The Places Where Community Is Practiced Anna Steigemann, 2019-02-25 In this open access publication, the social cohesion of urban neighborhoods and their residents is examined, which is often viewed as vulnerable since increased mobility, individualization, wider socio-economic and demographic changes have fundamentally altered the basis for everyday social interaction in urban neighborhoods. Anna Steigemann gives scholarly attention to the concrete places where neighborly interactions still take place and to how these interactions affect local community building. She illuminates and explores the ordinary everyday interactions and social practices in and around shops and gastronomic facilities on a shopping street in Berlin-Neukölln, revealing how these businesses are important places where community is practiced, but also why they are increasingly threatened by commercial and residential gentrification.

Microcontroller Basics Burkhard Kainka, 2005 Microcontrollers have become an indispensable part of modern electronics. They make things possible that vastly exceed what could be done previously. Innumerable applications show that almost nothing is impossible. There's thus every reason to learn more about them, but that raises the question of where to find a good introduction to this fascinating technology. The answer is easy: this Microcontroller Basics book, combined with the 89S8252 Flash Board project published by Elektor Electronics. However, this book offers more than just a basic introduction. It clearly explains the technology using various microcontroller circuits and programs written in several different programming languages. Three microcontrollers from the 8051 family are used in the sample applications, ranging from the simple 89C2051 to the AN2131, which is designed to support USB applications. The programming tools include assemblers, Basic-52 and BASCOM-51, and several C compilers. Every reader can thus find the programming environment most suitable to his or her needs. In the course of the book, the reader gradually develops increased competence in converting his or her ideas into microcontroller circuitry. All of the sample programs can be downloaded from the Elektor Electronics website. That has the added advantage that the latest versions are always available.

Effective Succession Planning William Rothwell, 2010-04-21 William Rothwell honored with the ASTD Distinguished Contribution Award in Workplace Learning and Performance. The definitive guide to a timely and timeless topic--now fully revised and updated. As baby boomers continue to retire en masse from executive suites, managerial offices, and specialized or technical jobs, the question is--who will take their places? This loss of valuable institutional memory has made it apparent that no organization can afford to be without a strong succession program. Now in its fourth edition, Effective Succession Planning provides the tools organizations need to establish, revitalize, or revise their own succession planning and management (SP&M) programs. The book has been fully updated to address challenges brought on by sea changes such as globalization, recession, technology, and the aftereffects of the terror attacks. It features new sections on identifying and assessing competencies and future needs; management vs. technical succession planning; and ethics and conduct; and new chapters on integrating recruitment and retention strategies with succession planning programs. This edition incorporates the results of two extensive new surveys, and includes a Quick Start guide to help begin immediate implementation as well as a CD-ROM packed with assessments, checklists, customizable guides, and other practical tools.

Vibrant and Healthy Kids National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach, 2019-12-27 Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

IBM TS7700 Release 3.3 Larry Coyne,Robert Beiderbeck,Katja Denefleh,Joe Hew,Sosuke Matsui,Aderson Pacini,Markus Schäfer,Michael Scott,Chen Zhu,IBM Redbooks,2017-04-11 Note: The IBM TS7700 Release 4.0 Guide, SG24-8366 is available at: <http://www.redbooks.ibm.com/abstracts/sg248366.html> IBM® TS7700 is a family of mainframe virtual tape solutions that optimize data protection and business continuance for IBM z Systems™ data. Through the use of virtualization and disk cache, the TS7700 family operates at disk speeds while maintaining compatibility with existing tape operations. Its fully integrated tiered storage hierarchy takes advantage of both disk and tape technologies to deliver performance for active data and best economics for inactive and archive data. This IBM Redbooks® publication describes the TS7700 R3.3 architecture, planning, migration, implementation, and operations. The latest TS7700 family of z Systems tape virtualization is offered as two models: IBM TS7720 features encryption-capable high-capacity cache that uses 3 TB SAS disk drives with RAID 6, which can scale to large capacities with the highest level of data protection. IBM TS7740 features encryption-capable 600 GB SAS drives with RAID 6 protection. Both models write data by policy to physical tape through attachment to high-capacity, high-performance IBM TS1150 and earlier IBM 3592 model tape drives that are installed in IBM TS3500 tape libraries. Physical tape support is optional on TS7720. TS7700 R3.3 also supports external key management for disk-based encryption by using IBM Security Key Lifecycle Manager. This book intended for system architects who want to integrate their storage systems for smoother operation.

Production Ergonomics Cecilia Berlin,Caroline Adams,2017-06-28 Production ergonomics - the science and practice of designing industrial workplaces to optimize human well-being and system performance - is a complex challenge for a designer. Humans are a valuable and flexible resource in any system of creation, and as long as they stay healthy, alert and motivated, they perform well and also become more competent over time, which increases their value as a resource. However, if a system designer is not mindful or aware of the many threats to health and system performance that may emerge, the end result may include inefficiency, productivity losses, low working morale, injuries and sick-leave. To help budding system designers and production engineers tackle these design challenges holistically, this book offers a multi-faceted orientation in the prerequisites for healthy and effective human work. We will cover physical, cognitive and organizational aspects of ergonomics, and provide both the individual human perspective and that of groups and populations, ending up with a look at global challenges that require workplaces to become more socially and economically sustainable. This book is written to give you a warm welcome to the subject, and to provide a solid foundation for improving industrial workplaces to attract and retain healthy and productive staff in the long run.

The Web of Violence Sherry Hamby,John Grych,2012-10-13 There is an increasing appreciation of the interconnections among all forms of violence. These interconnections have critical implications for conducting research that can produce valid conclusions about the causes and consequences of abuse, maltreatment, and trauma. The accumulated data on co-occurrence also provide strong evidence that prevention and intervention should be organized around the full context of individuals’ experiences, not narrowly defined subtypes of violence. Managing the flood of new research and practice innovations is a challenge, however. New means of communication and integration are needed to meet this challenge, and the Web of Violence is intended to contribute to this process by serving as a concise overview of the conceptual and empirical work that form a basis for understanding the interconnections across forms of violence throughout the lifespan. It also offers ideas and directions for prevention, intervention, and public policy. A number of initiatives are emerging to integrate the findings on co-occurrence into research and action. The American Psychological Association established a new journal, Psychology of Violence, which is a forum for research on all types of violence. Sherry Hamby is the founding editor and John Grych is associate editor and co-editor of a special issue on the co-occurrence of violence in 2012. Dr. Hamby also is a co-investigator of the National Survey of Children’s Exposure to Violence (NatSCEV), which has drawn attention to polyvictimization. Polyvictimization is a focus of the U.S. Department of Justice’s Defending Childhood Initiative and has recently been featured in calls for grant proposals by the Office of Victims of Crime and National Institutes for Justice.
