**IBM Power Systems Performance Guide:  
Implementing and Optimizing**

Dino Quintero, Sebastien Chabrolles, Chi Hui Chen, Murali Dhandapani, Talor Holloway, Chandrakant Jadhav, Sae Kee Kim, Sijo Kurian, Bharath Raj, Ronan Resende, Bjorn Roden, Niranjan Srinivasan, Richard Wale, William Zanatta, Zhi Zhang, IBM Redbooks, 2013-05-01 This IBM® Redbooks® publication addresses performance tuning topics to help leverage the virtualization strengths of the POWER® platform to solve clients' system resource utilization challenges, and maximize system throughput and capacity. We examine the performance monitoring tools, utilities, documentation, and other resources available to help technical teams provide optimized business solutions and support for applications running on IBM POWER systems' virtualized environments. The book offers application performance examples deployed on IBM Power Systems™ utilizing performance monitoring tools to leverage the comprehensive set of POWER virtualization features: Logical Partitions (LPARs), micro-partitioning, active memory sharing, workload partitions, and more. We provide a well-defined and documented performance tuning model in a POWER system virtualized environment to help you plan a foundation for scaling, capacity, and optimization . This book targets technical professionals (technical consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing solutions and support on IBM POWER systems, including performance tuning.

*Pandemic Exposures* Fassin Didier, Marion Fourcade, 2021-11 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds

with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

**Securities Market Issues for the 21st Century**

Merritt B. Fox, 2018

**Water Ethics** David Groenfeldt, 2013-10-01 This book introduces the idea that ethics are an intrinsic dimension of any water policy, program, or practice, and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management. Thus in controversies or conflicts over water resource allocation and use, an examination of ethics can help clarify the positions of conflicting parties as preparation for constructive negotiations. The author shows the benefits of exposing tacit values and motivations and subjecting these to explicit public scrutiny where the values themselves can be debated. The aim of such a process is to create the proverbial 'level playing field', where values favoring environmental sustainability are considered in relation to values favoring short-term exploitation for quick economic stimulus (the current problem) or quick protection from water disasters (through infrastructure which science

suggests is not sustainable). The book shows how new technologies, such as drip irrigation, or governance structures, such as river basin organizations are neither good nor bad in their own right, but can serve a range of interests which are guided by ethics. A new ethic of coexistence and synergies with nature is possible, but ultimately depends not on science, law, or finances but on the values we choose to adopt. The book includes a wide range of case studies from countries including Australia, India, Philippines, South Africa and USA. These cover various contexts including water for agriculture, urban, domestic and industrial use, the rights of indigenous people and river, watershed and ecosystem management.

**Financial Report, 1976** United States. Energy Research and Development Administration, 1976

**Hatred in the Hallways** Michael Bochenek, A. Widney Brown, 2001 Methods.

*Resampling Methods* Phillip I. Good, Philip Good, 2013-03-14 ...the author has packaged an excellent and modern set of topics around the development and use of quantitative models...the author has the capability to work at a more modest level. He does that very effectively in this 2nd Edition... If you need to learn about resampling, this book would be a good place to start. --  
*Technometrics* This work is a practical, table-free introduction to data analysis using the bootstrap, cross-validation, and permutation tests; new to the second edition are several additional examples and a chapter dedicated to regression, data mining techniques, and their limitations. The book's many exercises, practical data sets, and use of free shareware make it an essential resource for students and teachers, as well as industrial statisticians, consultants, and research professionals.

*The Economics of Crowdfunding* Douglas

Cumming,Lars Hornuf,2018-01-30 This book focuses on various types of crowdfunding and the lessons learned from academic research. Crowdfunding, a new and important source of financing for entrepreneurs, fills a funding gap that was traditionally difficult to close. Chapters from expert contributors define and carefully evaluate the various market segments: donation-based and reward-based crowdfunding, crowdfinancing and crowdlending. They further provide an assessment of startups, market structure, as well as backers and investors for each segment. Attention is given to the theoretical and empirical findings from the recent economics and finance literature. Furthermore, the authors evaluate relevant regulatory efforts in several jurisdictions. This book will appeal to finance, entrepreneurship and legal scholars as well as entrepreneurs and platform operators.

**Targeted Therapies for Lung Cancer** Ravi

Salgia,2019-06-26 This book contextualizes translational research and provides an up to date progress report on therapies that are currently being targeted in lung cancer. It is now well established that there is tremendous heterogeneity among cancer cells both at the inter- and intra-tumoral level. Further, a growing body of work highlights the importance of targeted therapies and personalized medicine in treating cancer patients. In contrast to conventional therapies that are typically administered to the average patient regardless of the patient's genotype, targeted therapies are tailored to patients with specific traits. Nonetheless, such genetic changes can be disease-specific and/or target specific; thus, the book addresses these issues manifested in the somatically acquired genetic changes of the targeted gene. Each chapter is written by a leading medical oncologist who specializes in thoracic oncology and is devoted to a particular

target in a specific indication. Contributors provide an in-depth review of the literature covering the mechanisms underlying signaling, potential cross talk between the target and downstream signaling, and potential emergence of drug resistance.

**Handbook of Eudaimonic Well-Being** Joar Vittersø, 2016-10-18 This handbook presents the most comprehensive account of eudaimonic well-being to date. It brings together theoretical insights and empirical updates presented by leading scholars and young researchers. The handbook examines philosophical and historical approaches to the study of happy lives and good societies, and it critically looks at conceptual controversies related to eudaimonia and well-being. It identifies the elements of happiness in a variety of areas such as emotions, health, wisdom, self-determination, internal motivation, personal growth, genetics, work, leisure, heroism, and many more. It then places eudaimonic well-being in the larger context of society, addressing social elements. The most remarkable outcome of the book is arguably its large-scale relevance, reminding us that the more we know about the good way of living, the more we are in a position to build a society that can be supportive and offer opportunities for such a way of living for all of its citizens.

**Net Neutrality Compendium** Luca Belli, Primavera De Filippi, 2015-11-10 The ways in which Internet traffic is managed have direct consequences on Internet users' rights as well as on their capability to compete on a level playing field. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users' freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how does it

relates to human rights and free competition and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group, established under the aegis of the United Nations Internet Governance Forum (IGF).

**Textbook of Pharmacoepidemiology** Brian L.

Strom, Stephen E. Kimmel, 2013-05-13 The Textbook of Pharmacoepidemiology provides a streamlined text for evaluating the safety and effectiveness of medicines. It includes a brief introduction to pharmacoepidemiology as well as sections on data sources, methodology and applications. Each chapter includes key points, case studies and essential references. One-step resource to gain understanding of the subject of pharmacoepidemiology at an affordable price Gives a perspective on the subject from academia, pharmaceutical industry and regulatory agencies Designed for students with basic knowledge of epidemiology and public health Includes many case studies to illustrate pharmacoepidemiology in real clinical setting

**Unified Action Armed Forces (UNAAF)** United States. Joint Chiefs of Staff, 1987

**Corporate Restructuring** Michael

Pomerleano, William Shaw, 2005 In light of the periodic financial crises of the late 1990s, there has been a growing recognition of the need for a strategy to avoid and mitigate the severity of crises in the corporate sector, requiring the complementary efforts of policymakers, regulators, lawyers, insolvency experts and financiers. This publication examines the issue of corporate restructuring, drawing on case studies of corporate crises in Indonesia, Korea, Malaysia and Thailand among others; and discusses a range of

topics including the key role of governments in securing an enabling legal system, effective out-of-court workouts, supportive tax regimes, policy and regulatory initiatives to address systemic corporate problems.

**Blue Nippon** E. Taylor Atkins, 2001

**Access Controlled** Ronald Deibert, John Palfrey, Rafal Rohozinski, Jonathan Zittrain, 2010-04-02 Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a

combination of technical interrogation and field research methods.

### **Prioritizing Academic Programs and Services**

Robert C. Dickeson, 2010-01-26 Prioritizing Academic Programs and Services REVISED AND UPDATED

Increasing economic concerns make the new edition of this best-selling classic an invaluable resource for those who want and need to implement a proven step-by-step approach to reallocating resources in tough times. Thoroughly revised and updated, *Prioritizing Academic Programs and Services* includes new recommendations from the field, communication strategies for more successful campus implementation, a new section on the sources of hidden costs, and a Prioritization Process and Implementation workbook designed to help administrators avoid costly mistakes. This book includes access to additional content online, including models for prioritization from a variety of campuses. Based on the author's extensive consulting experience, this necessary and timely resource offers the best advice for addressing the current economic concerns affecting most colleges and universities. Praise for *Prioritizing Academic Programs and Services* For more than a decade, higher education leaders have turned to Dickeson's practical guide to academic program assessment. These newly expanded approaches are just in time for today's competitive environment. —SUZANNE SHIPLEY, president, Shepherd University

Dickeson provides a compelling rationale for program prioritization as well as a practical planning structure that promotes alignment between programs, resources, and university mission. Presidents and provosts can use his approach to frame campus discussions around the future of the institution and away from legacy programs whose time has passed. —KYLE R. CARTER, provost and senior vice chancellor, Western Carolina University

Dickeson's approach ensures that

critical decisions regarding academic programs and resource allocation are aligned with strategic goals and institutional mission. As one of the early adopters of the process that he proposes, I am convinced that it is a powerful and practical tool for any college or university committed to remaining focused, resilient, vital, and relevant in a dynamic and increasingly challenging environment. -DAVID MAXWELL, president, Drake University

**European Security and Defence Policy** Esra Bulut, 2009 This book analyzes the first ten years of ESDP, from 1999 to 2009. It provides a comprehensive and detailed outline of different aspects of ESDP, including the ESDP institutions responsible for civilian and military crisis management; the civil and military resources available for ESDP operations; and the relationship between ESDP and the United Nations, NATO, the OSCE, and the African Union. ESDP operations, to date, are analyzed, and their implementation, challenges, and achievements are reviewed. It includes data on member state contributions to ESDP operations.

**Warfighting** Department of the Navy, U.S. Marine Corps, 2018-10 The manual describes the general strategy for the U.S. Marines but it is beneficial for not only every Marine to read but concepts on leadership can be gathered to lead a business to a family. If you want to see what make Marines so effective this book is a good place to start.

**Water Ethics** M. Ramon Llamas, L. Martinez Cortina, Aditi Mukherji, 2009-03-15 In the context of the current financial crisis, and at a time of deep global change, growing attention is paid to the global norms and ethical values that could underpin future global policy. Water is a key global resource. At the 3rd Marcelino Botin Foundation Water Workshop, held in Santander, Spain, June 12-14, 2007, the role of ethics in the

deep roots, values, and the potential commonalities of the global water policy were discussed. Experts from different cultural, geographic and religious backgrounds considered the different ethical points of view to enhance the debate on how ethical considerations can play a more significant and explicit role in water development and management. Common ground for all contributing authors was considered to be the UN Declaration of 1948, and more specifically the basic aspects related to water ethics: 1. the dignity of every human being and 2. the necessity of solidarity among all human beings. The book is divided in 8 sections which correspond to the papers presented at the Workshop: Some Cultural Traditional Approaches on Water Ethics Some Ethical Aspects of New Water Management Water as a Human Right and as an Economic Resource Water and Poverty Groundwater Use and its Ethical Aspects Ethics of Water Ownership and Management Corruption, Transparency and Participation in the Water Sector Ethical Aspects of Unforeseen and Extreme Events Management such as Floods and Droughts
