**Human-Computer Interaction: Interaction Modalities and Techniques** Masaaki Kurosu, 2013-07-01 The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer interaction, addressing the following major topics: speech, natural language and auditory interfaces; gesture and eye-gaze based Interaction; touch-based interaction; haptic interaction; graphical user interfaces and visualisation.

*Human Factors in Computing and Informatics* Andreas Holzinger, Martina Ziefle, Martin Hitz, Matjaz Debevc, 2013-06-26 This book constitutes the refereed proceedings of the First International Conference on Human Factors in Computing and Informatics, SouthCHI 2013, held in Maribor, Slovenia, in July 2013. SouthCHI is the successor of the USAB Conference series and promotes all aspects of human-computer interaction. The 38 revised full papers presented together with 12 short papers, 4 posters and 3 doctoral thesis papers were carefully reviewed and selected from 169 submissions. The papers are organized in the following topical sections: measurement and usability evaluation; usability evaluation - medical environments; accessibility methodologies; game-based methodologies; Web-based systems and attribution research; virtual environments; design culture for ageing well: designing for situated elderliness; input devices; adaptive systems and intelligent agents; and assessing the state of HCI research and practice in South-Eastern Europe.

**Bank 2.0** Brett King, 2010 The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly

changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

Encyclopedia of Education and Information Technologies Arthur Tatnall,2020-05-24 This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

*The Role of the Media in Promoting and Reducing Tobacco Use* National Cancer Institute,U.s. Department of Health and Human Services,National Institutes of Health,2012-06-23 The National Institutes of Health Publication 07-6242, *The Role of the Media in Promoting and Reducing Tobacco Use*, NCI Tobacco Control Monograph 19, (the 19th of the Tobacco Control Monograph series of the National Cancer Institute (NCI) provides a critical, scientific review and synthesis of current evidence regarding the power of the media both to encourage and discourage tobacco use. The work presented is the most current and comprehensive distillation of the scientific literature on media communications in tobacco promotion and tobacco control. The six main parts of this monograph deal with aspects of media communications relevant to tobacco promotion and tobacco control. Part 1, an overview, frames the rationale for the monograph's organization and presents the key issues and conclusions of the research as a whole and of the individual chapters. This section describes media research theories that guided this assessment of the relationship between media and tobacco use, which can be viewed as a multilevel issue ranging from consumer-level advertising and promotion to stakeholder-level marketing aimed toward retailers, policymakers, and others. Part 2 further explores tobacco marketing—the range of media interventions used by the tobacco industry to promote its products, such as brand advertising and promotion, as well as corporate sponsorship and advertising. This section also evaluates the evidence for the influence of tobacco marketing on smoking behavior and discusses regulatory and constitutional issues related to marketing restrictions. Part 3 explores how both the tobacco control community and the tobacco industry have used news and entertainment media to advocate their positions and how such coverage relates to tobacco use and tobacco policy change. The section also appraises evidence of the influence of tobacco use in movies on youth smoking initiation. Part 4 focuses on tobacco control media interventions and the strategies, themes, and communication designs intended to prevent

tobacco use or encourage cessation, including opportunities for new media interventions. This section also synthesizes evidence on the effectiveness of mass media campaigns in reducing smoking. Part 5 discusses tobacco industry efforts to diminish media interventions by the tobacco control community and to use the media to oppose state tobacco control ballot initiatives and referenda. Finally, Part 6 examines possible future directions in the use of media to promote or to control tobacco use and summarizes research needs and opportunities. Key lessons from this volume can inform policymakers as well as scientists and practitioners. Most critical from a policy standpoint is the conclusion, supported by strong evidence, that both exposure to tobacco marketing and depictions of tobacco in movies promote smoking initiation. In the United States in 2005—the same year in which 2.7 million American adolescents aged 12 to 17 used cigarettes in the past month<sup>1</sup> and 438,000 Americans died prematurely from diseases caused by tobacco use or secondhand smoke exposure<sup>2</sup>—the tobacco industry spent \$13.5 billion (in 2006 dollars) on cigarette advertising and promotion,<sup>3</sup> an average of \$37 million per day. The tobacco industry continues to succeed in overcoming partial restrictions on tobacco marketing in the United States, and tobacco marketing remains pervasive and effective in promoting tobacco use. Efforts to curb the depiction of tobacco use in movies have increased in recent years, and the evidence reviewed here indicates that progress in this area could be expected to translate into lower rates of youth smoking initiation in the future. Strong evidence indicates that media campaigns can reduce tobacco use. This volume highlights the complexities of assessing the media's influence on tobacco-related attitudes and behavior. A vast range of research is reviewed.~

*Global Logistics* Donald Waters, Stephen Rinsler, 2014-09-03 The field of logistics continues to develop at a remarkable pace. Until recently, logistics was barely considered in long-term plans, but its strategic role is now recognised and lies at the heart of long-term plans in almost every business. Reasons for this change include: communications and information technology offer new opportunities; world trade grows; competition forces operations to adopt new practices and become evermore efficient; and the concern for the environment increases. Add to this the increased emphasis on consumer satisfaction, flexible operations and time compression, and it's clear that getting logistics right is important. This 7th edition of *Global Logistics*, edited by Stephen Rinsler and Donald Waters, has been thoroughly revised and updated to reflect the latest trends, best practices, and cutting-edge thinking on global logistics. It provides guidance on important topics, including agile supply chains, IT, sustainability and performance management, collaboration, outsourcing and humanitarian logistics. This edition of *Global Logistics* provides new chapters on supply chain trends and strategies, fulfilling customer

needs, and supply chain vulnerability. There are also dedicated new chapters on China and Central and Eastern Europe to assess developments across the globe. This edition serves as a forum for acknowledged sector specialists to discuss key logistics issues and share their authoritative views. The new edition introduces new contributors, including leading thinkers from international universities and businesses. Global Logistics is an invaluable source of guidance and practical advice for students, managers and practitioners, who will find it an essential text that also includes online resources. Online resources available include a student manual with key learning outcomes for each chapter.

**Moon-face and Other Stories** Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Sustainable Communication Networks and Application P. Karrupusamy, Joy Chen, Yong Shi, 2019-11-07 This book presents state-of-the-art theories and technologies and discusses developments in the two major fields: engineering and sustainable computing. In this modern era of information and communication technologies [ICT], there is a growing need for new sustainable and energy-efficient communication and networking technologies. The book highlights significant current and potential international research relating to theoretical and practical methods toward developing sustainable communication and networking technologies. In particular, it focuses on emerging technologies such as wireless communications, mobile networks, Internet of things [IoT], sustainability, and edge network models. The contributions cover a number of key research issues in software-defined networks, blockchain technologies, big data, edge/fog computing, computer vision, sentiment analysis, cryptography, energy-efficient systems, and cognitive

platforms.

Food and Foodways in Italy from 1861 to the Present Emanuela Scarpellini,2016-04-29 Despite being a universal experience, eating occurs with remarkable variety across time and place: not only do we not eat the same things, but the related technologies, rituals, and even the timing are in constant flux. This lively and innovative history paints a fresco of the Italian nation by looking at its storied relationship to food.

**Dogfight** Fred Vogelstein,2013-11-12 This is the story of how Apple and Google have reshaped our world and redefined the meaning of content and

how it is distributed. It begins with the iPhone, which has transformed the concept of what a smart phone can be. Now everyone wants one, or else a smart phone like it. Apple and Google are fighting to find a way to control the software that runs these phones so they can manage the content that runs on top of it. The battle has become vicious, although Google makes more than half the apps that run on Apple devices. There may be room for both, but the history of technology suggests that only one player will be dominant in the long term. Author Fred Vogelstein recounts that struggle and describes the impact it is having on the rest of the media and on technology. Filled with in-depth interviews of key players and behind-the-scenes accounts of corporate strategy, Dogfight is a must-read for anyone interested in the biggest societal and technological shift since the Industrial Revolution.

**101 Stories of the Great Ballets** George Balanchine, Francis Mason, 1975-05-20 Authored by one of the ballet's most respected experts, this volume includes scene-by-scene retellings of the most popular classic and contemporary ballets, as performed by the world's leading dance companies. Certain to delight long-time fans as well as those just discovering the beauty and drama of ballet.

**The Hidden History of Coined Words** Ralph Keyes, 2021 How do words get coined? That question is explored in Ralph Keyes's latest book, The Hidden History of Coined Words. Based on meticulous research, Keyes has determined that successful neologisms are as likely to be created by chance as by intention. A remarkable number of new words were coined whimsically, he's discovered, to taunt, even to prank. Knickers resulted from a hoax, big bang from an insult. Wisecracking produced software, crowdsource, and blog. More than a few neologisms weren't even coined intentionally: they resulted from happy accidents such as typos, mistranslations, and misheard words like bigly and buttonhole, or from an unintended coinage such as Isaac Asimov's robotics. Many of the word coiners Keyes writes about come from unlikely quarters. Neologizers (a Thomas Jefferson coinage) include not just learned scholars and literary lions but cartoonists, columnists, children's authors, and children as well. Wimp, Keyes tells us, originated with an early 20th century book series on The Wympts, goop from a series about The Goops, and nerd from a book by Dr. Seuss. Competing claims to have coined terms like gonzo, mojo, and booty call are assessed, as is epic battles fought between new word partisans, and those who think we have enough words already. A concluding chapter offers pointers on how to coin a word of one's own. Written in a reader-friendly manner, The Hidden History of Coined Words will appeal not just to word lovers but history buffs, trivia contesters, and anyone at all who is interested in a well-informed good read--
