors and audiences engage with what has gone before in the recent and deeper pasts. Earlier volumes have examined some of the ways in which contemporary popular culture re-imagines the Middle Ages, offering broad overviews, but none considers fantasy, science fiction, or the two together. The focused approach of this collection provides a directed pathway into the myriad medievalisms of modern popular culture. By engaging directly with genre(s), this book acknowledges that medievalist creative texts and practices do not occur in a vacuum, but are shaped by multiple cultural forces and concerns; medievalism is never just about the Middle Ages.

Legends II: Shadows, Gods, and Demons Robin Hobb, Anne McCaffrey, Raymond E. Feist, Neil Gaiman, 2004-10-26 The first of two volumes of original short novels by some of the greatest writers in fantasy fiction, including Neil Gaiman, Anne McCaffrey, Tad Williams, Robin Hobb, Robert Silverberg, and Raymond E. Feist Legends II picks up where its illustrious predecessor left off. All of the bestselling writers represented in Legends II return to the special universe of the imagination that its author has made famous throughout the world. Whether set before or after events already recounted elsewhere, whether featuring beloved characters or compelling new creations, these masterful short novels are both mesmerizing stand-alones--perfect introductions to the work of their authors--and indispensable additions to the epics on which they are based. ROBIN HOBB returns to the Realm of the Elderlings with "Homecoming," a powerful tale in which exiles sent to colonize the Cursed Shores find themselves sinking into an intoxicating but deadly dream . . . or is it a memory? ROBERT SILVERBERG spins an enthralling tale of Majipoor's early history--and remote future--as seen through the eyes of a dilettantish poet who discovers an unexpected destiny in "The Book of Changes." TAD WILLIAMS explores the strange afterlife of Orlando Gardiner, from his Otherland saga, in "The Happiest Dead Boy in the World." ANNE McCAFFREY shines a light into the most mysterious and wondrous of all places on Pern in the heartwarming "Beyond Between." RAYMOND E. FEIST turns from the great battles of the Riftwar to the story of one soldier, a young man about to embark on the ride of his life, in "The Messenger." NEIL GAIMAN gives us a glimpse into what befalls the man called Shadow after the events of his Hugo Award-winning novel American Gods in "The Monarch of the Glen."

Hackers Beware Eric Cole, 2002 Discusses the understanding, fears, courts, custody, communication, and problems that young children must face and deal with when their parents get a divorce.

Gilgamesh ,2003-07-08 National Book Award Finalist: The most widely read and enduring interpretation of this ancient Babylonian epic. One of the oldest and most universal stories known in literature, the epic of Gilgamesh presents the grand, timeless themes of love and death, loss and reparations, within the stirring tale of a hero-king and his doomed friend. A National Book Award finalist, Herbert Mason's retelling is at once a triumph of scholarship, a masterpiece of style, and a labor of love that grew out of the poet's long affinity with the original. "Mr. Mason's version is the one I would recommend to the first-time reader." --Victor Howes, The Christian Science Monitor "Like the Tolkien cycle, this poem will be read with profit and joy for generations to come." --William Alfred, Harvard University

Feminist Solutions for Ending War Megan Hazel MacKenzie, Nicole Wegner, 2021 'War is a man's game, ' or so goes the saying. Whether this is true or not, patriarchal capitalism is certainly one of the driving forces behind war in the modern era. So can we end war with feminism? This book argues that this is possible, and is in fact already happening. Each chapter provides a solution to war using innovative examples of how feminist and queer theory and practice inform pacifist treaties, movements and methods, from the international to the domestic spheres. The contributors propose a range of solutions that include arms abolition, centring Indigenous knowledge, economic restructuring, and transforming how we 'count' civilian deaths. Ending war requires challenging complex structures, but the solutions found in this edition have risen to this challenge. By thinking beyond the violence of the capitalist patriarchy, this book makes the powerful case that the possibility of life without war is real.

The Middle Ages in Popular Imagination Paul B. Sturtevant, 2018-02-28 It is often assumed that those outside of academia know very little about the Middle Ages. But the truth is not so simple. Non-specialists in fact learn a great deal from the myriad medievalisms - post-medieval imaginings of the medieval world - that pervade our everyday culture. These, like Lord of the Rings or Game of Thrones, offer compelling, if not necessarily accurate, visions of the medieval world. And more, they have an impact on the popular imagination, particularly since there are new medievalisms constantly being developed, synthesised and remade. But what does the public

really know? How do the conflicting medievalisms they consume contribute to their knowledge? And why is this important? In this book, the first evidence-based exploration of the wider public's understanding of the Middle Ages, Paul B. Sturtevant adapts sociological methods to answer these important questions. Based on extensive focus groups, the book details the ways - both formal and informal - that people learn about the medieval past and the many other ways that this informs, and even distorts, our present. In the process, Sturtevant also sheds light, in more general terms, onto the ways non-specialists learn about the past, and why understanding this is so important. The Middle Ages in Popular Imagination will be of interest to anyone working on medieval studies, medievalism, memory studies, medieval film studies, informal learning or public history.

Qualities of food Mark Harvey,Andrew McMeekin,Alan Warde,2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. In this book, the complexity and the significance of the foods we eat are analysed from a variety of perspectives, by sociologists, economists, geographers and anthropologists. Chapters address a number of intriguing questions: how do people make judgments about taste? How do such judgments come to be shared by groups of people?; what social and organisational processes result in foods being certified as of decent or proper quality? How has dissatisfaction with the food system been expressed? What alternatives are thought to be possible? The multi-disciplinary analysis of this book explores many different answers to such questions. The first part of the book focuses on theoretical and conceptual issues, the second part considers processes of formal and informal regulation, while the third part examines social and political responses to industrialised food production and mass consumption. Qualities of food will be of interest to researchers and students in all the social science disciplines that are concerned with food, whether marketing, sociology, cultural studies, anthropology, human nutrition or economics.

Irrationality Stuart Sutherland,2007 Why do qualified professional make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

Framing the Global Economic Downturn Paul 't Hart,Karen Tindall,2009-09-01 The global economic downturn that followed the collapse of major US financial institutions is no doubt the most significant crisis of our times. Its effects on corporate and governmental balance sheets have been devastating, as have been its impacts on the employment and well being of tens of millions of citizens. It continues to pose major challenges to national policymakers and institutions around the world. Managing public uncertainty and anxiety is vital in coping with financial crises. This requires not just prompt action but, most of all, persuasive communication by government leaders. At the same time, the very occurrence of such crises raises acute questions about the effectiveness and robustness of current government policies and institutions. With the stakes being so high, defining and interpreting what is going on, how and why it happened, and what ought to be done now become key questions in the political and policy struggles that crises invariably unleash. In this volume, we study how heads of government, finance ministers and national bank governors in eight countries as well as the EU engage in such 'framing contests', and how their attempts to interpret the cascading events of the economic downturn were publicly received. Using systematic content analysis of speeches and media coverage, this volume offers a unique comparative assessment of public leadership in times of crisis.

Jesus: A Very Short Introduction Richard Bauckham,2011-07-28 Bauckham shows that Jesus was devoted to the God of Israel, with a special focus on God's fatherly love and compassion, and like every Jewish teacher he expounded the Torah, but did so in his own distinctive way.

Forerunners of the Reformation Heiko A. Oberman,2003-05 Oberman's magisterial work transfers discussion of late medieval Christian thought from the private studies of the specialist to more general use and understanding, and explains the significance of the ideas of the time. Although this 'Late Medieval Reader' does not exhaust the riches of the period between the High Middle Ages and the Reformation era, it introduces the reader to aspects of such major themes as conciliarism, curialism, mysticism, scholasticism, the spirituality of the Devotio Moderna, and the impact of Renaissance humanism.The theme of the Forerunners has grown out of the consideration that the justified rejection of a confessional reading of the past has been succeeded by an equally unhistorical disjunction of the Medieval and Reformation periods. Without a grasp of the fourteenth and fifteenth centuries, the medieval basis of modern thought is incomplete, since Reformation and Counter Reformation seem to arise 'out of the blue'.
