Legal Protection for Computer-Implemented Inventions Sabine Kruspig, Claudia

Schwarz, 2016-04-24 As a result of the incorporation of computer software into countless commercial and industrial products, the patentability of software has become a vital issue in intellectual property law. This indispensable book provides an overview on the current status of computer-implemented inventions in patent law across Europe and major jurisdictions worldwide. A hugely practical field research tool with guidance based on case law, it examines the major hurdles in each particular country and describes the best practice to be adopted. Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer-implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings, this book covers such issues and topics as the following: • claim categories for patent applications; • sufficient level of abstraction/breadth of the claimed invention; • fundamental terms of computing and terminological traps; • probability for patents dependent on software application areas; and • patents in core areas of computing. With separate chapters for the key countries, Germany, the United Kingdom, France, the United States, China, Korea, Japan, India, and the European Patent Office the legal situation for computer-implemented inventions in each country or region, this book includes guidance on prosecution under national law, analyses of relevant court decisions, practice checklists, and an outlook on future developments.. The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction. With this incomparable resource, patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications. This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law.

The Electronic Grapevine Diane L. Borden, Kerric Harvey, 2013-11-05

The widespread use of the Internet as a tool for gathering and disseminating information raises serious questions for journalists--and their readers--about the process of reporting information. Using virtual sources and publishing online is changing the way in which journalism takes place and its effect on the society it serves. USE LAST THREE PARAGRAPHS ONLY FOR GENERAL CATALOGS... The Electronic Grapevine explores the use of online media by reporters in the United States, and examines the impact that usage may have on how journalism is framed in the cultural sphere, as well as how it is conducted in the professional one. It contains a mix of material examining how it feels to do online journalism, how it affects those who consume it, different ways that media scholars go about trying to understand it better, and the likely social and cultural impact of Internet-like technologies on the public, at whom all this electronic information is eventually aimed. Drawing from the emerging scholarly work in the field and from the real-life experiences of working journalists, Borden and Harvey collect contributions that examine why journalists use the Internet, what changes it makes in how they approach their jobs, and what differences they see in conducting their daily newsgathering with this medium rather than other methods. The volume also analyses when and why journalists do not use online media and what the impact of the decision to use or not use the Internet may mean for the outer world, whose perceptions of itself are so often shaped by journalistic portrait. This series of thought-provoking, original essays explores the impact of computer-based information and

communication services on traditional journalistic routines and practices, and thereby addresses a critical gap in the scholarly literature on communication, law, and culture. Distinguishing between linkage devices like the Internet, and database resources such as LEXIS/NEXIS, America Online, and others, this book examines the ways in which both types of online services may reshape and redefine not only the products of journalistic effort, but the newsgathering process itself.

Standard-setting through monitoring? The role of Council of Europe expert bodies in the development of human rights Renate Kicker, Markus Möstl, 2013-04-01 A variety of mechanisms has been established in the Council of Europe to monitor compliance with human rights standards. This publication discusses four specific monitoring bodies, namely the Advisory Committee on the Framework Convention for the Protection of National Minorities, the European Committee for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment, the European Commission against Racism and Intolerance, and the European Committee of Social Rights. By assessing and comparing the monitoring procedures and standard-setting activities of these expert bodies, the authors make an essential contribution to the discourse on the Council of Europe's role - both current and future - with regard to human rights. This book constitutes a rich source of information on the dialogue between the four committees and European states. It is addressed to practitioners, diplomats and decision makers at national level to deepen their understanding of the aims and functioning of Council of Europe monitoring mechanisms. Students and academics will gain a comprehensive insight into the legal bases, mandates and procedures of such mechanisms. Finally, it is hoped that the expert bodies themselves will gain much from the authors' analysis of present-day challenges for monitoring and the impact their implementation standards may have on the development of the European human rights order.

Human Rights and US Foreign Policy Jan Hancock, 2007-06-11 This book analyzes the role of human rights in the foreign policy of the George W. Bush Administrations. References to human rights, freedom and democracy became prominent explanations for post-9/11 foreign policy, yet human rights have been neither impartially nor universally integrated into decision-making. Jan Hancock addresses this apparent paradox by considering three distinct explanations. The first position holds that human rights form a constitutive foreign policy goal, the second that evident double standards refute the first perspective. This book seeks to progress beyond this familiar discussion by employing a Foucaultian method of discourse analysis to suggest a third explanation. Through this analysis, the author examines how a discourse of human rights has been artificially produced and implemented in the presentation of US foreign policy. This illuminating study builds on a wealth of primary source evidence from human rights organizations to document the contradictions between the claims and practice of human rights made by the Bush Administrations, as well as the political significance of denying this disjuncture. *Human Rights and US Foreign Policy* will be of interest to advanced students and researchers of US foreign policy, human rights, international relations and security studies.

Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US-led post-9/11 war in Afghanistan. Adopting a long-term perspective, it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era, it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001, and found itself locked in a strategic overreach. Given the bureaucratic and rhetorical momentum triggered by the war on terror in America, the Bush Administration was bound to deploy more resources in Afghanistan sooner or later (despite its focus on Iraq). The need to satisfy unfulfilled counter-terrorism objectives made the US dependent on Afghanistan's warlords, which compromised the country's stability and tarnished its new political system. The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders, who, aware of America's logistical dependency on Islamabad, supported the Afghan insurgents - their

historical proxies - more and more openly. The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations, destabilizing the area further. In the meantime, the need to justify the extension of its military presence influenced the US-led coalition into proclaiming its determination to democratize and reconstruct Afghanistan. While highly opportunistic, the emergence of these policies proved both self-defeating and unsustainable due to an inescapable collision between the US-led coalition's inherent self-interest, hubris, limited knowledge, limited attention span and limited resources, and, on the other hand, Afghanistan's inherent complexity. As the critical contradictions at the very heart of the campaign increased with the extension of the latter's duration, scale, and cost, America's leaders, entrapped in path-dependence, lost their strategic flexibility. Despite debates on troops/resource allocation and more sophisticated doctrines, they repeated the same structural mistakes over and over again. The strategic overreach became self-sustaining, until its costs became intolerable, leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough.

Daniel 11 Michelle Lynn, 2012-04-03 About 2500 years ago Daniel, the Hebrew prophet, penned some incredible words. He wrote a history book in reverse, as it were. He was seeing forward through 'history' in the same way we look back through it. Quite an incredible claim, yet as is demonstrated in this book, a valid one. Regardless of your background or belief system (or lack of), you will be astounded at the perfect marriage of the 45 verses of Daniel 11 and the history of the world. This book is unique in concept and in form and will bring ease and clarity to the study of a difficult subject. It naturally begins at verse one of the chapter, focusing on the historical figure given, and then follows the text to each subsequent point in history. Reference materials are included to make study of the verse text simple.

The Dream of Civilized Warfare Linda Raine Robertson, 2003 In *The Dream of Civilized Warfare*, Robertson presents the compelling, story of the creation of the first American air force--and how, through the propaganda of the flying ace, a vision of clean or civilized combat was sold to politicians and the public. She traces the long history of the American desire to exert the nation's will

throughout the world without having to risk the lives of ground soldiers--a theme that continues to reverberate in public discussions, media portrayals, and policy decisions today.

Water Resource Management in South Asia Anjal Prakash, 2022-05-29 This cluster of books presents innovative and nuanced knowledge on water resources, based on detailed case studies from South Asia—India, Bangladesh, Bhutan, Nepal, Pakistan, and Sri Lanka. In providing comprehensive analyses of the existing economic, demographic and ideological contexts in which water policies are framed and implemented, the volumes argue for alternative, informed and integrated approaches towards efficient management and equitable distribution of water. These also explore the globalization of water governance in the region, particularly in relation to new paradigms of neoliberalism, civil society participation, integrated water resource management (IWRM), public-private partnerships, privatization, and gender mainstreaming. These volumes will be indispensable for scholars and students of development studies, environmental studies, natural resource management, governance and public administration, particularly those working on water resources in South Asia. They will also be useful for policymakers and governmental and non-governmental organizations.

Informing Water Policies in South Asia Anjal Prakash, Chanda Gurung Goodrich, Sreoshi Singh, 2018-05-11 This book analyzes water policies in South Asia from the perspective of Integrated Water Resources Management (IWRM). It seeks to address the problems of water scarcity, conflict and pollution resulting from the gross mismanagement and over-exploitation of this finite resource. Highlighting the need for IWRM in mitigating abuse and ensuring sustainable use, it discusses issues relating to groundwater management; inter-state water conflicts; peri-urban water use; local traditional water management practices; coordination between water users and uses; and water integration at the grassroots level. With case studies from India, Bangladesh, Pakistan, and Nepal, the innovative, painstaking and transnational researches presented in the volume deal with questions of equity, gender, sustainability, and democratic governance in water policy interventions. It will interest researchers and students of development studies, environmental studies, natural resource management, water governance, and public administration, as also water sector professionals, policymakers, civil society activists and governmental and nongovernmental organizations.

Arab Television Today Naomi Sakr, 2007-10-24 There is a great deal at stake for everyone in the future of Arab television. Political and social upheavals in this central but unsettled region are increasingly played out on television screens and in the tussles over programming that take place behind them. Al-Jazeera is of course only one player among a still-growing throng of satellite channels, which now include private terrestrial stations in some Arab states. It is an industry urgently needing to be made sense of; this book does exactly this in a very readable and authoritative way, through exploring and explaining the evolving structures and content choices in both entertainment and news of contemporary Arab television. It shows how owners, investors, journalists, presenters, production companies, advertisers, regulators and media freedom advocates influence each other in a geolinguistic marketplace that encompasses the Arab region itself and communities abroad. Probing internal and external interventions in the Arab television landscape, the book offers a timely and compelling sequel to Naomi Sakr's *Satellite Realms: Transnational Television, Globalization and the Middle East*, which won the Middle Eastern Studies Book Prize in 2003.
