

The Self-Reflexive Art of Don DeLillo Graley Herren,2019-06-27 Don DeLillo has spent his career reflecting upon the creative processes of artists. In recent years he has become increasingly drawn to spectators and how they project and indulge their own private obsessions through art. The Self-Reflexive Art of Don DeLillo is the first book devoted to this dimension of DeLillo's art. It is also the first book to identify and analyze a signature DeLillo motif: the embedded author. In multiple novels, short stories, and plays, DeLillo inserts a character subtly implied as the creator of the very narrative we are reading or watching. Spanning his entire career but focusing primarily on his work from Underworld (1997) to Zero K (2016), The Self-Reflexive Art of Don DeLillo breaks important new ground in DeLillo studies.

**Call of the Cats** Andrew Bloomfield,2016-10-14 When aspiring screenwriter Andrew Bloomfield moved into a bungalow in Southern California he soon discovered that he shared the property with a large colony of feral cats — untamed, uninterested in human touch, not purring pets in waiting. But after a midnight attack by predators that decimated yet another litter of kittens, Bloomfield decided to intervene. He began to name and nurse, feed and house, rescue and neuter. Drawing on his time living in Asia among spiritual teachers, he takes us on the contemplative, humorous, and poignant journey of saving these cats, only to find it was they who saved him by revealing a world of meaning beyond his unrealized Hollywood dreams.

*Blindsight* Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**NICOMACHEAN ETHICS** Aristotle,2017-04-20 ♦EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to

be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.◆

In The Great Depression, students explore what it meant to live during this time. Projects such as designing a 1930s outfit and creating a journal from the point of view of a kid whose family is on the road help infuse the content with realism and practicality. In-depth investigations of primary sources from the period allow readers to engage in further, independent study of the times. **The Mystery of the Cross** Judith Couchman,2010-03-05 Christianity is a religion founded on the mystery of the cross of Christ. --Leo the Great At the center of Christianity sits the cross of Christ. From the beginning, Christ's followers celebrated the cross as a symbol of their faith. It was honored in church worship, carved into rough tombstones, pressed onto loaves of bread and set out as a sign of sanctuary. The cross represented what Christians believed, who they hoped for and how they approached life. In this thoughtful book Judith Couchman takes up forty images of the cross from early Christianity. As we discover the meaning and significance of each of these uses, we learn a little more about the early church. More than that, she helps us focus on the meaning of the cross and the Savior's sacrifice. Ideal for Lenten devotional reading and appropriate for any season of the church calendar, this book includes original illustrations of each cross image. The Mystery of the Cross will enrich your understanding of Christian tradition and draw you into Christ's presence.
