Marginality Joachim von Braun,Franz W. Gatzweiler,2013-08-19 This book takes a new approach on understanding causes of extreme poverty and promising actions to address it. Its focus is on marginality being a root cause of poverty and deprivation. “Marginality” is the position of people on the edge, preventing their access to resources, freedom of choices, and the development of capabilities. The book is research based with original empirical analyses at local, national, and local scales; book contributors are leaders in their fields and have backgrounds in different disciplines. An important message of the book is that economic and ecological approaches and institutional innovations need to be integrated to overcome marginality. The book will be a valuable source for development scholars and students, actors that design public policies, and for social innovators in the private sector and non-governmental organizations.

Understanding Environmental Pollution Marquita K. Hill,2004-08-26 Understanding Environmental Pollution systematically introduces pollution issues to students and others with little scientific background. The first edition received excellent reviews, and the new edition has been completely refined and updated. The book moves from the definition of pollution and how pollutants behave, to air and water pollution basics, pollution and global change, solid waste, and pollution in the home. It also discusses persistent and bioaccumulative chemicals, and pesticides, and it places greater stress on global pollutants. The relationship between energy generation and use, and pollution is stressed, as well as the importance of going beyond pollution control, to pollution prevention. Impacts on human and environmental health are emphasized throughout. Students are often invited to come to their own conclusions after having been presented with a variety of opinions. This textbook provides the basic concepts of pollution, toxicology and risk assessment for non-science majors as well as environmental science students.

Medicines from Animal Cell Culture Glyn N. Stacey,John Davis,2007-06-29 Medicines from Animal Cell Culture focuses on the use of animal cell culture, which has been used to produce human and veterinary vaccines, interferon, monoclonal antibodies and genetically engineered products such as tPA and erythropoietin. It also addresses the recent dramatic expansion in cell-based therapies, including the use of live cells for tissue regeneration and the culture of stem cells. Medicines from Animal Cell Culture: Provides comprehensive descriptions of methods for cell culture and nutrition as well as the technologies for the preservation and characterisation of both the cells and the derived products Describes the preparation of stem cells and others for use in cell-based therapies – an area of burgeoning research Includes experimental examples to indicate expected results Covers regulatory issues from the UK, the EU and the USA and reviews how these are developing around the world Addresses the key issues of standardisation and validation with chapters on GLP and GMP for cell culture processes Delivering insight into the exciting world of biological medicines and directions for further investigation into specific topics, Medicines from Animal Cell Culture is an essential resource for researchers and technicians at all levels using cell culture within the pharmaceutical, biotechnology and biomedical industries. It is of value to laboratory managers in these industries and to all those interested in this topic alike.

Data Mining in Biomedicine Panos M. Pardalos,Vladimir L. Boginski,Alkis Vazacopoulos,2008-12-10 This volume presents an extensive collection of contributions covering aspects of the exciting and important research field of data mining techniques in biomedicine. Coverage includes new approaches for the analysis of biomedical data; applications of data mining techniques to real-life problems in medical practice; comprehensive reviews of recent trends in the field. The book addresses incorporation of data mining in fundamental areas of biomedical research: genomics, proteomics, protein characterization, and neuroscience.

Mills' Atlas Robert Mills,1980 This reprint edition of MILLS' ATLAS has an especially prepared history and introduction to these maps as well as considerable history about Robert Mills, the man and architect, prepared by Mr. Gene Waddell, formerly Director of the South Carolina Historical Society, Charleston. These maps, originally 23 29 in size, have been conveniently reduced in size to 11 17 and folded to fit into an exquisitely gold-stamped simulated leather cover for book shelf or coffee table. The Districts for which maps are included are: Abbeville, Barnwell, Beaufort, Charleston, Chesterfield, Chester, Colleton, Darlington, Edgefield, Fairfield, Greenville, Georgetown, Horry, Kershaw, Lancaster, Laurens, Lexington, Marion, Marlborough, Newberry, Orangeburg, Pendleton, Richland, Spartanburg, Sumter, Union, Williamsburg and York.

Newspaper Journalism Peter Cole,Tony Harcup,2009-12-01 Are newspapers faced with an existential threat or are they changing to meet the challenges of a digital world? With the newspaper's role in a state of fundamental redefinition, Newspaper Journalism offers a timely and up to the minute analysis of newspapers today, in the context of their historical importance to society. Drawing on their extensive experience in academia and also across local, national, mainstream and alternative newspapers, Cole and Harcup write clearly and engagingly from both industry and scholarly perspectives, and contend that, far from dying, newspapers are doing what they have always done: adapting to a changing environment. This text is essential reading for all students of the press, with comprehensive and critical coverage of the most important debates in the study of newspaper journalism - from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and central importance of newspapers, it will be of interest to all students of journalism and the media. Praise for the Journalism Studies: Key Texts series: 'It is easy to describe a good textbook for a specific journalistic format... The ideal book has to satisfy a list of requirements that are also bullet-pointed in journalism assignment outlines. A text has to: synthesize the existing body of knowledge; explain concepts clearly; have a logical order of topics; and provide enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a pleasure to read. Hard to find? Not anymore. The new SAGE series Journalism Studies: Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies... All three books follow the same structural template: an overview of historical development; explication of the political and economic frameworks within particular types of journalism; a review of contemporary practices; social demographics; a comparative analysis of practices around the world; a summary of main conceptual approaches; an indication of future directions; recommendations for further reading. This strong organization resembles a template for a course outline. This is intentional because the series is aimed both at students and their practice-based lecturers, who often come straight from industry and need time to adjust to the academic environment... [The series] achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice.. They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies: Key Texts series mandatory reading for both journalism students and their lecturers' - Verica Rupar, Journalism Studies

Biotechnology for Biofuels: A Sustainable Green Energy Solution Nitish Kumar,2020-05-16 The depletion of petroleum-derived fuel and environmental concerns have prompted many millennials to consider biofuels as alternative fuel sources. But completely replacing petroleum-derived fuels with biofuels is currently impossible in terms of production capacity and engine

compatibility. Nevertheless, the marginal replacement of diesel with biofuel could delay the depletion of petroleum resources and abate the radical climate change caused by automotive pollutants. Energy security and climate change are the two major driving forces for worldwide biofuel development, and also have the potential to stimulate the agro-industry. The development of biofuels as alternative and renewable sources of energy has become critical in national efforts towards maximum self-reliance, the cornerstone of our energy security strategy. At the same time, the production of biofuels from various types of biomass such as plants, microbes, algae and fungi is now an ecologically viable and sustainable option. This book describes the biotechnological advances in biofuel production from various sources, while also providing essential information on the genetic improvement of biofuel sources at both the conventional and genomic level. These innovations and the corresponding methodologies are explained in detail.

Climate Time Series Analysis Manfred Mudelsee,2010-08-26 Climate is a paradigm of a complex system. Analysing climate data is an exciting challenge, which is increased by non-normal distributional shape, serial dependence, uneven spacing and timescale uncertainties. This book presents bootstrap resampling as a computing-intensive method able to meet the challenge. It shows the bootstrap to perform reliably in the most important statistical estimation techniques: regression, spectral analysis, extreme values and correlation. This book is written for climatologists and applied statisticians. It explains step by step the bootstrap algorithms (including novel adaptations) and methods for confidence interval construction. It tests the accuracy of the algorithms by means of Monte Carlo experiments. It analyses a large array of climate time series, giving a detailed account on the data and the associated climatological questions. This makes the book self-contained for graduate students and researchers.

Embodied Artificial Intelligence Fumiya Iida,Rolf Pfeifer,Luc Steels,Yasuo Kuniyoshi,2004-07-02 Originating from a Dagstuhl seminar, the collection of papers presented in this book constitutes on the one hand a representative state-of-the-art survey of embodied artificial intelligence, and on the other hand the papers identify the important research trends and directions in the field. Following an introductory overview, the 23 papers are organized into topical sections on - philosophical and conceptual issues - information, dynamics, and morphology - principles of embodiment for real-world applications - developmental approaches - artificial evolution and self-reconfiguration

Gravel Roads Ken Skorseth,2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been more of an art than a science and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Copahue Volcano Franco Tassi,Orlando Vaselli,Alberto Tomas Caselli,2015-09-21 This book provides a comprehensive description of the volcanological, petrological and geochemical features of the Copahue volcano, located at the border between Argentina and Chile. Scientific studies are limited for this volcanic system, due to its remote location and difficult access in winter. However, Copahue is one of the most active volcanic systems in the southern Andes. Monitoring the volcano's activity is of utter importance, as it provides means of existence for the nearby village of the same name, hosting the world's highest-located hot-springs resort. This book's aim is to present the current monitoring activities, and to describe future research programs that are planned in order to mitigate volcanic hazards. Special attention is therefore devoted to the social and industrial activities close to the volcano, such as health therapies and geothermal energy exploitation. In a special section, the Copahue volcano is presented as a terrestrial modern analog for early-Earth and Mars environments.

Microbial Control of Insect and Mite Pests Lawrence A. Lacey,2016-09-03 Microbial Control of Insect and Mite Pests: From Theory to Practice is an important source of information on microbial control agents and their implementation in a variety of crops and their use against medical and veterinary vector insects, in urban homes and other structures, in turf and lawns, and in rangeland and forests. This comprehensive and enduring resource on entomopathogens and microbial control additionally functions as a supplementary text to courses in insect pathology, biological control, and integrated pest management. It gives regulators and producers up-to-date information to support their efforts to facilitate and adopt this sustainable method of pest management. Authors include an international cadre of experts from academia, government research agencies, technical representatives of companies that produce microbial pesticides, agricultural extension agents with hands on microbial control experience in agriculture and forestry, and other professionals working in public health and urban entomology. Covers all pathogens, including nematodes Addresses the rapidly progressing developments in insect pathology and microbial control, particularly with regard to molecular methods Demonstrates practical use of entomopathogenic microorganisms for pest control, including tables describing which pathogens are available commercially Highlights successful practices in microbial control of individual major pests in temperate, subtropical, and tropical zones Features an international group of contributors, each of which is an expert in their fields of research related to insect pathology and microbial control

Practical Flow Cytometry Howard M. Shapiro,2005-02-25 From the reviews of the 3rd Edition... The standard reference for anyone interested in understanding flow cytometry technology. American Journal of Clinical Oncology ...one of the most valuable of its genre and...addressed to a wide audience?written in such an attractive way, being both informative and stimulating. Trends in Cell Biology This reference explains the science and discusses the vast biomedical applications of quantitative analytical cytology using laser-activated detection and cell sorting. Now in its fourth edition, this text has been expanded to provide full coverage of the broad spectrum of applications in molecular biology and biotechnology today. New to this edition are chapters on automated analysis of array technologies, compensation, high-speed sorting, reporter molecules, and multiplex and apoptosis assays, along with fully updated and revised references and a list of suppliers.

Encyclopedia of Gerontology and Population Aging Danan Gu,Matthew E. Dupre,2021-11-03 This eight-volume encyclopedia brings together a comprehensive collection of work highlighting established research and emerging science in all relevant disciplines in gerontology and population aging. It covers the breadth of the field, gives readers access to all major sub-fields, and illustrates their interconnectedness with other disciplines. With more than 1300 cross-disciplinary contributors—including anthropologists, biologists, economists, psychiatrists, public policy experts, sociologists, and others—the encyclopedia delves deep into key areas of gerontology and population aging such as ageism, biodemography, disablement, longevity, long-term care, and much more. Paying careful attention to empirical research and literature from around the globe, the encyclopedia is of interest to a wide audience that includes researchers, teachers and students, policy makers, (non)governmental agencies, public health practitioners, business planners, and many other individuals and organizations.
