Coding Streams of Language Cheryl Geisler, Jason Swarts, 2019 A systematic and practical research guide to coding verbal data in all its forms.

Efficient Learning for the Poor Helen Abadzi, 2006 Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman's terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom

show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers, supervisors, and inspectors, as well as university professors and students.

Irrationality Stuart Sutherland, 2007 Why do qualified professionals make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

Gambling Debt E. Paul Durrenberger, Gisli Palsson, 2019-06-17 A look at Iceland's 2008 meltdown from multiple perspectives: "The story is at once shocking and hilarious . . . But also a testament to human resilience." —Keith Hart, London School of Economics Iceland's 2008 financial collapse was the first case in a series of meltdowns, a warning of danger in the global order. This full-scale anthropology of financialization and the economic crisis broadly discusses this momentous bubble and burst and places it in theoretical, anthropological, and global historical context through descriptions of the complex developments leading to it and the larger social and cultural implications and consequences. Chapters from anthropologists, sociologists, historians, economists, and key local participants focus on the neoliberal policies—mainly the privatization of banks and fishery resources—that concentrated wealth among a select few, skewed the distribution of capital in a way that Iceland had never experienced before, and plunged the country into a full-scale

economic crisis. *Gambling Debt* significantly raises the level of understanding and debate on the issues relevant to financial crises, painting a portrait of the meltdown from many points of view—from bankers to schoolchildren, from fishers in coastal villages to the urban poor and immigrants, and from artists to philosophers and other intellectuals. *Gambling Debt* is a game-changing contribution to the discussion of economic crises and neoliberal financial systems and strategies that touches upon anthropology, sociology, economics, philosophy, political science, business, and ethics. “Honest, entertaining, and informative . . . Explores the changing distribution of wealth and the impact of privatization as well as the historical identity of Iceland and the numerous factors that came together to help produce such an economic meltdown.” —Choice Publication supported in part by the National Science Foundation

The Insurgent Archipelago John Mackinlay, 2012 As a young British officer in the Gurkha regiment, John Mackinlay served in the rainforests of North Borneo and experienced firsthand the Maoist-style insurgencies of the 1960s. Years later, as a United Nations researcher, he witnessed the chaotic deployment of international forces to Africa, the Balkans, and South Asia, and the transformation of territorial, labor-intensive uprisings into the international insurgent networks we know today. After 9/11, Mackinlay turned his eye toward the Muslim communities of Europe and institutional efforts to prevent terrorism. In particular, he investigates military expeditions to Iraq and Afghanistan and their effect on the social cohesion of European populations that include Muslims from these regions. In a world divided between rich and poor, the surest way for the bottom billion to gain recognition, express outrage, or improve their circumstances is through insurgency. In this book, Mackinlay explains why leaders from the wealthiest and most powerful nations have failed to understand this phenomenon. Our current bin Laden era, Mckinlay argues, must be viewed as one stage in a series of developments swept up in the momentum of a global insurgency. The campaigns of the 1960s are directly linked to the global movements of tomorrow, yet in the past two decades, insurgent activity has given rise to a new practice that incorporates and exploits the propaganda of the deed. This shift challenges our vertically-structured response to terror and places a greater emphasis on mastering the virtual, cyber-based dimensions of these campaigns. Mckinlay revisits the roots of global insurgencies, describes their

nature and character, reveals the power of mass communications and grievance, and recommends how individual nations can counter these threats by focusing on domestic terrorism.

Excellence in Teaching and Learning in Higher Education Isabel Huet,Teresa Pessoa,Fátima Sol,2021 The initial 'idea' for the book emerged during the seminar Sharing of Innovative Pedagogical Practices that occurred at the University of Coimbra (Portugal) in 2018. Like all 'good ideas', this one originated in a conversation between colleagues from the University of Coimbra and the University of West London in the United Kingdom. The 'idea' of this book was to move away from sharing experiences related to teaching and learning in higher education in just one or two countries, but instead to organise a more European view about the policy, research and teaching practices that are shaping the way our students learn, academics teach and do research. We have a total of 16 chapters from academics in Portugal, the United Kingdom, Ireland, Sweden, the Netherlands, Spain, Italy, and the Czech Republic. The book is organised in four interrelated themes: (1) policy and quality; (2) professionalisation of teaching and academic development; (3) research and teaching nexus; and (4) pedagogy and practice. Enjoy reading the book!

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology.
