Bar and Bat Mitzvah in Israel Judith Isaacson, Deborah Rosenbloom, 1998 This is the sourcebook for families of any Jewish denomination who are interested in celebrating a bar or bat mitzvah in Israel. It provides a good picture of the sites available and the options at each location.

Conflict at the Edge of the African State Lindsay Scorgie, 2022-01-05 This book looks at one of the oldest and most secretive rebel groups in the eastern Congo warscape: the Allied Democratic Forces (ADF). Moving away from traditional state-centric concepts of cross-border conflict, the author examines how their deeply embedded position in local borderland histories has fueled their surprising resiliency.

The Fourth Geneva Convention for Civilians Gilad Ben-Nun, 2020-02-20 The Fourth Geneva Convention, signed on 12th August 1949, defines necessary humanitarian protections for civilians during armed conflict and occupation. One-hundred-and-ninety-six countries are signatories to the Geneva Conventions, and this particular facet has laid the foundations for all subsequent humanitarian global law. How did the world – against seemingly insurmountable odds – draft and legislate this landmark in humanitarian international law? The Fourth Geneva Convention for Civilians draws on archival research across seven countries to bring together the Cold War interventions, founding motives and global idealisms that shaped its conception. Gilad Ben-Nun draws on the three key principles that the convention brought about to consider the recent events where its application has either been successfully applied or circumvented, from the 2009 Gaza War, the war crimes tribunal in the former Yugoslavia and Nicaragua vs. the United States to the contemporary conflict in Syria. Weaving historical archival research, a grounding in the concepts of international law, and insightful analysis of recent events, this book will appeal to a broad range of students, academics and

legal practitioners.

Materialism: A Historico-Philosophical Introduction Charles T. Wolfe, 2016-01-06 This book provides an overview of key features of (philosophical) materialism, in historical perspective. It is, thus, a study in the history and philosophy of materialism, with a particular focus on the early modern and Enlightenment periods, leading into the 19th and 20th centuries. For it was in the 18th century that the word was first used by a philosopher (La Mettrie) to refer to himself. Prior to that, 'materialism' was a pejorative term, used for wicked thinkers, as a near-synonym to 'atheist', 'Spinozist' or the delightful 'Hobbiist'. The book provides the different forms of materialism, particularly distinguished into claims about the material nature of the world and about the material nature of the mind, and then focus on materialist approaches to body and embodiment, selfhood, ethics, laws of nature, reductionism and determinism, and overall, its relationship to science. For materialism is often understood as a kind of philosophical facilitator of the sciences, and the author want to suggest that is not always the case. Materialism takes on different forms and guises in different historical, ideological and scientific contexts as well, and the author wants to do justice to that diversity. Figures discussed include Lucretius, Hobbes, Gassendi, Spinoza, Toland, Collins, La Mettrie, Diderot, d'Holbach and Priestley; Büchner, Bergson, J.J.C. Smart and D.M. Armstrong.

A History of the Surrealist Novel Anna Watz, 2023-02-16 A History of the Surrealist Novel offers a rich, long, and elastic historiography of the surrealist novel, taking into consideration an abundance of texts previously left out of critical accounts. Its twenty thematically organized chapters examine surrealist prose texts written in French, English, Spanish, German, Greek, and Japanese, from the emergence of the surrealist movement in the 1920s and 1930s, through the post-war and postmodern periods, and up to the contemporary moment. This approach extends received narratives

regarding surrealism's geographical locations and considers its transnational movement and modes of circulation. Moreover, it challenges critical biases that have defined surrealism in predominantly masculine terms, and which tie the movement to the interwar or early post-war years. This book will appeal both to scholars and students of surrealism and its legacies, modernist literature, and the history of the novel.

Information Technology Law Uta Kohl, Andrew Charlesworth, 2013-03-01 This fourth edition of Information Technology Law has been completely revised in the light of developments within the field since publication of the first edition in 1997. Now dedicated to a more detailed analysis of and commentary on the latest developments within this burgeoning field of law, this new edition is an essential read for all those interested in the interface between law and technology and the effect of new technological developments on the law. New additions to the fourth edition include: analysis of regulatory issues and jurisdictional questions specific consideration of intermediary liability developments in privacy and data protection extension of computer crime laws developments in software patents open source software and the legal implications.

Globalisation and Historiography of National Leaders Joseph Zajda, Tatyana Tsyrlina-Spady, Michael Lovorn, 2016-12-23 Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching

national history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.

Regulating Speech in Cyberspace Emily B. Laidlaw, 2015-08-07 This book analyses the role of businesses in regulating and influencing the exercise of free speech on the internet.

Law and the Internet Lilian Edwards, Charlotte Waelde, 2009-09-10 This is the third edition of a successful book which offers students and practitioners an up-to-date overview of developments in Internet law and practice. The editors have once again assembled a team of specialist authors to write about those aspects of Internet law which are of special importance in the global regulation of the Internet and focussed around three principal themes- e-commerce, intellectual property, and privacy, data protection and cyber-crime with, in addition a major contribution on Internet Governance. This edition incorporates for the first time areas such as data protection, privacy and electronic surveillance, cyber crime and cyber security, jurisdiction and dispute resolution online. The

section on IP contains clear and comprehensive analysis of the many and varied ways in which IP and the internet intersect including open source licenses and the IP problems around search engines. The new edition also takes account of all current cases and legislation, including the draft revised EC Telecoms Package and the Audio Visual Media Services Directive. This book will be essential reading for students, teachers and practitioners interested in Internet law and practice as well as technologists and social scientists. 'The book is easy to read, and...has been well edited...and flows smoothly through the various topics. ...the book provides a worthwhile overview of this developing area of law throughout the world.' Peter Walsh, International Trade Law Annual 'a thorough and stimulating survey. ...a good introduction for lawyers and students approaching Internet and e-commerce law for the first time, and a useful course text.' Brian Hutchinson, The Irish Jurist

The Life of the Afterlife in the Big Sky State Ellen Baumler, 2021-06 The Life of the Afterlife in the Big Sky State is a groundbreaking history of death in Montana. It offers a unique, reflective, and sensitive perspective on the evolution of customs and burial grounds. Beginning with Montana's first known burial site, Ellen Baumler considers the archaeological records of early interments in rock ledges, under cairns, in trees, and on open-air scaffolds. Contact with Europeans at trading posts and missions brought new burial practices. Later, crude "boot hills" and pioneer graveyards evolved into orderly cemeteries. Planned cemeteries became the hallmark of civilization and the measure of an educated community. Baumler explores this history, yet untold about Montana. She traces the pathway from primitive beginnings to park-like, architecturally planned burial grounds where people could recreate, educate their children, and honor the dead. The Life of the Afterlife in the Big Sky State is not a comprehensive listing of the many hundreds of cemeteries across Montana. Rather it discusses cultural identity evidenced through burial practices, changing methods of interments and

why those came about, and the evolution of cemeteries as the “last great necessity” in organized communities. Through examples and anecdotes, the book examines how we remember those who have passed on.

Regulating Technologies Roger Brownsword, Karen Yeung, 2008-10-23 While it is a truism that emerging technologies present both opportunities for and challenges to their host communities, the legal community has only recently begun to consider their significance. On the one hand, emerging information, bio, nano, and neurotechnologies challenge policy-makers who aspire to put in place a regulatory environment that is legitimate, effective, and sustainable; on the other hand, these same technologies offer new opportunities as potentially powerful regulatory instruments. In this unique volume, a team of leading international scholars address many of the key difficulties surrounding the regulation of emerging technological targets as well as the implications of adopting technology as a regulatory tool. How should we rise to the challenge of regulating technologies? How are the regulatory lines to be drawn in the right places and how is the public to be properly engaged? How is precaution to be accommodated, and how can the law keep pace with technologies that develop ahead of the regulatory environment? How readily should we avail ourselves of the opportunity to use technology as a regulative strategy? How are we to understand these strategies and the challenges which they raise? To what extent do they give rise to similar policy problems accompanying more 'traditional' regulatory instruments or generate distinctive challenges? While the criminal justice system increasingly relies on technological assistance and the development of a 'surveillance society', is a regulatory regime that rules by technology compatible with rule of law values?

Dizionario storico dell'integrazione europea AA.VV., 2018-06-08T00:00:00+02:00 Il Dizionario storico dell'integrazione europea (Dizie) è diviso in tre sezioni: la prima riguarda gli Stati

membri dell'Unione europea, i paesi candidati all'adesione e quelli che hanno deciso di lasciare l'Unione; la seconda contiene un'ampia rassegna delle figure storiche e dei personaggi più rilevanti del processo di integrazione europea e della più recente vita politica dell'Unione europea; la terza infine riguarda le istituzioni, le normative e le politiche comunitarie. La prima sezione contiene le voci che si riferiscono ai singoli paesi, volte a ripercorrere gli snodi fondamentali dell'iter di integrazione seguito da ciascuno di essi. Particolare attenzione è dedicata alla storia e ai dibattiti avvenuti in seno ai vari paesi, così come alle loro posizioni rispetto alle prospettive di allargamento e di integrazione. Personaggi La seconda sezione riguarda le biografie dei principali attori politici e diplomatici. Oltre alle vicende politiche e istituzionali dei padri fondatori delle Comunità europee, particolare attenzione è dedicata alle biografie di quei diplomatici, funzionari comunitari, uomini politici, intellettuali e pubblicisti, la cui storia personale si è variamente intrecciata con il processo di integrazione. Istituzioni, normative e politiche europee Nella terza sezione sono analizzati il funzionamento delle istituzioni, le normative e politiche comunitarie. Nelle voci ivi contenute, si ripercorrono i passaggi chiave che dai progetti di cooperazione internazionale hanno portato alla firma dei primi trattati e alle prime convenzioni. L'attenzione è rivolta quindi ai progetti di creazione di un'Assemblea costituente europea, alla nascita del Consiglio d'Europa e agli avvenimenti che hanno spinto gli Stati europei coinvolti a trasferire poteri e competenze a organismi sovranazionali. La nascita della Comunità europea del carbone e dell'acciaio (CECA), il fallimento della Comunità europea di difesa (CED), i trattati della Comunità economica europea (CEE) e della Comunità europea dell'energia atomica (CEEa o EURATOM) costituiscono il filo conduttore della ricostruzione proposta. Essa, inoltre, prenderà in considerazione la fusione degli organi esecutivi di queste istituzioni nonché l'analisi del contesto storico in cui furono presentate le prime domande di adesione che portarono

all'ampliamento del gruppo dei fondatori, fino a includere gli odierni candidati. Il significato delle elezioni a suffragio universale diretto del Parlamento europeo, l'entrata in vigore del Sistema monetario europeo (SME), la firma dell'Atto unico europeo (AUE), il trattato di Maastricht, i referendum sulle ratifiche del trattato sull'Unione europea (UE), il trattato di Amsterdam, i vertici di Nizza e Lacken, il trattato di Lisbona sono presentati nell'ambito di un prospetto unitario che permetterà al lettore di cogliere gli elementi di continuità e rottura, i progressi compiuti e le battute d'arresto nel lungo percorso della costruzione dell'Europa unita.

Blind Conscience Margot O'Neill, 2008 Mandatory detention of asylum-seekers has been a prominent public issue for almost a decade. It has created an industry, provoked shame and anger across society, been manipulated politically by all sides and has prompted many to become actively involved in campaigns in support of asylum-seekers. The government's recent response to the crisis precipitated by the arrival of the West Papuans and the widespread protest that followed show that the refugee crisis is not over. Nevertheless the prospects for incarcerated asylum-seekers have improved markedly since the intervention of Petro Georgeiou and other federal Liberal backbenchers. This shift and the time that has passed since the Tampa incident, children overboard and near saturation coverage of individual asylum-seekers provide the opportunity for some reflection. Margot O'Neill has covered many angles of the story herself, but writes now about the way Australian society at large was affected. She uses individuals - activists, psychiatrists, lawyers, politicians, prison guards - with direct experience to tell the broader story. This gives the book a strong narrative drive and a powerful emotional charge.--Provided by publisher.

Faith is a Verb Chris Goodrich, 2005 Goodrich traces Habitat's history back to an unsung American

hero, Clarence Jordan, who in the 1940's founded a Christian community in south Georgia dedicated to social and economic justice. Koinonia Farm made headlines in the 1950's when the Ku Klux Klan and J. Edgar Hoover attempted to put it out of business for embracing integration and a seemingly communistic lifestyle, but is known today mainly as Habitat's birthplace. Millard Fuller, a millionaire businessman, arrived at Koinonia during a spiritual crisis in the early 1970's, and under Jordan's guidance realized that he was a money-holic. In 1976 Fuller and his wife would found Habitat for Humanity, which in 2005 completed its 200,000th house.

Censorship Julian Petley, 2012-12-01 Ever wonder what you're not being told? When we think of the word censorship, we imagine blacked out words and authoritarian political regimes of the past. However, censorship is alive and well today, and just as pervasive in capitalist democracies as repressive regimes. Offering a potted history of the phenomenon from the execution of Socrates in 399BC to the latest in internet filtering, Petley provides an impassioned manifesto for freedom of speech. Also explaining how media monopolies and moguls censor by limiting what news/entertainment they impart, this is an invaluable resource for anyone interested in global media in the information age.

Chasing Vermeer (Scholastic Gold) Blue Balliett, 2012-12-01 Chasing Vermeer joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content! When a book of unexplainable occurrences brings Petra and Calder together, strange things start to happen: Seemingly unrelated events connect; an eccentric old woman seeks their company; an invaluable Vermeer painting disappears. Before they know it, the two find themselves at the center of an international art scandal, where no one is spared from suspicion. As Petra and Calder are drawn clue by clue into a mysterious labyrinth, they must draw on their powers of intuition, their problem solving

skills, and their knowledge of Vermeer. Can they decipher a crime that has stumped even the FBI?

The Mystery of the Cross Judith Couchman, 2010-03-05 Christianity is a religion founded on the mystery of the cross of Christ. --Leo the Great At the center of Christianity sits the cross of Christ. From the beginning, Christ's followers celebrated the cross as a symbol of their faith. It was honored in church worship, carved into rough tombstones, pressed onto loaves of bread and set out as a sign of sanctuary. The cross represented what Christians believed, who they hoped for and how they approached life. In this thoughtful book Judith Couchman takes up forty images of the cross from early Christianity. As we discover the meaning and significance of each of these uses, we learn a little more about the early church. More than that, she helps us focus on the meaning of the cross and the Savior's sacrifice. Ideal for Lenten devotional reading and appropriate for any season of the church calendar, this book includes original illustrations of each cross image. The Mystery of the Cross will enrich your understanding of Christian tradition and draw you into Christ's presence.

The R Book Michael J. Crawley, 2007-06-13 The high-level language of R is recognized as one of the most powerful and flexible statistical software environments, and is rapidly becoming the standard setting for quantitative analysis, statistics and graphics. R provides free access to unrivalled coverage and cutting-edge applications, enabling the user to apply numerous statistical methods ranging from simple regression to time series or multivariate analysis. Building on the success of the author's bestselling *Statistics: An Introduction using R*, *The R Book* is packed with worked examples, providing an all inclusive guide to R, ideal for novice and more accomplished users alike. The book assumes no background in statistics or computing and introduces the advantages of the R environment, detailing its applications in a wide range of disciplines. Provides the first comprehensive reference manual for the R language, including practical guidance and full coverage of the graphics facilities. Introduces all

the statistical models covered by R, beginning with simple classical tests such as chi-square and t-test. Proceeds to examine more advanced methods, from regression and analysis of variance, through to generalized linear models, generalized mixed models, time series, spatial statistics, multivariate statistics and much more. The R Book is aimed at undergraduates, postgraduates and professionals in science, engineering and medicine. It is also ideal for students and professionals in statistics, economics, geography and the social sciences.
