

**Sick Schools** David V. Anderson,2020-01-10 Who's afraid of for-profit education? Those who work in non-profit or government owned and operated schools. Many parents and other stakeholders have been made fearful by this education establishment. What's more important to humans: nutrition or education? Nutrition is more important because it is the prerequisite for other human activities, including education. What organizations provide food and who pays for the food? Food is provided by for-profit farmers, for-profit processors, for-profit wholesalers, and for-profit retailers. Most food is purchased with the consumers' own money, but a significant amount is purchased by low-income individuals using food stamps. Why can't education be provided similarly using education stamps? We trust for-profit enterprises to provide our food. Why can't we trust for-profit enterprises to provide K-12 education? Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education. Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for-profit K-12 education sector would please and amaze its customers.

**Meals to Come** Dr. Warren Belasco,2006-10-18 In this provocative and lively addition to his acclaimed writings on food, Warren Belasco takes a sweeping look at a little-explored yet timely topic: humanity's deep-rooted anxiety about the future of food. People have expressed their worries about the future of the food supply in myriad ways, and here Belasco explores a fascinating array of material ranging over two hundred years—from futuristic novels and films to world's fairs, Disney amusement parks, supermarket and restaurant architecture, organic farmers' markets, debates over genetic engineering, and more. Placing food issues in this deep historical context, he provides an innovative framework for understanding the future of food today—when new prophets warn us against complacency at the same time that new technologies offer promising solutions. But will our grandchildren's grandchildren enjoy the cornucopian bounty most of us take for granted? This first history of the future to put food at the center of the story provides an intriguing perspective on this question for anyone—from general readers to policy analysts, historians, and students of the future—who has wondered about the future of life's most basic requirement.

**Confronting Collapse** Michael C. Ruppert,2009-12-15 The book that inspired the movie Collapse. The world is running short of energy-especially cheap, easy-to-find oil. Shortages, along with resulting price increases, threaten industrialized civilization, the global economy, and our entire way of life. In Confronting Collapse, author Michael C. Ruppert, a former LAPD narcotics officer turned investigative journalist, details the intricate connections between money and energy, including the ways in which oil shortages and price spikes triggered the economic crash that began in September 2008. Given the 96 percent correlation between economic growth and greenhouse gas emissions and the unlikelihood of economic growth without a spike in energy use, Ruppert argues that we are not, in fact, on the verge of economic recovery, but on the verge of complete collapse. Ruppert's truth is not merely inconvenient. It is utterly devastating. But there is still hope. Ruppert outlines a 25-point plan of action, including the creation of a second strategic petroleum reserve for the use of state and local governments, the immediate implementation of a national Feed-in Tariff mandating that electric utilities pay 3 percent above market rates for all surplus electricity generated from renewable sources, a thorough assessment of soil conditions nationwide, and an emergency action plan for soil restoration and sustainable agriculture.

The Power of Saying No Vanessa Patrick, 2023-06-01 If you're tired of agreeing to annoying asks and thankless tasks, read this book. The Power of Saying No offers the smartest advice I've ever encountered for declining requests without risking your reputation or your relationships. This essential guide will sharpen your mind and steel your spine to live life on your own terms. —Daniel H. Pink, #1 New York Times bestselling author of *The Power of Regret*, *Drive*, and *To Sell Is Human* Stop saying yes. Start saying no. Change your life! You have probably said yes to bosses, partners, family, friends, and even strangers, when you actually want to say no. Maybe you wish you could say no more often, but you're not sure how or if it's even possible to do so. You're not alone! We're taught to say yes as often as we can. After all, if you say no, aren't you likely to miss out on opportunities and sever important relationships? Isn't saying no a harmony-buster? In *The Power of Saying No*, award-winning professor and researcher Vanessa Patrick delves into the new science of saying no. She introduces the ground-breaking concept of empowered refusal—a proven framework for saying no that puts you in charge of your life—and reveals some surprising secrets about the power of the word no. Dr. Patrick shares: Why empowered refusal is a valuable superskill that helps us say no in a way that does not invite pushback from others. The toolkit of three competencies you need to develop to effectively communicate an empowered no response. A framework to help separate the good-for-me from the not-good-for-me activities and engagements that come our way. How to establish and implement personal policies that empower your refusal. How to use empowered refusal to manage difficult askers, strengthen your relationships and realize your full potential. It's more important than ever to protect your time, focus on your top priorities, and use the power of saying no to reach your goals at work and at home. Empowered refusal is a unique, positive, and meaning-filled approach to managing your energy and ambition effectively, allowing you to make lasting, positive changes in your life. This empowering book is a fascinating read that will help you with conflict resolution, boundaries, communication, and difficult conversations! *The Power of Saying No* will stay within arm's reach for me. It offers the explanations and the inspirations I need to take charge of my life and career, with concrete tools to make it happen. I was able to put Vanessa Patrick's lessons to work the day I started reading the book and have continued every day since. Read this book. Twice. —Dolly Chugh, author of *The Person You Mean to Be* and *A More Just Future*, Jacob B. Melnick Term Professor at the NYU Stern School of Business

**Dignity and Destiny** John F. Kilner, 2015-01-08 Misunderstandings about what it means for humans to be created in God's image have wreaked devastation throughout history -- for example, slavery in the U. S., genocide in Nazi Germany, and the demeaning of women everywhere. In *Dignity and Destiny* John Kilner explores what the Bible itself teaches about humanity being in God's image. He discusses in detail all of the biblical references to the image of God, interacts extensively with other work on the topic, and documents how misunderstandings of it have been so problematic. People made according to God's image, Kilner says, have a special connection with God and are intended to be a meaningful reflection of him. Because of sin, they don't actually reflect him very well, but Kilner shows why the popular idea that sin has damaged the image of God is mistaken. He also clarifies the biblical difference between being God's image (which Christ is) and being in God's image (which humans are). He explains how humanity's creation and renewal in God's image are central, respectively, to human dignity and destiny. Locating Christ at the center of what God's image means, Kilner charts a constructive way forward and reflects on the tremendously liberating impact that a sound understanding of the image of God can have in the world today.
