A Great Deception Western Shugden Society, 2010 A courageous and compelling account of Tibetan history and the activities of the current Dalai Lama that stand in stark contrast to popular perceptions of a holy politician. With an extensive compilation of news stories, documents, personal accounts, and chronologies, a tangle of religion and politics is revealed that plays out in Tibetan exile communities and across the international stage, embodied in the person of the 14th Dalai Lama. The aims of this book are religious--to end an illegal ban on a mainstream Buddhist practice that the Dalai Lama has personally rejected and maligned. However, to get to the heart of this human rights issue and to gain the support of those who can affect its resolution, the book endeavors to follow knotted threads of political ambitions, deception, greed, and betrayal to unravel the popular mythology that surrounds the iconic Dalai Lama of Tibet.

Claiming and Making Muslim Worlds Jeanine Elif Dağyeli, Claudia Ghrawi, Ulrike Freitag, 2021-07-05 To what extent can Islam be localized in an increasingly interconnected world? The contributions to this volume investigate different facets of Muslim lives in the context of increasingly dense transregional connections, highlighting how the circulation of ideas about 'Muslimness' contributed to the shaping of specific ideas about what constitutes Islam and its role in society and politics. Infrastructural changes have prompted the intensification of scholarly and trade networks, prompted the

circulation of new literary genres or shaped stereotypical images of Muslims. This, in turn, had consequences in widely differing fields such as self-representation and governance of Muslims. The contributions in this volume explore this issue in geographical contexts ranging from South Asia to Europe and the US. Coming from the disciplines of history, anthropology, religious studies, literary studies and political science, the authors collectively demonstrate the need to combine a translocal perspective with very specific local and historical constellations. The book complicates conventional academic divisions and invites to think in historically specific translocal contexts.

Climate Change, Security Risks and Conflict

Reduction in Africa Charlene Cabot, 2016-11-04

Millions of people are already affected by weather-related shocks every year in West Africa and climate change is highly likely to increase these threats. In the wake of climate change, rising temperatures, increasingly irregular rainfall and more frequent natural hazards will endanger the ways of life of vulnerable population groups in this region and destabilize their human security. A surge in violence and conflicts could take place. One of the conflict constellations could be between farmers and herders. These groups are highly vulnerable to climate change due to their dependence on natural resources. A surge in violence and conflicts could take place. One of the conflict constellations could be between farmers and herders. These groups are highly vulnerable to climate change due to their dependence on natural resources for their subsistence. Furthermore, they are historically prone to enter into conflict over issues of access to natural resources. However, social, economic and political circumstances fundamentally influence environmental conflicts. There might thus be opportunities to face the societal challenges of climate change in a peaceful way and the political and institutional framework could play an important role in reducing conflict and violence. In order to explore such a path, this study analyses the potential of political factors (policies and institutions) for the reduction of climate-change-induced or aggravated conflicts between farmers and herders. After a theoretical demonstration, a case study of agro-pastoral conflicts in Burkina Faso, Côte d'Ivoire, and Ghana is conducted. their subsistence. Stories of Oka Isabelle St. Amand, 2018-05-04 In the summer of 1990, the Oka Crisis—or the Kanehsatake Resistance—exposed a rupture in the relationships between settlers and Indigenous peoples in Canada. In the wake of the failure of the Meech Lake Accord, the conflict made visible a contemporary Indigenous presence that Canadian society had imagined was on the verge of disappearance. The 78-day standoff also reactivated a long history of Indigenous people's resistance to colonial policies aimed at assimilation and land appropriation. The land dispute at the core of this conflict raises obvious political and judicial issues, but it is also part of a wider context that incites us to fully consider the ways in which histories are performed, called upon, staged, told, imagined, and interpreted. *Stories of Oka: Land, Film, and Literature* examines the standoff in relation to film and literary narratives, both Indigenous and non-Indigenous. This new English edition of St-Amand's interdisciplinary, intercultural, and multi-perspective work offers a framework for thinking through the relationships that both unite and oppose settler societies and Indigenous

peoples in Canada.

Development and Territorial Restructuring in an Era of Global Change

Elisabeth Peyroux, Christine Raimond, Vincent Viel, Emilie Lavie, 2023-07-25

Thinking about development and the environment simultaneously is one of the biggest scientific and societal challenges of the 21st century. Understanding the interactions between biophysical systems and human activities in an era of global change requires overcoming disciplinary divides and opening up new epistemological perspectives. This book explores these challenges using a territorial lens. Combining various scales of analyses (from global to local) and contexts (both urban and rural) in the North and in the South, it analyzes the relationships between environment and development through a variety of geographical objects (i.e. cities, rural and agricultural areas, coastlines, watershed), themes (i.e. ecological transitions, food, energy, transport, agriculture, mining activities) and methodologies (i.e. qualitative and quantitative approaches, modeling, in situ measurements). By engaging in a dialogue between social science and natural science disciplines, within different fields and with a variety of forms of knowledge production, this book provides essential information for understanding and reading the complexity of a globalized world. This book is targeted at academics and students in social sciences and at stakeholders in the field of territorial and environmental management.

4D Printing, Volume 1 Frederic Demoly, Jean-Claude Andre, 2022-08-23 Any time objects and their

(self-)organization are to be put into use, their models and methods of thinking as well as their designing and manufacturing need to be reinvented. 4D printing is a future technology that is capable of bringing 3D objects to life. This ability, which gives objects the power to change shape or properties over time through energy stimulation from active materials and additive manufacturing, makes it possible to envisage technological breakthroughs while challenging the relationship between people and objects. 4D Printing 1 presents the different facets of this technology, providing an objective, critical and even disruptive viewpoint to enable its existence and development, and to stimulate the creative drive that industry, society and humanity need in the perpetual quest for evolution and transformation.

Dolgyal Shugden DOLGYAL SHUGDEN RESEARCH SOC.,2014-05-02 Many visitors attending public talks and teachings of the Dalai Lama have been shocked to encounter nearby crowds of angry protesters, people dressed in Tibetan Buddhist monastic robes, proclaiming the Dalai Lama to be a liar, hypocrite, dictator, etc., and accusing him of robbing them of their religious freedom. *Dolgyal Shugden: A History* reveals with clear evidence, how these protests have been organized by a Tibetan monk, Kelsang Gyatso, and have been coordinated and populated by his followers, members of his New Kadampa Tradition. It also provides in depth research to show how, though the demonstrations purport to object to the Dalai Lama's repudiation of their worship of the Dolgyal Shugden, considered by most Tibetans to be a

mundane, somewhat demonic spirit, their main aim is simply to attack the Dalai Lama by damaging his reputation, in parallel with the present Chinese government's worldwide attempts to do the same. This book seeks to clarify the ignorance and misconceptions surrounding the Dolgyal Shugden spirit cult and its relationship with the Dalai Lamas of Tibet, and goes on to further analyze the record and development of the schismatic New Kadampa Tradition, unveiling the cultic structures and dogmas, the financial mechanisms, the international affiliations, and the driving motivations of its leadership that keep it running and expanding its missionary activities.

The Independence of the News Media Loïc Ballarini, 2020-10-16 This book explores the different ways Francophone research on news media has faced the challenges of dependence and independence from three complementary perspectives. The first is economics - how can sustainable business models be developed and to what extent can crowdfunding help to maintain the financial and editorial independence of newsrooms? Secondly, in a time where the role of journalism in the public sphere is more questioned than ever, the authors evaluate to what extent news media can embody the needs of their readers. Thirdly, the authors consider the historical and political context of publication in the light of the 'Arab Spring'. This book deals with major, contemporary evolutions of news media, bringing together research that considers the media in France, Canada, and the Arab region (notably Tunisia, Algeria, Morocco, and Egypt). Using numerous case

studies, this book helps to define how complex the question of independence is today.

L'Etat réhabilité en Afrique

Collectif, 2018-08-22 En s'appuyant sur des travaux empiriques et des études sectorielles, cet ouvrage propose une vision rénovée des interventions de l'État en Afrique. Au cours des années 1980, les institutions financières internationales imposèrent un État minimum à tous les pays en leur retirant une partie de leur pouvoir dans les domaines économiques et sociaux. En préconisant une profonde réforme de l'État, leurs programmes d'ajustement structurel devaient résoudre le problème de la dette, permettre aux pays de renouer avec la croissance et déposséder les pouvoirs publics nationaux de certaines de leurs prérogatives au profit d'acteurs privés afin de favoriser la mondialisation et le libéralisme. Les États africains furent contraints d'appliquer ces politiques libérales, élaborées par les instances internationales, qui se traduisirent presque partout par des échecs, voire par des catastrophes socio-économiques et sanitaires. De plus, les populations, qui s'appauvrissaient sous leurs effets, les rejetèrent parfois violemment si bien qu'à la fin des années 1990, on assista à une lente réhabilitation des politiques publiques : l'État comme acteur principal du développement retrouvait ainsi une certaine légitimité, actée par des déclarations et des forums internationaux. Les textes réunis ici reviennent sur ces trajectoires historiques et montrent combien les États africains, bien que sur la voie de la réhabilitation, ont du mal à retrouver le rôle

central qui était autrefois le leur, peinant à définir des politiques publiques et à faire respecter leurs choix face à la multiplicité des acteurs nationaux et internationaux, aux intérêts parfois divergents et aux ressources fort différentes.

The New Allergy Solution Dr. Clifford Bassett, 2017-03-21 One of America's top allergy doctors offers a revolutionary, full-body approach to diagnosing, preventing, and treating allergies—in many cases, for good. Millions of Americans currently suffer from allergies, and the rate is growing. Climate change, globalization, air pollution, and oversanitization of the environment in the early years of life are just a few of the causes that, taken together, have introduced new allergens into our environment that are wreaking havoc and causing needless suffering. This “new allergen marketplace” requires a new allergy solution. According to Dr. Clifford W. Bassett, traditional remedies focus on treating symptoms but leave allergy sufferers vulnerable to continued bouts of misery. Dr. Bassett argues that when we consider a person's genetics, environment, and overall health, we can more effectively identify—and take appropriate action to forestall—symptoms before they even begin. For the first time, Dr. Bassett presents the unique, integrative approach he's used in his Manhattan offices for two decades to vanquish allergy symptoms for countless individuals. In addition to explaining what allergy is (and isn't) and identifying key triggers—from nuts to gluten to the nickel commonly used in cell phones—Dr.

Bassett offers both medical and nonmedical alternatives to treatment, and specific, proactive steps to protect against common allergens. Allergens are here to stay, but with The New Allergy Solution, your life need no longer be ruled and ruined by allergy. The New Allergy Solution strives to enhance your well-being through strategies for a greater sense of control, giving you more freedom to do what you love.

Sometimes I Did All I Could Jerry

Worley, Margaret Morris, Al Stramiello, 2008 The authenticity of being human, paradoxical remembrances, and realms of wellness are some of the themes explored in this cutting-edge, down-to-earth repertoire of essays. Teachers share vivid memories that reflect happenings that began in good faith but, from a human perspective, failed to meet expectations. Read, for example, the chapter Heads or Tails?, a lesson that celebrates the traditions of teaching from a generational vantage point. This jewel of a story emphasizes the risk-taking that all good teachers must take in order to make a difference. Take a journey with these seasoned educators as they share their stories of humility, failure, and fear; indeed, remembrances that would soon teach them well as they travel on through a maze of educational lessons.

The Weight of Shadows José Orduña, 2016-04-12

Tracing his story of becoming a US citizen, José Orduña's memoir explores the complex issues of immigration and assimilation. José Orduña chronicles the process of becoming a North American citizen in a post-9/11 United States.

Intractable realities—rooted in the continuity of US imperialism to globalism—form the landscape of Orduña's daily experience, where the geopolitical meets the quotidian. In one anecdote, he recalls how the only apartment his parents could rent was one that didn't require signing a lease or running a credit check, where the floors were so crooked he once dropped an orange and watched it roll in six directions before settling in a corner. Orduña describes the absurd feeling of being handed a piece of paper—his naturalization certificate—that guarantees something he has always known: he has every right to be here. A trenchant exploration of race, class, and identity, *The Weight of Shadows* is a searing meditation on the nature of political, linguistic, and cultural borders, and the meaning of "America."

Coming Clean Michael Brune, 2008 Americans are awakening to just how costly and destructive our fossil-fuel habit has become - to the environment, our national security and stature, our health, and especially our pocketbooks. We want to take action, to move our country down the path to clean energy, but we're not sure how. *Coming Clean* provides the road map, showing how we, as motivated citizens, can promote real solutions and collectively pressure government and corporations to change their energy priorities. Author Michael Brune tracks the myriad ways our thirst for dwindling supplies of oil and coal corrupts national policy and international finance, harms poor communities worldwide, and wreaks havoc on the climate. He describes the most promising developments in renewables, biofuels, and

efficient design, and outlines an inspiring vision of the clean energy future within our reach.--BOOK JACKET.

Défis de l'Administration/Management de santé publique. Cas de la Direction Régionale de la Santé Publique Vatovavy Henri Michel

Unbeliever, No More! Dr. Mike Salahshurian, PH. D, 2022-05-03 There are over ten thousand religious beliefs in the world today! No doubt, your belief will be among the myriad of beliefs. How sure are you that what you believe is actually true? If you cannot offer reliable proof to substantiate your belief, you need to read this book. Today, we have been bombarded by false information from media, our environment, our peers, not to mention the influence of our upbringing. So we have been taught to adopt a relativistic belief and not to think critically about subjects but rather accept the popular mindset. At times, you have probably wondered and asked many questions pertaining to the very essence of your being and the truth about your belief. In this book, you will find your answers based on the absolute, infallible, and inerrant Word of God.

The R Book Michael J. Crawley, 2007-06-13 The high-level language of R is recognized as one of the most powerful and flexible statistical software environments, and is rapidly becoming the standard setting for quantitative analysis, statistics and graphics. R provides free access to

unrivalled coverage and cutting-edge applications, enabling the user to apply numerous statistical methods ranging from simple regression to time series or multivariate analysis. Building on the success of the author's bestselling *Statistics: An Introduction using R*, *The R Book* is packed with worked examples, providing an all inclusive guide to R, ideal for novice and more accomplished users alike. The book assumes no background in statistics or computing and introduces the advantages of the R environment, detailing its applications in a wide range of disciplines. Provides the first comprehensive reference manual for the R language, including practical guidance and full coverage of the graphics facilities. Introduces all the statistical models covered by R, beginning with simple classical tests such as chi-square and t-test. Proceeds to examine more advanced methods, from regression and analysis of variance, through to generalized linear models, generalized mixed models, time series, spatial statistics, multivariate statistics and much more. *The R Book* is aimed at undergraduates, postgraduates and professionals in science, engineering and medicine. It is also ideal for students and professionals in statistics, economics, geography and the social sciences.

NICOMACHEAN ETHICS Aristotle,2017-04-20 ¶EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.¶

The Mathematics of Secrets Joshua

Holden,2018-10-02 The Mathematics of Secrets takes readers on a fascinating tour of the mathematics behind cryptography—the science of sending secret messages. Using a wide range of historical anecdotes and real-world examples, Joshua Holden shows how mathematical principles underpin the ways that different codes and ciphers work. He focuses on both code making and code breaking and discusses most of the ancient and modern ciphers that are currently known. He begins by looking at substitution ciphers, and then discusses how to introduce flexibility and additional notation. Holden goes on to explore polyalphabetic substitution ciphers, transposition ciphers, connections between ciphers and computer encryption, stream ciphers, public-key ciphers, and ciphers involving exponentiation. He concludes by looking at the future of ciphers and where cryptography might be headed. The Mathematics of Secrets reveals the mathematics working stealthily in the science of coded messages. A blog describing new developments and historical discoveries in cryptography related to the material in this book is accessible at <http://press.princeton.edu/titles/10826.html>.
