Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

The Wilderness Family Kobie Kruger, 2014-11-28 When Kobie Krüger, her game-ranger husband and their three young daughters moved to one of the most isolated corners of the world - a remote ranger station in the Mahlangeni region of South Africa's vast Kruger National Park - she might have worried that she would become engulfed with loneliness and boredom. Yet, for Kobie and her family, the seventeen years spent in this spectacularly beautiful park proved to be the most magical - and occasionally the most hair-raising - of their lives. Kobie recounts their enchanting adventures and extraordinary experiences in this vast reserve - a place where, bathed in golden sunlight, hippos basked in the glittering waters of the Letaba River, storks and herons perched along the shoreline, and fruit bats hung in the sausage trees. But as the Krugers settled in, they discovered that not all was peace and harmony. They soon became accustomed to living with the unexpected: the sneaky hyenas who stole blankets and cooking pots, the sinister-looking pythons that slithered into the house, and the usually placid elephants who grew foul-tempered in the violent heat of the summer. And one terrible day, a lion attacked Kobus in the bush and nearly killed him. Yet nothing prepared the Krugers for their greatest adventure of all, the raising of an orphaned prince, a lion cub who, when they found him, was only a few days old and on the verge of death. Reared on a cocktail of love and bottles of fat-enriched milk, Leo soon became an affectionate, rambunctious and adored member of the family. It is the rearing of this young king, and the hilarious endeavours to teach him to become a 'real' lion who could survive with his own kind in the wild, that lie at the heart of this endearing memoir. It is a memoir of a magical place and time that can never be recaptured.
