Disturbing the Universe Roberta S. Trites,1998-04-01 The Young Adult novel is ordinarily characterized as a coming-of-age story, in which the narrative revolves around the individual growth and maturation of a character, but Roberta Trites expands this notion by chronicling the dynamics of power and repression that weave their way through YA books. Characters in these novels must learn to negotiate the levels of power that exist in the myriad social institutions within which they function, including family, church, government, and school. Trites argues that the development of the genre over the past thirty years is an outgrowth of postmodernism, since YA novels are, by definition, texts that interrogate the social construction of individuals. Drawing on such nineteenth-century precursors as *Little Women* and *Adventures of Huckleberry Finn*, *Disturbing the Universe* demonstrates how important it is to employ poststructuralist methodologies in analyzing adolescent literature, both in critical studies and in the classroom. Among the twentieth-century authors discussed are Blume, Hamilton, Hinton, Le Guin, L'Engle, and Zindel. Trites' work has applications for a broad range of readers, including scholars of children's literature and theorists of post-modernity as well as librarians and secondary-school teachers. *Disturbing the Universe: Power and Repression in Adolescent Literature* by Roberta Seelinger Trites is the winner of the 2002 Children's Literature Association's Book Award. The award is given annually in order to promote and recognize outstanding contributions to children's literature, history, scholarship, and criticism; it is one of the highest academic honors that can accrue to an author of children's literary criticism.

A Practical Guide to the Evaluation of Child Physical Abuse and Neglect Angelo P. Giardino,Michelle A. Lyn,Eileen R. Giardino,2010-06-09 As we near the 50th anniversary of the landmark article by C. Henry Kempe and his colleagues entitled "The Battered Child Syndrome", which ushered in the modern era of professional attention by pediatricians and other child health professionals, we have reason for both celebration and concern. We can take heart that over the recent ve decades, a great deal of professional attention focused on the problem of child abuse and neglect. In every state of the country, there are mandatory reporting laws that require nurses, physicians, and social workers to report suspicions of maltreatment to the appropriate authorities for investigation. The act of reporting provides legal immunity to the reporter except when performed in bad faith. Progress in understanding the factors that place children at risk for harm from physical abuse and neglect now permits prevention and intervention. The peer-reviewed literature dealing with child abuse and neglect has proliferated with high quality work being done and reported on the many dimensions related to the epidemiology, mechanism, treatment, and prognosis of child maltreatment. Efforts are being directed toward developing an evidence-based approach to the prevention of child abuse and neglect. These are some of the positives. However, negatives exist and remain reasons for concern. Despite a tremendous amount of attention to the problem of maltreatment, there are at least 3 million reports of suspected child abuse and neglect made annually, with nearly 1 million cases being substantiated.

Other, Please Specify D'Lane Compton,Tey Meadow,Kristen Schilt,2018 Located within the critical conversation about what it might mean to 'queer' research methods that has developed over the past decade in conference panels, workshops, edited volumes, and journal symposia, *Other, Please Specify: Queer Methods in Sociology* presents an array of experiences, insights, and approaches that show the power of queer investigations of the social world and of the disciplinary conventions of sociology. Incorporating the experiences of sociologists who utilize a range of interpretative and statistical methods, this volume offers methodological advice and practical strategies for getting queer research off the ground and for building a collaborative community within this emerging subfield-- Provided by publisher.

Change and Development Eric Amsel,K. Ann Renninger,Ann Renninger,2013-05-13 This book and the symposium on which it was based were designed to cross the boundaries of subdiscipline and theoretical orientation to address four critical issues in understanding development: explanation of change and development; the nature and process of change; forms of variability in performance; and the promotion of change through application. The chapters suggest that change and development in target systems from cells to selves, may not be explainable, assessable, or promotable without careful reference to the context (social and otherwise) of the system, and that the process of change and development may involve variability of the system in addition to periods of stability. Together the chapters harken back to the spirit of the grand theory. Instead of proposing a grand theory, they provide an excellent foundation for considering the importance of an individual's (or particular group's) context and variability, and discussions to facilitate thinking about what still needs to be worked out.

Handbook of Social Influences in School Contexts Kathryn R. Wentzel,Geetha B. Ramani,2016-01-13 The Handbook of Social Influences in School Contexts draws from a growing body of research on how and why various aspects of social relationships and contexts contribute to children's social and academic functioning within school settings. Comprised of the latest studies in developmental and educational psychology, this comprehensive volume is perfect for researchers and students of Educational Psychology. Beginning with the theoretical perspectives that guide research on social influences, this book presents foundational research before moving on to chapters on peer influence and teacher influence. Next, the book addresses ways in which the school context can influence school-related outcomes (including peer and teacher-student relationships) with specific attention to research in motivation and cognition. Within the chapters authors not only present current research but also explore best-practices, drawing in examples from the classroom. With chapters from leading experts in the field, *The Handbook of Social Influences in School Contexts* provides the first complete resource on this topic.

Information Highlighting in Advanced Learner English Marcus Callies,2009 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language, echoing the increasing interest in questions of near-native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of

specific means of information highlighting in English by native speakers and German learners of English as a foreign language, presenting triangulated experimental and learner corpus data as corroborating evidence. The study focuses on learners' use of discourse-pragmatically motivated variations of the basic word order such as inversion, preposing, and it- and wh-clefts, an underexplored field in SLA research to date. The book also provides a critical re-assessment of the study of pragmatics within SLA. It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts. Thus, the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross-cultural investigation of speech acts. It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers, language teachers and curriculum designers.

Archaeomagnetic Dating Jeffrey L. Eighmy, Robert Saul Sternberg, 1990 Archaeomagnetic dating—dating archaeological and geological materials by comparing their magnetic data with known changes in the earth's magnetic field—has proved to be of increasing reliability in establishing behavioral and social referents of archaeological data. Now this volume presents the first book-length treatment of its theory and methodology in North American archaeology. The sixteen original papers in many cases represent the work of individuals who have been intimately involved with the development and refinement of archaeomagnetic dating techniques. They discuss the geophysical underpinnings of archaeomagnetism; general methodological problems associated with present archaeomagnetic studies, such as sample collection, data measurement and analysis, and experimental control; and advances in experimental archaeology. Case histories consider both successful and unsuccessful applications of the technique in New World fieldwork. Raw data is provided in an appendix. While the volume deals specifically with problems of archaeomagnetic direction dating in the Americas, it should prove useful in constructing exact chronologies in other archaeological sites as well and in the geologic record at large. As the only single volume devoted to the subject, it will serve as the standard reference in the field.

The Science of Learning and Development Pamela Cantor, David Osher, 2021-06-21 This essential text unpacks major transformations in the study of learning and human development and provides evidence for how science can inform innovation in the design of settings, policies, practice, and research to enhance the life path, opportunity and prosperity of every child. The ideas presented provide researchers and educators with a rationale for focusing on the specific pathways and developmental patterns that may lead a specific child, with a specific family, school, and community, to prosper in school and in life. Expanding key published articles and expert commentary, the book explores a profound evolution in thinking that integrates findings from psychology with biology through sociology, education, law, and history with an emphasis on institutionalized inequities and disparate outcomes and how to address them. It points toward possible solutions through an understanding of and addressing the dynamic relations between a child and the contexts within which he or she lives, offering all researchers of human development and education a new way to understand and promote healthy development and learning for diverse, specific youth regardless of race, socioeconomic status, or history of adversity, challenge, or trauma. The book brings together scholars and practitioners from the biological/medical sciences, the social and behavioral sciences, educational science, and fields of law and social and educational policy. It provides an invaluable and unique resource for understanding the bases and status of the new science, and presents a roadmap for progress that will frame progress for at least the next decade and perhaps beyond.
