Modeling Creativity Tom De Smedt,2013-02-01 Modeling Creativity (doctoral thesis, 2013) explores how creativity can be represented using computational approaches. Our aim is to construct computer models that exhibit creativity in an artistic context, that is, that are capable of generating or evaluating an artwork (visual or linguistic), an interesting new idea, a subjective opinion. The research was conducted in 2008–2012 at the Computational Linguistics Research Group (CLiPS, University of Antwerp) under the supervision of Prof. Walter Daelemans. Prior research was also conducted at the Experimental Media Research Group (EMRG, St. Lucas University College of Art & Design Antwerp) under the supervision of Lucas Nijs. Modeling Creativity examines creativity in a number of different perspectives: from its origins in nature, which is essentially blind, to humans and machines, and from generating creative ideas to evaluating and learning their novelty and usefulness. We will use a hands-on approach with case studies and examples in the Python programming language.

Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from Advances in Nursing Science documenting a historical meta-perspective on middle range theory development Key Features: Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing’s theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016

Barnard, Michael Cohen, Rayna Denison, Martin Flanagan, Sophie Geoffroy-Menoux, Mel Gibson, Kerry Gough, Jonathan Gray, Craig Hight, Derek Johnson, Pascal Lefevre, Paul M. Malone, Neil Rae, Aldo J. Regalado, Jan van der Putten, and David Wilt In Film and Comic Books contributors analyze the problems of adapting one medium to another; the translation of comics aesthetics into film; audience expectations, reception, and reaction to comic book-based films; and the adaptation of films into comics. A wide range of comic/film adaptations are explored, including superheroes (Spider-Man), comic strips (Dick Tracy), realist and autobiographical comics (American Splendor; Ghost World), and photo-montage comics (Mexico's El Santo). Essayists discuss films beginning with the 1978 Superman. That success led filmmakers to adapt a multitude of comic books for the screen including Marvel's Uncanny X-Men, the Amazing Spider-Man, Blade, and the Incredible Hulk as well as alternative graphic novels such as From Hell, V for Vendetta, and Road to Perdition. Social Media in Industrial China Xinyuan Wang,2016-09-13 Life outside the mobile phone is unbearable.’ Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise ‘homeless’. Wang’s fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with ‘home’ – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Easy Language – Plain Language – Easy Language Plus Christiane Maaß,2020-09-11 This book shows how accessible communication, and especially easy-to-understand languages, should be designed in order to become instruments of inclusion. It examines two well-established easy-to-understand varieties: Easy Language and Plain Language, and shows that they have complementary profiles with respect to four central qualities: comprehensibility, perceptibility, acceptability and stigmatisation potential. The book introduces Easy and Plain Language and provides an outline of their linguistic, sociological and legal profiles: What is the current legal framework of Easy and Plain Language? What do the texts look like? Who are the users? Which other groups are involved in the production and use of Easy and Plain Language offers? Which qualities are a hazard to acceptability and, thus, enhance their stigmatisation potential? The book also proposes another easy-to-understand variety: Easy Language Plus. This variety balances the four qualities and is modelled in the present book.

The Boy Who Loved Windows Patricia Stacey,2008-11-06 In 1997, writer Patricia Stacey and her husband Cliff learned that their six-month-old son Walker might never walk or talk, or even hear or see. Unwilling to accept this grim prediction, they embarked on a five-year odyssey that took them into alternative medicine, the newest brain research, and toward a new and innovative understanding of autism. Finally their search led them to pioneering developmental psychiatrist Stanley Greenspan who helped them save their son and bring him into full contact with the world. This enthralling memoir, at once heart wrenching and hopeful, takes the reader into the life of one remarkable family willing to do anything to give their son a rich and emotionally full life. We stand witness as they struggle to elicit the first sign that Walker is connecting with them, and share in their fears, struggles, tiny victories, and eventual triumphs. The Boy Who Loved Windows is compelling and inspiring reading for parents and professionals who care for children with autism and other special needs. The book is also a stunning literary debut, of interest to anyone who cares about the lives of children and the passion of families who, against huge odds, put these children first.
