Economics, Management and Sustainability Partha Ray,Runa Sarkar,Anindya Sen,2018-10-08 This book presents an eclectic mix of interesting new areas in the domain of economics, management and sustainability. Written by leading experts, it provides valuable food for thought, with essays introducing new lines of research and empirical research papers offering sound research methodology. The book not only provides answers, but also raises numerous interesting questions concerning the areas covered to whet readers' appetites to learn more. Professor Anup Sinha is a respected teacher and is a great mind with wide-ranging academic interests spanning from economics and sustainability to management. As well as in various other places in India and the US, he has taught at the Indian Institute of Management Calcutta and Presidency College (now a University) Calcutta for almost three decades. To commemorate his contributions, this festschrift presents a collection of essays that are broadly subdivided into four sections: Economic Development; Vulnerabilities and Inclusive Growth; Sustainability and Corporate Governance; and Innovation and Management.

International Complete Collection of R&D Information about Traditional Chinese Materia Medica and Biotechnology Enterprises Zhengsong Zhan,2010-04-01 The International Complete Collection of R&D Information about Traditional Chinese Materia Medica (TCMM) and Biotechnology (BT) Enterprises is designed as an informative medicinal reference directory listing of up-to-date R&D

information about TCMM, medical biotechnology, and related medical equipment companies. The focus of this valuable and practical directory is on providing a comprehensive coverage of the most recent developments in scientific research, patents and major products of about 3,000 companies from 50 countries covering the five continents: Asia, Europe, America, Africa and the Oceania. The resource material and information are relevant and compulsory to practitioners and professionals in the fields of TCMM, medical biotechnology, biochemical industry and related medical instrumentation/equipment, as well as to organizational departments of the medicinal information management, intelligence, logistics and trade. The directory also opens up and serves as an important window through which biotech professionals master product information of their counterparts across the world. The directory will benefit professionals of medical health, TCMM, biotechnology and related fields, as well as academics and students, executives of research, information media staffs and translators.

Epstein Dylan Howard, Melissa Cronin, James Robertson, 2019-12-03 This is—for the first time—the full and unedited story behind the sick life and mysterious death of Jeffrey Epstein that is being called one of the most significant scandals in American history. He was the billionaire financier and close confidant of presidents, prime ministers, movie stars and British royalty, the mysterious self-made man who rose from blue-collar Brooklyn to the heights of luxury. But while he was flying around the world on his private jet and hosting lavish parties at his private island in the Caribbean, he also was secretly masterminding an international child sex ring—one that may have involved the richest and most influential men in the world. The conspiracy of corruption was an open secret for decades. And then this summer, it all came crashing down. After his arrest on sex trafficking charges in July, it seemed Epstein's darkest secrets would finally see the light. But hopes for true justice were shattered on August 10 this year, when he was found dead in his cell at the Metropolitan Correctional Center, New

York. The verdict: suicide. The timing: convenient, to say the least. Now, Epstein: Dead Men Tell No Tales delivers bombshell new revelations, uncovers how the man President Trump once described as a “terrific guy” abused hundreds of underage girls at his mansions in Palm Beach and Manhattan... all while entertaining the world’s most powerful men—including President Clinton, Prince Andrew, and Donald Trump himself. How much did they know about his perversions? And did they take part? How might they have helped him to continue his abuse, and to escape justice for it? What responsibility might they have for his sudden, shocking death? And is there a shocking spy and blackmail story at the heart of the scandal? The answers to these questions and more will be explored in Epstein: Dead Men Tell No Tales with groundbreaking new reporting, never-before-seen court files, and interviews with new witnesses and confidants. Combining the very best investigative reporting from investigative journalists Dylan Howard, Melissa Cronin and James Robertson—who have been covering the case for close to a decade—will send shockwaves through the highest levels of the establishment.

XXXXX Xxxxx,Martin Howse,2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood,

a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Computer Graphics Through OpenGL® Sumanta Guha,2018-12-19 COMPREHENSIVE COVERAGE OF SHADERS AND THE PROGRAMMABLE PIPELINE From geometric primitives to

animation to 3D modeling to lighting, shading and texturing, Computer Graphics Through OpenGL®: From Theory to Experiments is a comprehensive introduction to computer graphics which uses an active learning style to teach key concepts. Equally emphasizing theory and practice, the book provides an understanding not only of the principles of 3D computer graphics, but also the use of the OpenGL® Application Programming Interface (API) to code 3D scenes and animation, including games and movies. The undergraduate core of the book takes the student from zero knowledge of computer graphics to a mastery of the fundamental concepts with the ability to code applications using fourth-generation OpenGL®. The remaining chapters explore more advanced topics, including the structure of curves and surfaces, applications of projective spaces and transformations and the implementation of graphics pipelines. This book can be used for introductory undergraduate computer graphics courses over one to two semesters. The careful exposition style attempting to explain each concept in the simplest terms possible should appeal to the self-study student as well. Features • Covers the foundations of 3D computer graphics, including animation, visual techniques and 3D modeling • Comprehensive coverage of OpenGL® 4.x, including the GLSL and vertex, fragment, tessellation and geometry shaders • Includes 180 programs with 270 experiments based on them • Contains 750 exercises, 110 worked examples, and 700 four-color illustrations • Requires no previous knowledge of computer graphics • Balances theory with programming practice using a hands-on interactive approach to explain the underlying concepts

When You Only See One Set of Footprints Darlene Jackson, 2012-03-01 As I was called, like Abraham, to leave my father's house and follow Christ, my journey would take me and my children to many places which God has caused us to Triumph in Christ Jesus. I was told to share my story and write the things I've seen and heard and lived through so others can know they too can do the same when they put ALL of their Trust in the Holy God of Israel. When You Only See One Set of Footprints is like an open letter to all Living Epistle, for my life has seen everyday living and living for Christ. To give people hope no matter where you are, He can be there, also to show my children and others what Faith looks like despite what people think it ought to look like, to give people hope and encouragement to follow God to the end. This was also a walk for the destroying of Generational Curse so my children (Donelle, Nathifa, Monae, Dominique, Nakeya, Simone), and now my grandson

(Nook, Nook), would not have to encounter because I have gone before them to destroy all curses in their path. To bring about transparency in this walk and to show We can come through all things through Christ who strengthens us, so may all be encouraged as well as inspired to continue in the faith and to fight the good fight of faith and know you fight not alone, for you too can see there were only one set of footprints. God Bless.
