Food Fraud Prevention John W. Spink, 2019-10-18 This textbook provides both the theoretical and concrete foundations needed to fully develop, implement, and manage a Food Fraud Prevention Strategy. The scope of focus includes all types of fraud (from adulterant-substances to stolen goods to counterfeits) and all types of products (from ingredients through to finished goods at retail). There are now broad, harmonized, and thorough regulatory and standard certification requirements for the food manufacturers, suppliers, and retailers. These requirements create a need for a more focused and systematic approach to understanding the root cause, conducting vulnerability assessments, and organizing and implementing a Food Fraud Prevention Strategy. A major step in the harmonizing and sharing of best practices was the 2018 industry-wide standards and certification requirements in the Global Food Safety Initiative (GFSI) endorsed Food Safety Management Systems (e.g., BRC, FSSC, IFS, & SQF). Addressing food fraud is now NOT optional - requirements include implementing a Food Fraud Vulnerability Assessment and a Food Fraud Prevention Strategy for all types of fraud and for all products. The overall prevention strategy presented in this book begins with the basic requirements and expands through the criminology root cause analysis to the final resource-allocation decision-making based on the COSO principle of Enterprise Risk Management/ ERM. The focus on the root cause expands from detection and catching bad guys to the application of foundational criminology concepts that reduce the overall vulnerability. The concepts are integrated into a fully integrated and inter-connected management system that utilizes the Food Fraud Prevention Cycle (FFPC) that starts with a pre-filter or Food Fraud Initial Screening (FFIS). This is a comprehensive and all-encompassing textbook that takes an interdisciplinary approach to the most basic and most challenging questions of how to start, what to do, how much is enough, and how to measure success.

The Immigrant Exodus Vivek Wadhwa, 2012-10-02 A 2012 ECONOMIST BOOK OF THE YEAR Many of the United States' most innovative entrepreneurs have been immigrants, from Andrew Carnegie, Alexander Graham Bell, and Charles Pfizer to Sergey Brin, Vinod Khosla, and Elon Musk. Nearly half of Fortune 500 companies and one-quarter of all new small businesses were founded by immigrants, generating trillions of dollars annually, employing millions of workers, and helping establish the United States as the most entrepreneurial, technologically advanced society on earth. Now, Vivek Wadhwa, an immigrant tech entrepreneur turned academic with appointments at Duke, Stanford, Emory, and Singularity Universities, draws on his new Kauffman Foundation research to show that the United States is in the midst of an unprecedented halt in high-growth, immigrant-founded start-ups. He argues that increased competition from countries like China and India and US immigration policies are leaving some of the most educated and talented entrepreneurial immigrants with no choice but to take their innovation elsewhere. The consequences to our economy are dire; our multi-trillion dollar loss will be the gain of our global competitors. With his signature fearlessness and clarity, Wadhwa offers a concise framework for understanding the Immigrant Exodus and offers a recipe for reversal and rapid recovery.

Research Methods for Cyber Security Thomas W. Edgar, David O. Manz, 2017-04-19 Research Methods for Cyber Security teaches scientific methods for generating impactful knowledge, validating theories, and adding critical rigor to the cyber security field. This book shows how to develop a research plan, beginning by starting research with a question, then offers an introduction to the broad range of useful research methods for cyber security research: observational, mathematical, experimental, and applied. Each research method chapter concludes with recommended outlines and suggested templates for submission to peer reviewed venues. This book concludes with information on cross-cutting issues within cyber security research. Cyber security research contends with numerous unique issues, such as an extremely fast environment evolution, adversarial behavior, and the merging of natural and social science phenomena. Research Methods for Cyber Security addresses these concerns and much more by teaching readers not only the process of science in the context of cyber security research, but providing assistance in execution of research as well. Presents research methods from a cyber security science perspective Catalyzes the rigorous research necessary to propel the cyber security field forward Provides a guided method selection for the type of research being conducted, presented in the context of real-world usage

Strategies and Tools for a Sustainable Rural Rio de Janeiro Udo Nehren, Sabine Schl Lter, Claudia Raedig, Dietmar Sattler, Helga Hissa, 2018-08-16 This book is a compilation of recent developments in land, ecosystem, and water management in the Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development.

Microbiological Advancements for Higher Altitude Agro-Ecosystems & Sustainability Reeta Goel, Ravindra Soni, Deep Chandra Suyal, 2020-03-13 The book explores the challenges and opportunities associated with high-altitude agro-ecosystems and the factors that influence them. It discusses the various indigenous agricultural practices and approaches, as well as the microbiology of mountain & hill agro-ecosystems, providing a comprehensive overview of the various factors that control the microbiome at high altitudes. The contributions examine microbiological advances, such as use of "omics" technologies for hill agriculture and environmental sustainability, and explore the use of nanotechnology for agricultural and environmental sustainability at higher altitudes. The book also describes various aspects of low-temperature microbiology in the context of high-altitude farming and environmental sustainability.

Heroes and Villains David R. Marples,2007-01-01 Certain to engender debate in the media, especially in Ukraine itself, as well as the academic community. Using a wide selection of newspapers, journals, monographs, and school textbooks from different regions of the country, the book examines the sensitive issue of the changing perspectives? often shifting 180 degrees? on several events discussed in the new narratives of the Stalin years published in the Ukraine since the late Gorbachev period until 2005. These events were pivotal to Ukrainian history in the 20th century, including the Famine of 1932?33 and Ukrainian insurgency during the war years. This latter period is particularly disputed, and analyzed with regard to the roles of the OUN (Organization of Ukrainian Nationalists) and the UPA (Ukrainian Insurgent Army) during and after the war. Were these organizations freedom fighters or collaborators? To what extent are they the architects of the modern independent state? This excellent book fills a longstanding void in literature on the politics of memory in Eastern Europe. Professor Marples has produced an innovative and courageous study of how postcommunist Ukraine is rewriting its Stalinist and wartime past by gradually but inconsistently substituting Soviet models with nationalist interpretations. Grounded in an attentive reading of Ukrainian scholarship and journalism from the last two decades, this book offers a balanced take on such sensitive issues as the Great Famine of 1932-33 and the role of the Ukrainian nationalist insurgents during World War II. Instead of taking sides in the passionate debates on these subjects, Marples analyzes the debates themselves as discursive sites where a new national history is being forged. Clearly written and well argued, this study will make a major impact both within and beyond academia. - Serhy Yekelchyk, University of Victoria

Neo-Colonialism Kwame Nkrumah,2022-04-09 This is the book which, when first published in 1965, caused such an uproar in the US State Department that a sharp note of protest was sent to Kwame Nkrumah and the \$25million of American aid to Ghana was promptly cancelled.

Performance Based Planning and Programming Guidebook Michael Michael Grant, Janet D?Ignazio, Alexander Alexander Bond, Alanna Alanna McKeeman, 2015-06-06 ICF International and the U.S. Department of Transportation (USDOT), Federal Highway Administration (FHWA), and Federal Transit Administration (FTA), along with experts from the transportation industry, collaborated to produce the Performance-Based Planning and Programming Guidebook. Over the past two decades, transportation agencies have increasingly applied performance management-a strategic approach that uses performance data to support decisions to help achieve desired performance outcomes. Performance-based planning and programming (PBPP) refers to the application of performance management within planning and programming processes of transportation agencies to achieve desired performance outcomes for the multimodal transportation system. This guidebook describes the PBPP process and provides examples of effective practices to help practitioners advance these approaches in their own planning and programming activities.

Natural Resource Damages Preston, Thorgrimson, Shidler, Gates & Ellis,1993 This manual outlines the legal and regulatory framework surrounding natural resource damages claims. It provides comprehensive chapters on the common law origins of natural resource damage claims, statutory natural resource damage claims under federal law, CERCLA damage assessment regulations, and economic methodologies for valuing natural resource damages.

Mobile Unleashed Don Dingee,2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com

meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be collaboration. Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.
