Scholarship, Practice and Education in Comparative Law John H. Farrar, Vai Io Lo, Bee Chen Goh, 2019-10-03 This book examines how law functions in a multitude of facets and dimensions. The contributions shed light on the study of comparative law in legal scholarship, the relevance of comparative law in legal practice, and the importance of comparative law in legal education. The book will particularly appeal to those engaged in the teaching and scholarship of comparative law, and those seeking to uncover the various significant dimensions of the workings of law. The book is organised in three parts. Part I addresses scholarship, with contributors examining comparative legal issues as critique and from a theoretical framework. Part II outlines practice, with contributors discussing the function of comparative law in such comparatively diverse areas as international arbitration, environment, and the rule of law. Part III appraises comparative law in education.

Learning from SARS Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2004-05-26 The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

No Accident Neil Arason, 2014-04-29 It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. *No Accident* examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.

Death Dust William C. Potter, Sarah Bidgood, Samuel Meyer, Hanna Notte, 2023-12-19 The postwar period saw increased interest in the idea of relatively easy-to-manufacture but devastatingly lethal radiological munitions whose use would not discriminate between civilian and military

targets. Death Dust explores the largely unknown history of the development of radiological weapons (RW)—weapons designed to disperse radioactive material without a nuclear detonation—through a series of comparative case studies across the United States, the Soviet Union, the United Kingdom, Iraq, and Egypt. The authors illuminate the historical drivers of and impediments to radiological weapons innovation. They also examine how new, dire geopolitical events—such as the war in Ukraine—could encourage other states to pursue RW and analyze the impact of the spread of such weapons on nuclear deterrence and the nonproliferation regime. Death Dust presents practical, necessary steps to reduce the likelihood of a resurgence of interest in and pursuit of radiological weapons by state actors.

Global Health John J. Kirton, 2017-05-15 In recent years, especially since the end of the cold war, the field of global health has become increasingly linked with and central to the more traditional concerns of international relations. The spread of communicable diseases, the challenge of migrating health workers and the development of new technologies and medicines have all contributed to the ever-expanding issue of global health. International organizations such as the World Health Organization, the utilization of techniques such as the creation of the framework convention on tobacco control and the development of civil society organizations such as the Gates Foundation, have all changed the face and framework of global health. Among the many benefits to the expanding interdisciplinary study of health is the possibility of preventing millions of unnecessary deaths occurring every year. By assembling from a wide array of disciplines and fields the central works that define the field in international relations today, this innovative work explores the future of global health and the possible benefits of expanding the interdisciplinary path even further.

Weapons of Mass Psychological Destruction and the People Who Use Them Larry C. James Ph.D., Terry L. Oroszi Ed.D., 2015-12-01 A must-read for every concerned citizen, this absorbing book goes inside the mind of the psychological terrorist to look at what motivates him to act and to choose the weapon he does. Created by a team of experts in military science and

psychology, this timely study is the first comprehensive treatment of the tactical and psychological use of weapons of mass destruction. The book introduces the term weapons of mass psychological destruction (WMPD) and draws from examples and case histories to examine the minds of the terrorists who choose these weapons, not for maximum killing, but for maximum psychological harm to the greatest number of people. This groundbreaking work identifies the recruiting practices that create psychological terrorists, revealing how these fanatics are made, who becomes one, and why. Emerging trends in WMPD tactics and new technology in the field are detailed, as are related ethical issues, psychological reactions to WMPD, and the role religion may play in the choice of weapons. The innovative strategies and policies that can be used to predict, identify, and prevent disasters employing WMPD are outlined as well. Readers will also learn how the media is unknowingly used as a WMPD, and how terrorists employ social media to launch targeted psychological attacks.

Dominant World Religions Are Mythical, Violent, Sexist, Misogynistic, Discriminatory and Judgmental Khepra Ka-Re Amente Anu, 2020-12-08 Dominant World Religions Are Mythical, Violent, Sexist, Misogynistic, Discriminatory and Judgmental By: Khepra Ka-Re Amente Anu Dominant World Religions Are Mythical, Violent, Sexist, Misogynistic, Discriminatory and Judgmental is a unique account of the actual scriptures of the world's dominant religions to illuminate that these religions are Dogmatic, Mythical, Misogynistic, Sexist, Discriminatory and Judgmental, as well as Fabrications Attributed to an Imaginary God. It uses the extant scriptures of religious books and is not debate or opinion. This book is relevant to anyone who is sick of dogmatic, discriminatory, judgmental, and violent religions. It also shows how the world's dominant religions are copies of older African-Kemetite/Anu (Egyptian/Ethiopian) religious myths. Readers can learn and increase awareness about the mythical, misogynistic, dogmatic, discriminatory, and violent nature of religion.

The Politics of Global Health Governance M. Zacher, Tania J. Keefe, 2008-05-12 Diseases do not recognize national borders, and as we are gradually learning, failure to govern health effectively at a global level profoundly affects us all. Hymns and Constructions of Race Erin Johnson-Williams, Philip Burnett, 2024-02-07 *Hymns and Constructions of Race: Mobility, Agency, De/Coloniality* examines how the hymn, historically and today, has reinforced, negotiated, and resisted constructions of race. It brings together diverse perspectives from musicology, ethnomusicology, theology, anthropology, performance studies, history, and postcolonial scholarship to show how the hymn has perpetuated, generated, and challenged racial identities. The global range of contributors cover a variety of historical and geographical contexts, with case studies from China and Brazil to Suriname and South Africa. They explore the hymn as a product of imperialism and settler colonialism and as a vehicle for sonic oppression and/or resistance, within and beyond congregational settings. The volume contends that the lived tradition of hymn-singing, with its connections to centuries of global Christian mission, is a particularly apt lens for examining both local and global negotiations of race, power, and identity. It will be relevant for scholars interested in religion, music, race, and postcolonialism.

Handbook of Modern Hospital Safety William Charney, 2009-07-28 It is ironic that those whose job it is to save lives often find themselves injured in the course of performing their duties.
